Solved Exercises — Sindh Textbook Board

54 lessons — 204 questions

Blessings of Allah Almighty

Activity

Column-1	Column-2
1. Air	food and growing seeds
2. Animals	breathing
3. Sun	drinking, washing and growing crops
4. Plants	heat and light
5. Water	milk, meat and riding

Fill in the blanks (use the word box: Insha Allah, MashaAllah, Alhamdulillah, YarhamukAllah, SubhanAllah): (i) When a Muslim plans to do something, he says _____.

Answer: Insha Allah, which means: if Almighty Allah wills.

Fill in the blank: (ii) When a Muslim hears or sees something good, he says _____.

Answer: MashaAllah, which means: as Almighty Allah willed.

Fill in the blank: (iii) Muslims thank Allah by saying _____.

Answer: Alhamdulillah. We should thank Almighty Allah for every blessing He gives us.

Fill in the blank: (iv) When a Muslim sneezes, the one who hears him says _____.

Answer: YarhamukAllah, which means: may Almighty Allah have mercy on you. The one who sneezes himself says Alhamdulillah.

Fill in the blank: (v) Muslims praise Allah by saying _____.

Answer: SubhanAllah, which means: glory be to Almighty Allah, He is free from every fault.

Fasting

Question: (i) What does fasting mean?

Answer: Fasting means to give up eating and drinking for Almighty Allah. Fasting is an important religious activity; it is also a time of prayer and of doing good deeds to help the poor and needy.

Question: (ii) List three things which we learn through fasting.

Answer: Through fasting we learn three things: (1) patience, (2) to understand the feelings of those who do not get enough food to eat, (3) to do good deeds and help the poor and needy.

Fill in the blank: 1. (i) Muslims fast in the month of _____.

Answer: Ramazan. They fast from sunrise to sunset.

Fill in the blank: 1. (ii) Christians fast in _____.

Answer: Lent. This is their special time of fasting in the year.

Fill in the blank: 1. (iii) Hindus fast in _____.

Answer: during their religious festivals such as Maha Shivaratri and just before Diwali. People of all faiths fast at different times of the year.

2. Muslims begin their fast by eating _____.

Answer: Sehri. Sehri is eaten before sunrise, and then the fast is kept for the whole day.

3. Muslims end their fast by eating _____.

Answer: Iftari. Iftari is eaten at sunset and the family breaks the fast together.

4. The special prayer offered by Muslims during Ramazan is called _____.

Answer: Taraveeh. Muslims also recite the Holy Quran regularly during the month of Ramazan.

Religious Festivals

Question: Activity: Write five (5) or more sentences to describe how you celebrate a religious festival. (Model: Eid-ul-Fitr)

Answer: Model answer (Eid-ul-Fitr): (1) Eid-ul-Fitr is celebrated on the first day of Shawal after the fasting month of Ramazan. (2) We prepare for Eid by decorating our home and we make new clothes and buy new shoes. (3) We give Fitra to the poor and needy so that they can also enjoy Eid. (4) On Eid day we wear new clothes and go to the mosque or Eidgah for Eid prayers. (5) After the prayers we wish each other Eid Mubarak, children receive Eidi, and we eat delicious food and sweets with our family and friends.

End-of-Unit 1 Exercise

Question: 1. Draw a picture of the blessings Almighty Allah has given you. Colour it. (Describe the blessings in words instead of the picture)

Answer: Almighty Allah has given me many blessings: the air I breathe, the water I drink and the food I eat, my home and my family that I live with. We have to thank Almighty Allah for all these blessings.

Question: 2. Fill in the boxes with the blessings that Almighty Allah has given you. (The first one has been done for you: Food)

Answer: The blessings Almighty Allah has given me are: food, water, air, home, family, sunlight and its warmth, plants and animals. These are a few of the blessings that we have to thank Almighty Allah for.

Fill in the blank: 3. (i) Easter is celebrated by _____.

Answer: Christians. Christians celebrate Christmas and Easter.

Fill in the blank: 3. (ii) At the end of the fasting month of Ramazan, Muslims celebrate _____.

Answer: Eid-ul-Fitr. Eid-ul-Fitr is celebrated on the first day of Shawal.

Fill in the blank: 3. (iii) Eid-ul-Azha is celebrated on the 10th day of the Islamic month of _____.

Answer: Zil Hajj. It is also called the Feast of Sacrifice.

Fill in the blank: 3. (iv) Hindus celebrate Holi and _____.

Answer: Diwali. Diwali is the festival of lights.

Fill in the blank: 3. (v) Eid-ul-Azha is also called the _____.

Answer: Feast of Sacrifice. On this Eid Muslims sacrifice animals to recall the sacrifice of Hazrat Ibrahim (AS) for Allah.

Fill in the blank: 3. (vi) Jews celebrate _____ and _____.

Answer: Hanukkah, Passover. People of every religion celebrate their

religious festivals every year.

Fill in the blank: 3. (vii) Muslims sacrifice animals like goats, cows, sheep or camels on _____.

Answer: Eid-ul-Azha. The meat of the sacrificed animals is shared among the poor, friends and relatives.

Fill in the blank: 3. (viii) The special sweet dish eaten and served to guests on Eid-ul-Fitr is _____.

Answer: Sheer Khurma (sweet vermicelli). Delicious food and sweets are prepared in homes on Eid.

Fill in the blank: 3. (ix) The religious festival to celebrate the birth of Jesus (AS) is _____.

Answer: Christmas. Christmas is celebrated by Christians.

Fill in the blank: 3. (x) Diwali is celebrated by _____.

Answer: Hindus. On Diwali, Hindus light small oil lamps (diyas).

Question: 4. Pictures of festivals of different religions are given. For each picture write the name of the festival and the religious group that celebrates it. Pictures: (1) burning oil lamps (diyas), (2) a Christmas tree and a church, (3) a nine-branched candlestick (menorah), (4) a cattle market (mandi).

Answer: (1) Burning oil lamps — Festival: Diwali — Religious group: Hindus. (2) Christmas tree and church — Festival: Christmas — Religious group: Christians. (3) Nine-branched candlestick — Festival: Hanukkah — Religious group: Jews. (4) Cattle market — Festival: Eid-ul-Azha — Religious group: Muslims.

Question: 5. (a) Find out and list some cultural festivals celebrated in your village/city.

Answer: Cultural festivals celebrated in our area are: (i) the Urs of Hazrat Shah Abdul Latif Bhittai, (ii) Sindhi Culture Day (Topi Ajrak Day), (iii) the

Mango Festival. People celebrate these festivals happily together.

Question: 5. (b) Write the answers about one cultural festival: (i) Name of the festival, (ii) When is it celebrated? (iii) Why is it celebrated? (iv) What do you do on that special day?

Answer: Model answer: (i) Name: the Urs of Hazrat Shah Abdul Latif Bhittai. (ii) When: it is celebrated every year at Bhit Shah for three days. (iii) Why: it is celebrated in memory of the great Sufi poet of Sindh, Hazrat Shah Abdul Latif Bhittai. (iv) On that day people visit the shrine, listen to poetry and Sufi music, and enjoy the fair.

Our Country Pakistan

Question: Activity: Join the dots to make the map of Pakistan. Write the names of the provinces and their capital cities. (Write the names in words instead of the map)

Answer: The four provinces of Pakistan and their capital cities are: (1) Sindh — Karachi, (2) Punjab — Lahore, (3) Khyber Pakhtunkhwa (KPK) — Peshawar, (4) Balochistan — Quetta. The capital of Pakistan is Islamabad, and Gilgit Baltistan is also a part of Pakistan.

Our Flag

Question: Activity 1: Draw the flag of Pakistan and colour it. (Describe the flag in words)

Answer: The colours of the flag of Pakistan are green and white. The green colour shows prosperity and the Muslim majority, and the white colour shows peace and the minority. The crescent on the flag shows progress and the star shows light and knowledge.

Question: 3. Complete the table: write the colours and symbols of the flags of our neighbouring countries. Flags: China, India, Iran, Afghanistan.

Answer: (1) China — Colour: red — Symbol: yellow stars (one big star and four small stars). (2) India — Colours: saffron, white and green — Symbol: a blue wheel (Ashoka Chakra) in the centre. (3) Iran — Colours: green, white and red — Symbol: a red national emblem in the centre. (4) Afghanistan — Colours: black, red and green — Symbol: the national emblem in the centre.

Quaid-e-Azam Muhammad Ali Jinnah

Question: Activity: Make a fact file on Quaid-i-Azam Mohammad Ali Jinnah by completing the sentences.

Answer: Name: Quaid-i-Azam Mohammad Ali Jinnah. Date of birth: 25th December, 1876. Place of birth: Karachi. Profession: lawyer. Achievements: he led the struggle for Pakistan and made Pakistan; he was the first Governor General of Pakistan. Date when he died: 11th September, 1948. Place where he is buried: Karachi (Mazar-e-Quaid).

Government

Question: (i) What is a government?

Answer: A group of elected people who look after everything for the country is called the government. Just as a mother and father take care of the family, the government takes care of the whole country and its people.

Question: (ii) List three responsibilities of a government.

Answer: Three responsibilities of a government are: (1) to provide people their basic needs like education and health care, (2) to ensure the supply of clean water, gas and electricity, (3) to build roads, railway stations and airports and to keep the life and property of people safe.

Question: (iii) What responsibilities do you have towards your country?

Answer: My responsibilities towards my country are: (1) going to school and studying hard, (2) keeping my home, school, locality and park clean, (3) obeying the traffic rules.

End-of-Unit 2 Exercise

Question: 1. Draw and colour the flag of Pakistan. (Describe the flag in words)

Answer: The flag of Pakistan is green in the bigger part and white in the smaller stripe. There is a white crescent and star in the middle of the green part. The flag shows the identity of the country.

Fill in the blanks (keep the flag of Pakistan in mind): 2. (i) The green colour shows _____ and prosperity.

Answer: the Muslim majority

Fill in the blank: 2. (ii) The white colour shows _____ and _____.

Answer: peace, the minority. The white colour tells us that all the people of the country should live in peace.

Fill in the blank: 2. (iii) The crescent symbol shows _____.

Answer: progress. The crescent is white in colour and is in the green part of the flag.

Fill in the blank: 2. (iv) The star symbol shows _____ and _____.

Answer: light, knowledge. The star is drawn on the flag together with the crescent.

Question: 3. (i) What is the name of our country?

Answer: The name of our country is Pakistan. Pakistan came into being on 14th August 1947.

Question: 3. (ii) Name the capital of Pakistan.

Answer: The capital of Pakistan is Islamabad. Islamabad is a beautiful and clean city.

Question: 3. (iii) What is the national language of Pakistan?

Answer: The national language of Pakistan is Urdu. Urdu is understood and

spoken in the whole country.

Question: 3. (iv) Which province do you live in?

Answer: I live in the province of Sindh. (Every student will write the name of his or her own province.) Sindh is one of the four provinces of Pakistan.

Question: 3. (v) Name the capital city of the province you live in.

Answer: I live in Sindh and the capital city of Sindh is Karachi. Karachi is the biggest city of Pakistan.

Question: 3. (vi) How many different languages can you speak?

Answer: I can speak two different languages: Sindhi and Urdu. (Every student will write the names of his or her own languages.) Many languages are spoken in Pakistan.

Question: 3. (vii) Who is the founder of Pakistan?

Answer: The founder of Pakistan is Quaid-i-Azam Mohammad Ali Jinnah. He worked very hard with others to make Pakistan.

Question: 4. Complete the table: write the provinces of Pakistan, their capital cities and the languages spoken there.

Answer: (1) Sindh — Capital: Karachi — Language: Sindhi. (2) Punjab — Capital: Lahore — Language: Punjabi. (3) Khyber Pakhtunkhwa — Capital: Peshawar — Language: Pashto. (4) Balochistan — Capital: Quetta — Language: Balochi.

Question: 5. Look at the flags, identify the colours and symbols of the flag and fill in the blanks. Find out the name of the country. Flags: (1) a green flag with white Arabic writing and a sword, (2) a white flag with a red circle in the centre, (3) a maroon flag with a lion, (4) a blue, white and red flag with crosses.

Answer: (1) Country: Saudi Arabia — Colour: green — Symbol: white Arabic writing (the Kalima) and a sword. (2) Country: Japan — Colour: white — Symbol: a red circle (the sun) in the centre. (3) Country: Sri Lanka —

Colours: maroon, gold, green and orange — Symbol: a lion holding a sword. (4) Country: United Kingdom — Colours: blue, white and red — Symbol: crosses.

Village Life

Activity: Complete the sentences about a day in the life of a woman in a village: (i) She gets up at _____. (ii) She has _____ to eat at breakfast. (iii) In the morning she _____.

Answer: 5 o'clock., bread (roti) and tea, does the housework, feeds the animals and milks them. (iv) She eats lunch at 1 o'clock. (v) After lunch she works in the fields or does the housework. (vi) In the evening she cooks the evening meal and takes care of the children. (vii) She goes to bed at 9 o'clock.

Activity: Complete the sentences about a day in the life of a man in a village: (i) He gets up at _____. (ii) He has _____ to eat at breakfast. (iii) In the morning he _____.

Answer: 5 o'clock., bread (roti) and tea, goes to the fields and ploughs the land or takes care of the crop. (iv) He eats lunch at 1 o'clock. (v) After lunch he continues working in the fields and feeds the animals. (vi) In the evening he returns home and spends time with his family. (vii) He goes to bed at 9 o'clock.

Question: Activity: Why do the villagers go to the town?

Answer: The villagers go to the town for these things: (i) to get their tools and machines fixed, (ii) to get their children taught at school, (iii) to get treatment from a doctor when they are sick, (iv) to buy things of daily need from the market, (v) to sell their crops and animals.

Changes in the Village Over Time

Question: 1. How has the village school changed over time?

Answer: In the past the village school was a small one-room building in the town next to the village and the children had to walk very far to get to school. Now there is a two-room primary school in the village and most of the children go to this school; when they pass primary school they go by van to a secondary school in the town.

Question: 2. Find out from your parents how means of transport have changed in your village. (Describe the change)

Answer: In the past people mostly travelled on foot, by bicycle, bullock cart and camel cart, and travelling took a long time. Now people use motorcycles, rickshaws, vans, buses and tractor trolleys, so travelling has become fast and easy.

Question: 3. Complete the table to show how village life is changing — in the past and now a days. Work: ploughing the land, planting the crop, watering the crop, harvesting the crop, transporting farm products to market.

Answer: (1) Ploughing the land — In the past: ploughing with oxen — Now: ploughing with a tractor. (2) Planting the crop — In the past: sowing seeds by hand — Now: sowing with machines. (3) Watering the crop — In the past: taking out water with a Persian wheel (rahat) and by hand — Now: tube-well and canal water. (4) Harvesting the crop — In the past: harvesting by hand — Now: harvesting with a thresher machine. (5) Transporting farm products to market — In the past: bullock cart and camel cart — Now: truck and tractor trolley.

City Life

Question: Activity 1: In Column (A) write the facilities people have in cities, and in Column (B) tell why these facilities have been provided.

Answer: Column (A) Facilities in a city: schools, colleges and universities; hospitals and dispensaries; gardens (parks) and playgrounds; bazaars and shopping centres; offices and factories; big and small roads and public transport. Column (B) These facilities are provided so that every person can get education, treatment, play, shopping and work, and people's rights are fulfilled. The government alone cannot give a school and a hospital to every person, so private institutions and people also open schools and hospitals.

Question: Activity 2: In the given table, tell the difference between villages and cities: number of people, number of houses, the work people do, means of travel, environment.

Answer: Number of people: few in a village, very many in a city. Number of houses: few and far apart in a village, many and close together in a city (apartments and bungalows). Work people do: in villages most people are farmers who grow crops and keep cattle; in cities people work in offices, factories, shops and hospitals. Means of travel: on foot, bicycle and bullock cart in villages; cars, buses, rickshaws and motorcycles in cities. Environment: a village is quiet and clean, while a city has crowds, noise and many vehicles.

The Work People Do

Question: Activity (A): For the people below, write two sentences about the work they do, and also tell why their work is important: (1) Farmer (2) Teacher (3) Mason/builder (4) Policeman (5) Tailor.

Answer: (1) Farmer: A farmer grows crops in the land. His work is important because he provides food for all of us. (2) Teacher: A teacher teaches children to read and write. Her work is important because only with education can children become good citizens. (3) Mason/builder: He builds houses and buildings. His work is important because we need buildings to live and work in. (4) Policeman: He protects people's lives and property and controls the traffic. His work is important because it keeps peace and order. (5) Tailor: He stitches clothes. His work is important because we all need clothes to wear.

Question: Activity (A) continued: (6) Doctor (7) Sweeper (8) Factory worker (9) Shopkeeper (10) Bus driver.

Answer: (6) Doctor: A doctor treats sick people. His work is important because he makes people healthy. (7) Sweeper: He cleans the streets and houses. His work is important because cleanliness keeps diseases away. (8) Factory worker: He makes things in a factory. His work is important because factory-made things are used in our daily life. (9) Shopkeeper: He sells things of daily need at his shop. His work is important because we get things near our home. (10) Bus driver: A bus driver drives a bus. He takes people from home to school, to their place of work and to the shops.

Activity (B): Guess who I am and fill in the blanks (word box: butcher, cobbler, industrialist, tailor (woman), milkman, milk-seller (gwala), shopkeeper, singer (woman), vegetable seller): (i) I am sewing clothes, I

am a _____. (ii) I am repairing shoes, I am a _____. (iii) I am singing a song, I am a _____. (iv) I sell vegetables, I am a _____. (v) I sell milk, I am a _____. (vi) I sell meat, I am a _____.

Answer: every, work, helps, others,, so, we should respect every profession.

Caring for One Another

Question: Activity (A): The children who have less than you — in what ways can you help them? (four ways)

Answer: (i) I can give them my extra clothes and toys. (ii) I can share my food and lunch with them. (iii) In studies I can help them by giving my notebooks, books and pencils. (iv) In sickness or trouble I can look after them and can tell the elders so that they get help.

Question: Activity (B): When you are in need and someone helps you, how do you feel?

Answer: When I am in need and someone helps me, I feel very happy and peaceful. I feel that I am not alone and that people love me. That is why I should also help others, so that they feel happy in the same way.

End-of-Unit 3 Exercise

Question: Question 1: Look at the given pictures carefully and identify how people are helping each other. Write the help in the given blanks: (Picture 1) Two girls are studying together. (Picture 2) A teacher is teaching children. (Picture 3) People are helping people trapped in flood water. (Picture 4) People are pushing a broken-down car. (Picture 5) A man is helping a disabled old woman in a wheelchair to cross. (Picture 6) People are harvesting the wheat crop together.

Answer: (1) The girls are helping each other in studies. (2) The teacher is helping the children by teaching them. (3) People are rescuing the people trapped in the flood. (4) People are helping by pushing the car. (5) The man is helping the woman in the wheelchair. (6) People are helping each other in harvesting the crop.

Question: Question 2: Look at the pictures below carefully and write in the given blank what the farmers are doing: (1) Weeding/looking after plants in the field (2) Spraying medicine on the crop (3) Cutting fodder with a fodder-cutting machine (4) Ploughing with oxen (5) Carrying the crop on a tractor (6) Milking a cow.

Answer: (1) The farmers are working in the field (weeding). (2) The farmer is spraying the crop to save it from insects. (3) The women are cutting fodder for the animals with a machine. (4) The farmer is preparing the land by ploughing with oxen. (5) The harvested crop is being carried on a tractor. (6) The woman is milking the cow. Farmers do all this work with hard labour day and night to provide food for us.

Question: Question 3 (a): Tell three such works by which you can help the other members of your home. Question 3 (b): Write three such works

which, together with the other children of your class, you can do to help them.

Answer: 3 (a): (i) Helping in cleaning the house. (ii) Teaching my younger brothers and sisters and looking after them. (iii) Doing small works of my parents, like filling water or bringing things. 3 (b): (i) Explaining a difficult lesson to my classmates. (ii) Cleaning the classroom together. (iii) Sharing my notebook or pencil with a child who does not have one.

Question: Question 4: Read the first and third chapters of this unit and identify what is similar and what is different between village life and city life — Similar (common) / Different.

Answer: Similar: at both places people live in houses; children go to school; people help each other and celebrate festivals together. Different: a village has less population and most people are farmers, while a city has more population and people work in offices and factories; a village has big open fields and farms, while a city has tall buildings and crowded roads.

Question: Question 5: Complete the table: Common professions in villages / Common professions in cities / Professions common in both villages and cities.

Answer: Common in villages: farmer, cattle grazer, small shopkeeper. Common in cities: office workers, factory workers, engineers, bank workers. Common in both: teacher, doctor, shopkeeper, tailor, policeman. Every profession fulfils some need of the people.

Question 6: Ask your parents or grandfather/grandmother about an important person in the history of your village or city and fill in the blanks: (i) Name of the personality _____ (ii) Date and place of birth _____ (iii) Why is he famous? _____ (iv) His good qualities _____ (v) Date of death (if he has died) _____.

Answer: such, people, our, area, makes progress.

Question: Questions 7 and 8: Ask your parents about the history of your village or city and write their answers in the given blanks. When they were growing up, what did the village or city look like at that time? Why?

Answer: When my parents were young, our village was small; the houses were made of mud, the roads were unpaved and there were few facilities of electricity and water. At that time there were very few vehicles and people mostly travelled on foot or by bicycle. Now the houses have become pucca, roads have been built and school, hospital and electricity have come, so the village looks bigger and better.

We Are Born Equal in Honour and Dignity

Question: Activity 1: Tell two such things in which the children living in your neighbourhood are like you. Activity 2: Tell two such things in which the children living in your neighbourhood are different from each other.

Answer: Activity 1 (similarities): (i) We all study in the same school and like to play. (ii) We have all been taught to respect our parents and teachers. Activity 2 (differences): (i) Our clothes and foods are different from each other. (ii) Some children speak different languages and their games and hobbies are also different. In spite of the differences, we are all equal in dignity and respect.

Question: Read the story "Sajida" and answer (Question 1): What did Sajida do that her friends became annoyed with her?

Answer: Sajida did not respect others. When it was time to wash hands, she would push through the queue and come before everyone else. At lunch time she would eat her own burger first and then eat her classmates' burgers too. Because of this her friends became annoyed with her.

Question: Story questions 2: What were the things of respecting (others)?

Question 3: What is the meaning of "dignity and respect"?

Answer: Question 2: The things of respecting are: waiting for your own turn, not pushing in a queue, not taking others' things without permission, and caring for others' feelings. The teacher made Sajida understand these things so that she would respect others more and take more care of their things. Question 3: Dignity and respect means: giving importance to every person, behaving well with him, and not hurting his feelings — just as we want for ourselves.

Question: Story question 4: Recall a time when you yourself or someone else was not showing respect. (i) Who was not showing respect? (ii) Why? (iii) In future, how will you or that person show respect to the other person?

Answer: (i) One day my friend was not showing respect. (ii) He pushed through the queue and took a child's pencil without asking, because he was in a hurry. (iii) In future I will wait for my turn, will not take anyone's thing without permission, and will talk politely with everyone. When we respect others, we also get respect.

Our Rights and Our Responsibilities

Question: Activity (A): Tell or write five (05) things which you think a child should get to live happily. Activity (B): Now divide them into the two columns of "Needs" and "Wishes" given below. Activity (C): If your "needs" are not fulfilled, what will happen?

Answer: (A) Five things: food (bread), clothes, a house, education, and love and care. (B) Needs: things which are required for a healthy and happy life, for example bread, clothes, a house etc. — my needs are: bread, clothes, a house, clean water, education. Wishes: things which are not necessary but we want them or wish for them, for example nicely roasted chicken (broast) or a car — my wishes are: new toys, ice cream, a bicycle. (C) If the needs are not fulfilled, the child will become sick, weak and sad, and he will not be able to grow properly.

Question: Answer the questions: (i) What are children's rights? (ii) Tell five (05) rights of children. (iii) Why are children's rights important?

Answer: (i) Children's rights are those things which every child should get to live a healthy and happy life, such as the right to live, the right to education and the right to play. (ii) Five rights: (1) the right to live, (2) the right to get education, (3) the right to health protection (treatment), (4) the right to bread, clothes and living at a safe place, (5) the right to play and rest. (iii) Children's rights are important because without them children cannot stay healthy, educated and happy, and they cannot become responsible citizens.

Question: Question (iv): Does every person agree with the following list? Point it out. Question (v): Who provides children's rights and who protects them?

Answer: (iv) Yes, every sensible person will agree with this list, because every child has the right to live, to learn and to play. No person thinks it right to deprive children of their basic rights. (v) Children's rights are provided by their elders — parents, teachers and the government — and they also protect them. It is the responsibility of the elders to give children their rights.

Question: Activity: For every right given in Column (A), write three responsibilities in Column (B): (1) The right to live with a family that looks after you (2) The right to play (3) The right to health protection (4) The right to treatment (5) The right to bread and clothes (food and dress).

Answer: (1) Right to live with family — responsibilities: respecting my parents, helping in cleaning the house, loving my brothers and sisters. (2) Right to play — responsibilities: putting the toys away after playing, not plucking flowers in the park, sharing my toys with friends. (3) Right to health protection — responsibilities: washing hands before eating food, eating vegetables and fruits, going to school daily and doing homework. (4) Right to treatment — responsibilities: taking the doctor's medicine on time, resting in illness, saving others from disease. (5) Right to bread and clothes — responsibilities: not wasting food, keeping clothes clean, being thankful for food.

Forgiving Others

Question: Activity 1: Think of a time when a friend of yours hurt you, or you hurt your friend. Describe it in four sentences: (i) What did your friend do to you? (ii) What did you do? (iii) How did you feel about all this? (iv) If it happens again, what can you do?

Answer: (i) One day my friend took my pencil without asking and did not return it. (ii) Instead of fighting with him, I told the teacher and then talked to my friend with love. (iii) At first I felt hurt and angry, but when he said sorry I felt good. (iv) If it happens again, I will first explain with love and forgive him, because by forgiving, friendship stays alive.

Question: Read the story "Sara and Anam" and answer the questions: (i) When Sara saw Anam playing with another girl, what did Sara feel? (ii) When Sara reached home, what did she think? (iii) How did the two girls become friends again? (iv) What do you think — which work of Sara was right?

Answer: (i) Sara felt very angry and sad, because Anam was her best friend. (ii) On reaching home Sara thought about all the things that she and Anam had done together, for example playing house-house, hide and seek and cricket. (iii) In the evening Sara went to Anam's home; both said sorry to each other, hugged each other and became friends again. (iv) Sara's right work was that she herself went and said sorry and saved the friendship. Saying sorry and forgiving are both good works.

End-of-Unit 4 Exercise

Question: Question 1: Make a drawing of the playground (park) that you want, in which you can use your right to play. (Describe in words)

Answer: In my favourite park there will be a big green ground with swings, a slide and a see-saw. On one side there will be trees with benches in their shade, and a clean path in the middle. There will also be a tap of clean water and a dustbin, so that the park stays clean and every child can play safely.

Question: Question 2: Make a list of the works that you do to help others in your home, in your class (school), in your village/town and city (2 works for each).

Answer: At home: (1) Doing small works of my parents. (2) Looking after my younger brothers and sisters. In class (school): (1) Explaining the lesson to classmates. (2) Helping in cleaning the classroom. In village/town/city: (1) Helping an old person cross the road. (2) Taking part in cleaning the neighbourhood. By helping others everyone stays happy.

Question: Question 3: (i) Who is your best friend? (ii) Which two things in you are similar to your friend? (iii) Which two things in you are different from your friend? (iv) If there is a difference of opinion between you and your friend on any one of these dissimilar things, what will you do?

Answer: (i) My best friend is Ahmed (every child will write his own friend's name). (ii) Similar things: we both work hard in studies and both of us like to play cricket. (iii) Different things: I like drawing, he likes singing; I get up early in the morning, he gets up late. (iv) If there is a difference, I will talk with love, respect each other's choice, and will not let the friendship be spoiled. A difference can be solved by talking.

Question 4: What should these people do? Put a tick (✓) near the correct answer. (a) Beena and Saleem are playing with dolls. Beena has been playing for a long time with the doll wearing the faded-colour shirt. Now Saleem wants to play with it. What should Beena do? (i) She should request Beena to give her one turn (ii) She should shout "Give me the doll" and snatch the doll from Beena (iii) She should push Beena and snatch the doll.

Question: Question 4 (b): Sana is playing a video game. Rehan wants to play but Sana is not giving it to him. What should Rehan do now? (i) He should snatch the game from Sana by force (ii) He should make a rule at the very start that each one will play the game for a fixed time (iii) He should tell Sana to give him one turn. Question 4 (c): Sara and Kiran are drawing. Sara does not have a red pencil while Kiran has one. What should Sara do now? (i) Take Kiran's red pencil without asking her (ii) Ask Kiran whether she can use her red pencil (iii) Use some other colour instead of red.

Answer: 4 (b): ✓ (ii) — Making a rule at the start is best, that each one will play for a fixed time; this way there will be no quarrel. 4 (c): ✓ (ii) — Sara should ask Kiran for permission. Taking a thing without asking is against respect, and asking permission also increases friendship.

Question: Question 5: Some things are being told here which can sometimes happen with children. What do you think is the respectful thing to do? (a) Sonia's teacher told Sonia to pick up the toys with which she was playing. To show respect, what should Sonia do? (i) She should pick up the toys (ii) She should shout loudly at the teacher "No!" (b) Babar's brother borrowed a bicycle from him. By chance the bicycle went somewhere in sand and mud, as a result of which the bicycle became dirty. In your opinion, what should be the respectful way on this occasion?

(i) Babar should return the dirty bicycle (ii) Babar should wash the bicycle well before returning it. (c) In the class, Anjila and Noreen are both waiting to tell a story. Noreen wants to go first but the teacher calls Anjila first. What is the simple respectful way for Noreen? (i) She should wait for her turn (ii) At the time Anjila is telling the story, Noreen should also start telling a story.

Answer: 5 (a): ✓ (i) — Sonia should pick up the toys; obeying the teacher is respect. 5 (b): ✓ (ii) — Washing and cleaning the bicycle before returning it is the respectful way. 5 (c): ✓ (i) — Noreen should wait for her turn; if two people speak at the same time, nobody can listen.

Question: Question 6: What can be the most forgiving thing of all? Put a tick (✓) near the correct answer. (a) Aamir and Bilal are playing with blocks (wooden pieces). Bilal is making a tall tower. Aamir deliberately knocks down Bilal's tower. What should Bilal do? (i) Tell Aamir that he is angry at the falling of his tower, and Aamir should say sorry and help Bilal rebuild the tower (ii) He should knock down Aamir's blocks. (b) Tahira and Kiran decided that after school they would play together, but then Kiran invited Susie to come to her home. What should Tahira do on this occasion? (i) She should tell Kiran that she will never talk to her again (ii) She should tell Kiran that she is certainly upset, nevertheless she still wants to remain her friend. (c) Hira and Leena have been friends for many years. One day while playing, Hira called Leena by a bad name. Later she said that she wanted an apology. In this case what should Leena do? (i) Leena should stand up and say that she does not want to be her friend any more (ii) Leena should tell her that her feelings have been hurt; although she called Leena by a bad name, still she is her friend.

Answer: 6 (a): ✓ (i) — Bilal should tell his anger with love, and Aamir should say sorry and help rebuild the tower. 6 (b): ✓ (ii) — Tahira should

tell her feelings but keep the friendship. 6 (c): ✓ (ii) — Leena should tell her that she was hurt, but she is still her friend; on her saying sorry, she should forgive her.

Question: Question 7: Find out from your parents/teachers what the government does to give you the following rights, and complete the table: (i) Your right to a name and nationality (ii) The right to get education (iii) The right to health care (iv) The right to play. Additional activity: Read and learn the poem about forgiving — remember to act on what this poem tells.

Answer: (i) Right to a name and nationality: the government makes the child's birth certificate and identity card. (ii) Right to education: the government builds government schools and gives free books. (iii) Right to health: the government builds hospitals and gives free injections (vaccines). (iv) Right to play: the government makes parks and playgrounds. Additional activity: The poem tells us that as long as we are alive, we should always remember to forgive; in life we need to forgive and forget, and in return we will get a precious reward.

Our Earth, Our Environment

Activity (p 52): Choose the correct word and fill in the blank: (i) Animals are _____ things. [living / non-living] (ii) Table and chair are _____ things. [living / non-living] (iii) If a plant does not get air, it will become _____. [alive / dead] (iv) A football _____ move by itself. [can / cannot] (v) A mango tree _____ save itself from fire. [can / cannot]

Answer: eat food., have no life., water and light to stay alive., Cannot — only living things can, cannot run away from fire, so it cannot

Question: Activity (p 53): Which of these things are natural and which are man-made? Label the given pictures: a monkey sitting on a tree branch; a monkey in a cage; a house built in a garden; a forest; a dolphin in the sea; a goldfish in a glass bowl; children sitting in the mountains; children watching TV in a room.

Answer: Natural things: the monkey sitting on a tree branch (natural), the forest (natural), the dolphin in the sea (natural), the children sitting in the mountains (natural surroundings). Man-made things: the monkey in a cage (the cage is made by man), the house built in a garden, the goldfish in a glass bowl, the children watching TV in a room. Natural things are made by Allah Almighty and man-made things are made by people.

Natural Resources

Question: Question from the lesson: What are natural resources? Name the four natural resources told in the book and say why we need them.

Answer: Natural resources are those things which we get from the natural environment and which are used for our needs. The four big natural resources told in the book are: (1) land, (2) water, (3) plants, (4) animals. We need them because without them we cannot live — from land we get food and minerals, water is needed for drinking, from plants we get food and wood, and from animals we get milk and meat. In the coming units we will learn about each of them in detail.

End-of-Unit 5 Exercise

Question: Question 1: Draw one of the natural resources and colour it. (Describe your drawing in words)

Answer: I have drawn a tree which has green leaves, a brown trunk and red fruits. A tree is a natural resource: from it we get fruits, wood and shade. Trees also keep the air clean, so we should plant more trees.

Question 2: Bring a toy (a doll, car, teddy bear or ball), compare yourself with it and fill in the blanks: (i) I can _____, my toy cannot _____. (ii) I can _____, my toy cannot _____. (iii) I can _____, my toy cannot _____. That is why I am a _____ thing, my toy is a _____ thing.

Answer: eat food,, eat food., talk,, talk., walk by myself,, walk by itself., living, non-living

Question: Question 3: Look at the two pictures given below: in one, zebras are standing in a plain at sunset, and in the other, birds are flying over water. Name three natural resources seen in these pictures.

Answer: The three natural resources seen in the pictures are: (1) the sun (sunlight and heat), (2) water (of the river and pond), (3) animals (zebras and birds) and grass/plants. All these are natural resources because we get them from nature and they are necessary for the life of all living things.

Question: Question 4: For the natural resources given in Column (A), write in Column (B) how we use each one: air, water, plants, animals.

Answer: Air: we breathe in air; without it we cannot live. Water: we drink water and use it for cooking, washing and watering crops. Plants: from plants we get food (grains, vegetables, fruits), wood and medicines.

Animals: from animals we get milk, meat, eggs and skin (leather), and some animals are used for riding and carrying loads.

Question: Question 5: Find at least five (05) plants and five (05) animals found in your area and write their names in your notebook.

Answer: Five plants found in my area: (1) neem tree, (2) mango tree, (3) rose plant, (4) wheat, (5) grass. Five animals: (1) dog, (2) goat, (3) pigeon, (4) buffalo, (5) sparrow (house sparrow). These plants and animals are part of our environment and we should take care of them.

The Earth (Land)

Question: Activity: Look at each natural resource and tell what can be made from it (match: natural resource ⟶ the thing made from it): gold; a pile of clay; trees; a sheep; cotton.

Answer: Gold ⟶ gold jewellery (given as an example in the book). Clay ⟶ clay pots (pitchers, bowls). Trees ⟶ a wooden house. Sheep ⟶ wool (balls of wool/yarn) — warm clothes are made from sheep's wool. Cotton ⟶ clothes (a shirt etc.) — thread and then clothes are made from cotton. From the natural resources found in the land we make many useful things.

Plains

Question: Activity: Tell or describe three uses of plains.

Answer: Three uses of plains are: (1) For building houses to live in, schools, hospitals and offices — buildings are made easily in plain areas. (2) For growing food crops, for example wheat etc. — good crops grow in the fertile land of plains. (3) For growing cotton for clothes — our clothes are made from cotton. That is why plains are very useful for human life.

Mountains

Question: Question from the lesson: The book says, "We find springs of water in the mountains; these springs make rivers and lakes." What do mountains give us? (Note: this lesson has no printed activity for students; this question is made from the lesson's text.)

Answer: Mountains give us many things: (1) Fresh and sweet water — snow falls on mountains; it melts and makes rivers and springs from which we get drinking water. (2) Minerals — many mineral things are found in mountains, for example gold, silver and iron. (3) Cool and clean air and beautiful scenery. That is why mountains are also a big natural resource for us.

Forests

Question: Activity: (i) What is a forest? (ii) Why are forests important? (iii) If we cut down the forests, what will happen?

Answer: (i) A forest is a place where many trees grow close to each other and many things live there. (ii) Forests are important because: they are the home of many animals; they keep the air clean and fresh; their wood is used in many things, for example desks, classroom doors and windows; some wood is also used as fuel for cooking. (iii) If we cut down the forests, the homes of animals will be destroyed, the air will become dirty, wood will not be available, and the danger of floods in rains will increase.

Problems of the Earth and Their Solutions

Question: Activity: Name three activities which man performs and which affect the land. Tell three ways by which man can reduce the problems of land.

Answer: Three human activities that affect the land: (1) Throwing garbage and dirt — it makes the land dirty. (2) Growing crops on the same land year after year without proper care — it makes the land weak. (3) Cutting forests and digging the land for minerals — it destroys the homes of animals and spoils the environment. Three ways to reduce the problems: (1) Use things less, reuse them (cloth, paper, wood), and reuse bottles and paper. (2) Farmers should protect their land and fields. (3) Make laws to protect forests and plant more trees.

End-of-Unit 6 Exercise

Question: Question 1: Draw a forest and colour it. (Describe in words)

Answer: In the forest I have drawn, big green trees are standing close to each other. Deer and a rabbit can be seen among the trees and birds are sitting on the branches. A small stream is also flowing through the forest. A forest is the home of animals and keeps the air clean.

Question 2: Choose the correct word from the word box and fill in the blank. Word box: (air, hill, land (field), minerals, plain, mountain, water, forests) — a word may be used more than once. (i) We breathe in _____. (ii) We eat the food grown in the _____. (iii) All living things need air, food and _____ to live. (iv) We drink _____ coming from rivers and lakes. (v) We build our houses in the _____. (vi) Such pieces of land which are a little higher than the surface of the earth are called _____ and _____. (vii) Gold, marble and silver are examples of _____. (viii) Forests help in keeping the _____ clean and fresh. (ix) Big flat pieces of land are called _____. (x) Such land on which a large number of trees grow close to each other is called _____.

Answer: mountain (vii) Minerals (viii), Air (ix) Plain (x) Forests., natural resources, are necessary for, life,, so, we, should, protect, them.

Question 3: Look at the given pictures and fill in the blanks: (i) Jewellery is made from _____. (ii) The mausoleum of Quaid-e-Azam is built from _____. (iii) Rods are made from _____.

Answer: precious minerals like gold and silver., of white marble., strong iron. All these three minerals are found in the land.

Question: Question 4: (i) Name three natural resources. (ii) Name three mineral products which you use. (iii) Iron is a mineral product; name three

things made from iron.

Answer: (i) Three natural resources: water, plants and animals (land and air are also natural resources). (ii) Three mineral products which I use: iron, salt and natural gas. (iii) Three things made from iron: a knife, a frying pan (karahi) and a door lock. Minerals are found in the land and are very useful in daily life.

Question: Question 5: For the jobs given in Column (A), write in Column (B) which natural resources each one uses in his work: you (as a student), farmer, fisherman, housewife, jeweller, the worker in a zoo, carpenter.

Answer: Student: uses wood and paper (pencil, desk, book). Farmer: uses land, water and seeds. Fisherman: uses water (river/sea) and fish. Housewife: uses water, vegetables and fuel (wood/gas). Jeweller: uses minerals like gold and silver. Zoo worker: uses fodder (grass, grain) and water for animals. Carpenter: uses wood. Natural resources are surely used in every work.

Question: Question 6: What land-related problems do the people face in your area? Find out from your parents, teachers or books and write.

Answer: The land problems in my area are: (1) People throw garbage on roads and in empty plots, which makes the land dirty. (2) Due to cutting of trees, greenery in the area has decreased and the danger of floods in rains has increased. (3) By growing crops continuously on the same land, the land is becoming weak. To solve these problems we should put garbage in the dustbin, plant more trees and take care of the land.

Water

Question: Activity 1: Answer the following questions: (i) What is the surface of the earth covered with? (ii) How much part of the surface of the earth is covered with water? (iii) Where is salty water found? (iv) Where is fresh (sweet) water found? (v) Why is most of the water found on the surface of the earth not fit for drinking?

Answer: (i) The surface of the earth is covered with land and water. (ii) About three-fourths (3/4) part of the surface of the earth is covered with water. (iii) Salty water is found in oceans and seas. (iv) Fresh (sweet) water is found in rivers, lakes, springs, streams, under the ground and from rain. (v) Most of the water is not fit for drinking because it is salty; drinking salty water spoils health.

Question: Activity 2: Water sources are shown in the picture: a pond from where a zebra is drinking water, a well, a waterfall and stream, a canal/river and a sea. Put the label of the correct name on each source.

Answer: Pond/lake: where the zebra is drinking water. Well: from where water is taken out with a bucket. Waterfall/stream: water flowing down from the mountains. Canal/river: water with a big flow which goes towards the fields. Sea: the biggest store of salty water. All these are natural sources of water.

How Water Reaches Our Homes

Activity 1: Complete the flow chart — the journey of water from the mountains to the tap of our homes: Mountain ⟶ _____ ⟶ _____ ⟶ _____ ⟶ Tap. Question from the lesson: From where does water come into wells?

Answer: snow melts, river, water reservoir where water is cleaned

Question: Activity 2: Look at the two glasses: in the first glass the water is cloudy (muddy) and in the second glass the water is clean and clear. (i) From which glass will you drink water? (ii) Why?

Answer: (i) I will drink water from the second glass which has clean and clear water. (ii) Because drinking cloudy water can cause diseases, while clean water is good for health. That is why we should always drink clean water, and at home we should drink water after filtering or boiling it.

Importance of Water

Question: Activity 1 (A): In the table given below, note for 6 days how many times in one day you use water for these purposes: brushing teeth, taking a bath, drinking, cooking, washing dishes, watering plants, washing clothes. Activity 1 (B): (i) For which purpose do you use the least water? (ii) For which purpose do you use the most water?

Answer: 1 (A) Model table (number of times in one day): brushing teeth — 2 times; taking a bath — 1 time; drinking — 6 to 8 times; cooking — 3 times; washing dishes — 3 times; watering plants — 1 time; washing clothes — 1 time (every child will write his own count). 1 (B) (i) The least water is used for brushing teeth and watering plants. (ii) The most water is used for taking a bath and washing clothes. Water is very important for daily life.

Use Water Carefully

Question: Question from the lesson: The ways of saving water are told in the lesson. Tell six ways to use water carefully. (Note: this lesson has no separate activity box; this question is made from the list in the lesson.)

Answer: Six ways to save water: (1) Keep the tap closed while brushing teeth. (2) Take a bath in less time (take a short bath). (3) For cleaning the house, use a bucket and mug instead of a pipe. (4) Do not let water keep running while washing dishes. (5) Get leaking pipes and taps repaired so that water stops leaking. (6) Teach others also to save water. Water is a precious blessing; it should not be wasted.

End-of-Unit 7 Exercise (Questions 1 to 3)

Question: Question 1: Draw and show how the snow lying on the mountains becomes water and how it flows in the form of a river. (Describe in words)

Answer: In my drawing there is a big mountain with white snow on its top. With the heat of the sun, the snow melts and becomes water. That water flows down in the form of a small stream and then becomes a big river and flows towards the plains. We use the river's water for drinking, farming and other works.

Question: Question 2: (i) With what thing is the biggest part of the surface of the earth covered? (ii) Salty water is found in seas and oceans; name three such places where fresh water is found. (iii) How do people bring underground water to their homes? (iv) Name any three living things which need water to live.

Answer: (i) The biggest part of the surface of the earth is covered with water. (ii) Three places where fresh water is found: rivers, lakes and springs (underground water and rain also give fresh water). (iii) People dig wells, install tube wells or hand pumps to bring underground water to their homes. (iv) Three living things: human beings, animals (cow, goat etc.) and plants — all of them need water to live.

Question: Question 3: Arrange the table given below showing how water is used: how animals use water; how I and my family use water; how farmers use water; how plants use water.

Answer: Animals: animals drink water and use it for bathing; some animals live in water itself, for example fish. I and my family: we drink water and use it for cooking, washing dishes and clothes and taking a bath. Farmers:

farmers use water for watering their crops and fields and for giving water to animals. Plants: plants grow with water and make their food; without water plants dry up.

Sources of Water and Saving Water (Unit 7 Exercise)

Question: 4. Write the names of water sources in the blank spaces given under each picture. Pictures: (1) a boat on a river, (2) a glacier in the mountains, (3) the sea, (4) a lake between mountains, (5) a well.

Answer: The water sources are: (1) River, (2) Glacier, (3) Sea, (4) Lake, (5) Well. We get water from rivers, lakes, wells and rain.

Question: 5. Find out the ways in which people waste water. Write what they can do instead.

Answer: (i) People waste a lot of water washing a car with a pipe — instead they should wash the car with a bucket and a cloth. (ii) They leave the tap open while brushing teeth or washing hands — instead they should open the tap only when needed. (iii) Water keeps flowing from broken taps and pipes — instead they should get them fixed at once. (iv) Washing the street and courtyard with a pipe wastes water — instead they should clean with a broom. (v) Keeping the tap open under the pots wastes water — instead they should turn off the tap after filling the pots.

Plants Around Us

Question: 1. Write the names of three (3) plants around you.

Answer: Three plants around me are: (i) a neem tree, (ii) a rose plant, (iii) a sunflower plant. Plants are one of the many beautiful gifts of nature and they are very useful for us.

Question: 2. Write the names of the plants in the given spaces. Pictures: (1) a big green tree, (2) a date palm tree, (3) a flowering plant in a pot with red flowers, (4) sunflowers.

Answer: (1) Neem tree, (2) Date palm tree, (3) A flowering plant in a pot (hibiscus / China rose), (4) Sunflower plant. We eat some plants and we use some plants to make other things.

Parts of Plants and Their Functions

Question: Activity: Draw a plant. Label the parts of a plant and colour it. (Write the labels in words)

Answer: The parts of a plant are: the flower at the top, the leaves below it, the stem and its branches in the middle, and the roots under the ground. Each part of the plant helps the plant in some way.

Question: Root Activity: Bring in a plant with its roots intact. Observe the roots and answer: (I) What did you observe?

Answer: I observed that the roots grow down into the soil and they have many small branches. There was dirt on the roots and they were spread out in every direction.

Question: (II) Why is there dirt on the roots?

Answer: There is dirt on the roots because roots grow underground in the soil and stay close to the soil. The roots suck up water and nutrients from the soil.

Question: (III) Why do roots grow underground?

Answer: Roots grow underground so that they can take water and nutrients from the soil and keep the plant fixed firmly in the same place. The plant finds its water under the ground.

Question: (IV) Why do roots have small branches?

Answer: Roots have small branches so that they can spread out and absorb more water and nutrients from the soil. The small branches also hold the plant firmly in its place in the soil.

Question: Activity (strip of cotton cloth / paper towel experiment): Dip one end of the strip in a cup of water. What did you observe happen?

Answer: I observed that the water slowly moved up the strip and the strip

became wet. In the same way the roots absorb water and it travels through the whole plant.

Fill in the blanks (word box: food, grow, roots, support): 1. (i) Roots _____ into the soil.

Answer: grow

Fill in the blank: 1. (ii) Water and nutrients are absorbed by the _____ of a plant.

Answer: roots

Fill in the blank: 1. (iii) We eat some roots as _____.

Answer: food, such as carrot, radish and arvi. These roots store food in them.

Fill in the blank: 1. (iv) Roots give _____ to the plant to stand straight.

Answer: support

Question: 2. Draw three roots that you eat, name and colour them. (Write the names)

Answer: Three roots that we eat are: (1) carrot, (2) radish, (3) arvi. These roots store food in them, so they are thick and good to eat.

Question: Stem experiment (lettuce leaf with stem in coloured water): Write the observations for three days.

Answer: Day 1: The level of water in the glass was high and the colour of the lettuce leaf was light green. Day 2: The level of water went down a little and the colour started rising into the leaf. Day 3: The level of water went down more and the colour of the lettuce leaf changed to red/blue, because the stem carried the coloured water up to the leaf.

Question: Stem experiment questions: (i) What was the colour of the lettuce leaf in the beginning?

Answer: In the beginning the colour of the lettuce leaf was light green. The leaf was fresh and green and no other colour had risen into it yet.

Question: (ii) What was the colour of the lettuce leaf at the end of the experiment?

Answer: At the end of the experiment the colour of the lettuce leaf had changed to red (or blue). The colour could be seen clearly in the veins of the leaf.

Question: (iii) Why did the colour of the lettuce leaf change?

Answer: The colour of the lettuce leaf changed because the stem sucked the coloured water from the glass and carried it up to the leaf. The stem works like a straw, sucking the water up.

Question: (iv) What is the function of the stem?

Answer: The functions of the stem are: it keeps the plant standing straight, it supports the branches, leaves, flowers and fruits, and it takes water from the roots and gives it to the leaves to make food. Some plants also store food in their stems, such as sugarcane.

Question: Activity: In the table, different types of leaves are given. Put a tick on number 1 for simple leaves, on number 2 for compound leaves and number 3 for needle leaves. (12 leaves, top to bottom, left to right)

Answer: The answers for the leaves are: Row 1: (1) simple leaf — 1, (2) simple leaf — 1, (3) simple leaf — 1, (4) simple leaves — 1. Row 2: (5) compound leaf with three leaflets — 2, (6) needle leaves (pine) — 3, (7) needle leaves — 3, (8) compound leaf — 2. Row 3: (9) simple leaf — 1, (10) simple leaf — 1, (11) compound leaf with five leaflets — 2, (12) compound leaf — 2.

Question: 1. (i) Why are the flowers brightly colored?

Answer: Flowers are brightly colored so that they can attract butterflies and bees to the plants. The butterflies and bees help in pollination.

Question: 1. (ii) Did you see any insect, butterflies or bees on the flowers? What were the insects doing?

Answer: Yes, I saw bees and butterflies on the flowers. They were drinking the nectar of the flowers and flying from one flower to another carrying pollen, which helps in pollination.

Question: 1. (iii) What are the main functions of flowers?

Answer: The main functions of flowers are: (1) their colourful colour and pleasant smell attract butterflies and bees to the plants, which help in pollination, (2) flowers make the fruits that we eat, seeds are present in the fruit and new plants grow from the seeds, (3) flowers make our environment beautiful.

Question: 2. Describe in order how a flower becomes a fruit with seeds and seeds grow into a new plant. (Example: guava)

Answer: The order is: guava flower → the flower becomes a guava fruit → there are seeds in the fruit → when a seed is sown in the soil, a new guava plant grows from it. In this way every flowering plant keeps growing.

End-of-Unit 8 Exercise

Question: 1. (a) Draw a plant. Colour and label its parts. (Write the labels in words)

Answer: The parts of a plant are: flower (at the top), leaves, branches, stem (trunk) and roots (under the ground). The flower is the colourful part of the plant, the leaves make food, the stem keeps the plant standing straight and the roots absorb water.

Question: 1. (b) Write the things that a plant needs to grow.

Answer: A plant needs four things to grow: (i) water, (ii) sunlight, (iii) air, (iv) soil (and its nutrients). Without these things a plant cannot grow.

Fill in the blanks (word box: flower, fruit, trunk, water, food): 2. (i) Roots take in _____ from the soil.

Answer: water

Fill in the blank: 2. (ii) The stem of a tree is called the _____.

Answer: trunk. The trunk is the thick and strong part of the tree.

Fill in the blank: 2. (iii) The colorful part of a plant is the _____.

Answer: flower. The flower is the beautiful part of the plant and the fruit is also made from the flower.

Fill in the blank: 2. (iv) Leaves make food for the plants.

Fill in the blank: 2. (v) Flowers make _____.

Answer: fruit and new plants grow from the seeds, such as mangoes and oranges.

Question: 2. Look at the pictures and answer the questions: Picture 1 shows a rose plant with pink flowers and Picture 2 shows a date palm tree. (i) Write the names of the plants.

Answer: 1. Rose plant. 2. Date palm tree. Both plants are commonly seen around us.

Question: 2. (ii) In what ways are these plants similar?

Answer: Both plants are green and both have roots, a stem and leaves. Both are flowering plants, and both need water, sunlight and air to grow.

Question: 2. (iii) What are the differences between these two plants? (Look at the leaves, stem, branches, flowers and fruits, if any)

Answer: The differences are: (1) The rose is a small plant and the date palm is a very tall tree. (2) The stem of the rose is thin and has thorns, whereas the trunk of the date palm is thick and straight. (3) The leaves of the rose are small and round, whereas the leaves of the date palm are long and spread out at the top like a crown. (4) The rose has pink and beautiful flowers, whereas the date palm bears dates as its fruit.

Question: 3. (a) In the picture, some vegetables are given numbers from 0 to 10. Write the name of each vegetable and identify which part of the plant it is.

Answer: (0) Spinach/lettuce — leaf. (1) Maize (corn) — fruit (seeds). (2) Onion — stem (bulb). (3) Beans — fruit (pod). (4) Broccoli — flower. (5) Tomato — fruit. (6) Garlic — stem (bulb). (7) Artichoke — flower. (8) Cucumber — fruit. (9) Maize (corn) — fruit (seeds). (10) Red capsicum (pepper) — fruit.

Question: 3. (b) Pictures of some plants are given. Write in the given space: flowering or non-flowering. Pictures: (1) a pine tree with needle leaves, (2) roses, (3) a flowering plant, (4) a fruit tree, (5) a leafy bush, (6) big flowers.

Answer: (1) Pine tree — non-flowering. (2) Roses — flowering. (3) Flowering plant — flowering. (4) Fruit tree — flowering. (5) Leafy bush — non-flowering. (6) Big flowers — flowering. The plants that produce flowers

and seeds are called flowering plants.

Animals Around Us

Question: Activity: Name five animals that live around you.

Answer: Five animals that live around me are: (1) Dog — lives in the home and street. (2) Cat — lives in homes. (3) Pigeon — lives on roofs and trees. (4) Goat — is kept in villages and homes. (5) Sparrow (house sparrow) — lives near homes. These animals are a part of our environment and we should behave with them with love.

Places Where Animals Live

Question: Activity 1: In the picture a tree, a lake and grass are shown. Choose animals from the word box and place/label each one at its living place. Word box: (fish, parrot, frog, duck, monkey, snake, deer).

Answer: Fish — in the water (in the lake). Parrot — on the tree. Frog — at the edge of the water and in the grass. Duck — in the water (it swims). Monkey — on the tree. Snake — in the grass and in a burrow. Deer — in the grass and forest. Every animal lives at such a place where it gets food and safety.

Question: Activity 2: Write the names of three animals each: (i) Animals with four legs (ii) Animals with wings (iii) Crawling animals (iv) Animals with a shell.

Answer: (i) With four legs: cow, horse, dog. (ii) With wings: pigeon, parrot, butterfly. (iii) Crawling animals: snake, earthworm, lizard. (iv) With a shell: tortoise, snail. The body structures of animals help them in living and moving.

Question: Activity 3: (i) What does a bird do with its wings? (ii) What does a duck do with its webbed feet? (iii) What does a horse do with its legs? (iv) What does an insect do with its wings?

Answer: (i) A bird flies with its wings. (ii) A duck swims with its webbed feet — the webbed feet help in pushing the water. (iii) A horse runs and walks with its legs. (iv) An insect flies with its wings. Every animal's body parts are made for its special work.

Homes of Animals

Question: Read the story "Chhota Bani" and answer the questions: (i) Who had invited all the animals to his birthday party? (ii) Where did Bani's parents go first? (iii) Who lives in a den? (iv) Where did the monkey live? (v) Where did they find Bani? (vi) Why did Bani go towards the river?

Answer: (i) Babbar Sher Leo (the lion) had invited all the animals of the jungle to his birthday party (he could not invite Fish Fini only, because she cannot live without water). (ii) Bani's parents went first to the anthill. (iii) A lion lives in a den. (iv) The monkey lived in a tree. (v) They found Bani near the river. (vi) Bani had gone towards the river to invite Fish Fini to the birthday so that she too could join the party happily. All the animals were proud of Bani and then a second party was held with Fini.

Question: Activity 2: Match the animals with their homes: (i) Rabbit (ii) Ant (iii) Bird (iv) Fish (v) Cow — Homes: burrow; anthill; tree (nest); pond/water; cattle pen/enclosed field.

Answer: (i) Rabbit — burrow (a hole-home made in the ground). (ii) Ant — anthill. (iii) Bird — nest made on a tree. (iv) Fish — pond/water. (v) Cow — cattle pen/enclosed field. More from the lesson: lions and tigers live in dens, a honeybee's home is a hive, a spider's home is a web, and monkeys and insects live on trees.

Animals and Their Babies

Question: Activity 1: The pictures are in the wrong order; match each sentence with the correct picture: (1) Birds make nests (2) The female lays eggs in the nest (3) The parent birds sit on them (4) The eggs hatch and the chicks come out (5) The parent birds feed grain to the chicks.

Answer: (1) Birds make nests — picture: a bird collecting twigs. (2) The female lays eggs in the nest — picture: a bird with eggs in the nest. (3) The parents sit on them — picture: a bird sitting on the eggs. (4) The eggs hatch and the chicks come out — picture: new small chicks in the nest. (5) The parent birds feed grain to the chicks — picture: a bird feeding the chicks. A bird's babies are called chicks.

Question: Activity 2: Choose a word from the word box and tell how the mother is helping her baby in each picture. Word box: (carrying, bathing, teaching, feeding, love, protecting). Pictures: a hen with chicks; a lioness carrying her cub in her mouth; an elephant spraying water on her calf; a cat with her kitten; a kangaroo keeping her baby in her pouch; a bird feeding the chicks.

Answer: Hen with chicks — teaching (she teaches them to peck grain). Lioness carrying cub in mouth — carrying. Elephant spraying water on calf — bathing. Cat with kitten — love. Kangaroo with baby in pouch — protecting. Bird feeding chicks — feeding. Every mother loves her babies and protects them.

Question: Activity 3: Read the poem "Mother Animal" — what does the poem tell us? Activity 4: Name two animals whose babies do not look like their parents, and two whose babies look like their parents. Activity 5: Do you look like your parents? What similarities are there in you?

Answer: Activity 3: The poem tells us that every mother loves her babies: she keeps them calm and warm, brings food and water for them, protects them from danger, cleans them at bath time, and gathers them together at night. Activity 4: Babies that do not look like parents: the frog's baby (tadpole) and the butterfly's baby (caterpillar) — they change their shape when they grow up. Babies that look like parents: the cat's baby (kitten) and the cow's baby (calf) — they look like their parents from birth. Activity 5: Yes, I look like my parents: my eyes are like my mother's and my nose and way of smiling are like my father's.

Question: Activity 6: For the adult animals given in Column (A), write the names of their babies in Column (B): (i) Sheep (ii) Cat (iii) Dog (iv) Hen (v) Cow (vi) Swan (big duck) (vii) Frog (viii) Horse (ix) Butterfly (x) Duck (xi) Lion.

Answer: (i) Sheep — lamb (given as an example in the book). (ii) Cat — kitten. (iii) Dog — puppy. (iv) Hen — chick. (v) Cow — calf. (vi) Swan (big duck) — swan chick (cygnet). (vii) Frog — tadpole. (viii) Horse — foal. (ix) Butterfly — caterpillar. (x) Duck — duckling. (xi) Lion — lion cub. Every animal's baby has its own special name.

End-of-Unit 9 Exercise

Question: Question 1: Draw a rabbit's burrow and a spider's web and colour them. (Describe in words)

Answer: A rabbit's burrow: it is a hole in the ground with small rooms inside; the rabbit lives in it and hides in it at the time of danger. A spider's web: it is a round web made in the branches of a tree or in a corner; the spider lives in it and traps insects in it and eats them. Every animal makes its home for its safety.

Question 2: Fill in the blanks with the names of animals' homes: (i) Bats live in _____. (ii) Birds live in _____. (iii) Monkeys live in _____. (iv) Horses live in _____. (v) Cows live in _____. (vi) Rabbits live in _____.

Answer: them.

Question: Question 3: Tell how each animal's body structure helps it: (i) The camel's hump (ii) The lion's sharp teeth (iii) The fish's fins (iv) The duck's webbed feet (v) The bird's beak (vi) The elephant's trunk (vii) The tortoise's shell.

Answer: (i) The camel's hump — food (fat) is stored in it, by which the camel can stay without food for many days in the desert. (ii) The lion's sharp teeth — help in chewing food and eating meat and in hunting. (iii) The fish's fins — help in swimming. (iv) The duck's webbed feet — help in swimming. (v) The bird's beak — helps in eating food and pecking grain. (vi) The elephant's trunk — helps in reaching stems and leaves for food and in lifting things. (vii) The tortoise's shell — is for its protection; at the time of danger the tortoise hides in it.

Question: Question 4: Circle the different animal and tell why it is different:

(a) Cat, cow, dog, hen (b) Crow, horse, parrot, peacock (c) Tortoise, fish, lizard, snake (d) Butterfly, dolphin, starfish, whale (e) Crocodile, frog, monkey, green turtle.

Answer: (a) Hen — because the other three are mammals, the hen is a bird: it has two legs, wings, and it lays eggs. (b) Horse — the other three are birds which can fly; a horse is a land animal and cannot fly. (c) Fish — the other three are reptiles; a fish lives in water and breathes in water. (d) Butterfly — the other three are sea animals; a butterfly is an insect which lives on land and in the air. (e) Monkey — the other three live in or near water; a monkey is an animal of trees and land.

Question: Question 5: Choose the correct word from the word box and complete the table of how each animal moves. Word box: (crawls, swims, walks, flies, jumps, hops, runs) — cow, lion, horse, fish, parrot, earthworm, kangaroo, crow. Question 6: Find the animals found in your area (Column A) and tell how each one helps us (Column B).

Answer: Question 5: Cow — walks. Lion — runs. Horse — runs. Fish — swims. Parrot — flies. Earthworm — crawls. Kangaroo — hops/jumps. Crow — flies. Question 6: Column A (animals of my area) and Column B (our help): Cow — gives us milk. Goat — gives milk and meat. Hen — gives eggs and meat. Dog — guards the house. Horse — helps in riding and carrying loads. Animals are very useful for us, so we should take care of them.

Using the Earth's Resources to Meet Our Needs

Activity 1: Solve the crossword: Across 1. They are caught in the sea — _____ Across 3. Furniture is made from it — _____ Across 4. It is used to make wire — _____ Down 1. The farmer works on it — _____ Down 2. Jewellery is made from this mineral — _____

Answer: furniture, wire, the, jewellery, gold. All these things are the resources of the earth which are used for our needs.

Question: Activity 2: Match each object with its raw material (in pictures): a wooden table; a coil of copper wire; a gold necklace — Raw materials: wood logs; copper; gold.

Answer: Wooden table ⟶ wood — a table is made from the wood got from trees. Copper wire ⟶ copper — wire is made from the mineral copper. Gold necklace ⟶ gold — necklaces and jewellery are made from gold. Every made thing is made from some natural raw material.

Farming

Question: Activity 1: Name the five main big crops of Pakistan.

Answer: The five main big crops of Pakistan are: (1) wheat, (2) rice, (3) cotton, (4) sugarcane, (5) maize (corn). Farmers grow these crops with great hard work, and from them the whole country gets food and cotton for clothes.

Activity 2: Complete the natural source of the common products: (i) Biscuits are made from _____ (ii) Jewellery is made from _____ (iii) Toffee is made from _____ (iv) Corn oil is made from _____ (v) Furniture is made from _____.

Answer: wheat flour (given as an example in the book)., gold (a mineral)., sugar which, sugarcane. (iv) Maize (corn) — corn oil comes out of maize grains., the wood of trees. Our daily things are made from natural sources only.

Question: Question from the lesson: Name the animals shown in the pictures which are reared in Sindh, and tell what we get from them.

Answer: Animals reared in Sindh: sheep and goats, cows and buffaloes, hens. From hens we get eggs and meat. From cows, buffaloes, goats and sheep we get milk. From milk, butter, lassi, yoghurt and cheese are made, and sweets are also made from milk. From the skins of animals, leather is made from which shoes, jackets and bags are made.

Question: Activity 3: (1) Name three animals which are reared in Pakistan. (2) Name three animals whose milk we drink. (3) Name three things made from milk which you eat. (4) Name three things made from animals' skins.

Answer: (1) Three animals reared in Pakistan: cow, buffalo and goat (hen and sheep are also reared). (2) Whose milk we drink: cow, buffalo and

goat. (3) Three things made from milk: butter, yoghurt and cheese (lassi is also drunk). (4) Three things made from skins: shoes, jackets and bags. Rearing animals is a big source of income for farmers.

Materials and Tools Used in Construction

Question: Activity 1: In front of the given sentence, write ✓ if it is correct and ✗ if it is wrong: (1) Metals are strong, hard and shiny. (2) Plastic is a natural thing. (3) Clay can be moulded easily. (4) Glass is used to make pipes. (5) Metals are hard, strong and shiny. (6) Wood is a natural thing. (7) Steel is a strong but light material. (8) Natural things, for example straw, are used as fuel. (9) Building materials can be divided into natural and man-made things.

Answer: (1) ✓ Metals are really strong, hard and shiny. (2) ✗ Plastic is not a natural thing; it is man-made. (3) ✓ Clay is soft; it can be moulded easily into any shape. (4) ✗ Pipes are not made from glass; pipes are made from plastic. (5) ✓ Metals are hard, strong and shiny (this sentence has come again in the book). (6) ✓ Wood is got from trees; it is a natural thing. (7) ✓ Steel is a strong but light material. (8) ✓ Natural things like straw are used as fuel. (9) ✓ Building materials can be divided into natural (wood, clay, sand) and man-made (cement, concrete, plastic).

Question: Activity 2 (A): Choose words from the word box and divide the given things into two columns — natural things (Column A) and man-made things (Column B). Word box: (clay, wood, glass, twigs, cement, sand, gravel, concrete, steel, leaves, plastic). Activity 2 (B): Identify the tools shown in the pictures and tell who uses each one: pipe wrench, hammer, mason's trowel, paint brush.

Answer: 2 (A) Natural things (Column A): clay, wood, sand, gravel, leaves/twigs. Man-made things (Column B): glass, cement, concrete, steel, plastic. 2 (B) Tools: Pipe wrench — used by a plumber (for fitting and repairing pipes). Hammer — used by a carpenter (for hammering nails).

Trowel — used by a mason (for applying mortar). Paint brush — used by a painter (for painting walls). Every craftsman has his own tools.

Question: Activity 2 (C): Write three useful properties of each thing: plastic, clay, glass, wood. (The properties of metals are given in the book: metals are strong, long-lasting and shiny.)

Answer: Plastic: (1) It is light, (2) it is strong, (3) it stops water (it is waterproof) — that is why pipes and buckets are made from it. Clay: (1) It is soft, (2) it moulds easily, (3) it becomes hard on drying — that is why pots and bricks are made from it. Glass: (1) It is transparent (light passes through it), (2) it is smooth, (3) things can be seen clearly through it — that is why windows are made from it. Wood: (1) It is strong, (2) it is light, (3) it can be cut easily — that is why doors, windows and furniture are made from it.

Question: Activity 3: Tell the names of the famous buildings and the places where they are: (i) Taj Mahal (ii) Shahjahani Mosque (iii) Quaid-e-Azam International Airport (iv) Burj Al Arab (v) HBL (Habib Bank) Plaza (vi) Eiffel Tower.

Answer: (i) Taj Mahal — Agra, India. (ii) Shahjahani Mosque — Thatta, Sindh, Pakistan. (iii) Quaid-e-Azam International Airport — Karachi, Pakistan. (iv) Burj Al Arab — Dubai, United Arab Emirates. (v) HBL Plaza — Karachi, Pakistan. (vi) Eiffel Tower — Paris, France. More famous places in the lesson: Shahi Fort Lahore, Pisa Tower Italy, Petronas Towers Kuala Lumpur (Malaysia), Masoom Shah's Minaret in Sukkur, Tower Market Hyderabad and Ranikot Fort District Jamshoro.

End-of-Unit 10 Exercise

Question: Question 1 (A): In the table, write the names of three products and the crops from which they are made. Question 1 (B): Name six big crops of Pakistan. Question 1 (C): Name three things made from wheat. Question 1 (D): Name three animals whose meat we eat. Question 1 (E): Name three things which we get from animals. Question 1 (F): Name three sweet dishes made with milk.

Answer: 1 (A): Flour/bread ⟶ wheat; cloth ⟶ cotton; sugar ⟶ sugarcane. 1 (B): Six big crops: wheat, rice, cotton, sugarcane, maize, millet (bajra). 1 (C): Three things made from wheat: flour, bread (roti), biscuits. 1 (D): Whose meat we eat: goat, cow, hen. 1 (E): Three things we get from animals: milk, meat, eggs. 1 (F): Three sweet dishes made with milk: kheer, ras malai, barfi. Farmers and animals are big sources of our food.

Question 2: Write the steps of making sugar from sugarcane in order in the boxes: Sugarcane ⟶ _____ ⟶ _____ ⟶ Sugar. Question 3: Complete the table of building workers: builder, carpenter, mason, painter, plumber — what work does each one do and which tools does each use?

Answer: field and sent to the mill; then the cane is crushed and its juice is taken out; the juice, is boiled and thickened from which jaggery is made; at the end it is cleaned and dried to make sugar.

Heat

Question: Activity (A): Observation in sunlight — stand outside the school in the sunlight: (i) How did you feel? Come back into the classroom: (ii) How do you feel now? (iii) Why is there a difference? Activity (B): Wet two towels: keep one outside in the sunlight and the other at a cool dark place in the classroom. Predict: (i) Which towel do you think will dry first? (ii) Why? After 10 minutes, observe: (i) Which towel is drier now? (ii) Why? (iii) How did heat affect the drying? (iv) Where did the towel's water go?

Answer: Activity (A): (i) In the sunlight I felt heat (warmth). (ii) In the classroom I felt comparatively cool and comfortable. (iii) The difference is because the sun is the real source of heat; where the sunlight falls directly, there is more heat. Activity (B) Prediction: (i) The towel kept in the sunlight will dry first. (ii) Because the heat of the sun quickly turns water into vapour. Observation: (i) The towel kept in the sun is drier. (ii) Because the sun's heat quickly evaporated its water. (iii) Heat made the process of drying faster. (iv) The towel's water became vapour and went into the air.

Question: Activity (p 136): From where are the people shown in the pictures getting heat? (Pictures: cooking on a wood stove; a gas heater; a coal iron; a wood fire.) More activity: For each picture (i) name the source of heat (ii) tell for what work the heat is being used: a pot on a gas stove; a BBQ grill; people sitting around a fire at night; a car filled with petrol; clothes drying in the sun; an electric iron.

Answer: First part: Wood stove — heat from wood; gas heater — heat from gas; coal iron — heat from coal; wood fire — heat from wood. Second part: (Picture 1) Pot on a gas stove — source: gas; work: cooking food. (2) BBQ grill — source: coal; work: roasting/cooking food. (3) People around a fire

at night — source: wood fire; work: keeping themselves warm. (4) Car filled with petrol — source: petrol; work: running the car. (5) Clothes drying in the sun — source: sun; work: drying clothes. (6) Electric iron — source: electricity; work: pressing clothes.

Question: Activity: The ice race — each group tries to melt an ice cube closed in a plastic bag by different methods: (i) Which group won? (ii) What did they do to win? (iii) Make a list of the methods used to melt the ice.

Answer: (i) The group won which rubbed the bag fast between their hands and kept it in the sun's heat (model answer). (ii) They melted the ice quickly with the warmth of their hands and by rubbing, and kept the bag at a warm place. (iii) Methods used: rubbing between hands, holding in warm hands, keeping in the sunlight, keeping near warm air/warm water. With heat, ice changes into water.

Light

Question: Activity (p 138): Look out of the classroom window — what can you see? What is the source of light in the daytime? Imagine a dark room — what do you see in it? What do you need to see the things of the room? Your friend enters holding a burning candle — can you now see the things of the room? Why? What are the other man-made sources of light?

Answer: Out of the window I can see trees, the sky, a road and buildings. In the daytime the source of light is the sun. In a dark room I cannot see anything clearly. To see the things of the room I need light. Yes, in the candle's light the things can now be seen, because light falls on the things and our eyes can see them. The other man-made sources of light are: bulb, tube light, torch, lantern (oil lamp) and table lamp.

Question: Questions from the lesson: (i) On a cold day people are sitting around a fire: in Picture 1 people are sitting at some distance from the fire and in Picture 2 women are sitting closer to the fire. Who will get more heat — the people of Picture 1 or Picture 2? And why? (ii) Children are reading sitting near and far from a tube light: in which picture is light helping them to read and why? Activity (p 139): Draw/describe two sources of light — one which helps us to see clearly in the day and one which helps at night. Activity (p 140): Name each source of light and say whether it is natural or man-made: bulb, torch, sun, burning match/fire, star, oil lamp/lantern.

Answer: (i) The people of Picture 2 will get more heat, because they are sitting closer to the source of heat (fire); the farther you are from the source, the less heat you will get. (ii) In Picture 1 the light is helping in reading, because in it the children are sitting near the tube light and more

light falls on the book. Activity (139): Day source — the sun: it lights the whole world in the day. Night source — bulb: it lights the room at night so that we can read and work. Activity (140): Bulb — man-made; torch — man-made; sun — natural; burning match/fire — man-made; star — natural; oil lamp/lantern — man-made. Remember: some animals make their own light, for example the firefly.

End-of-Unit 11 Exercise

Question: Question 1: Colour only those things which give light (out of 12 pictures): fire, bulb, sun, torch, traffic light, lighthouse, table lamp, TV, star, chair, desk and chair, pencils.

Answer: Things which give light (colour them): fire ✓, bulb ✓, sun ✓, torch ✓, traffic light ✓, lighthouse ✓, table lamp ✓, TV ✓ (light comes out of its screen), star ✓. Things which do not give light (do not colour): chair, desk and chair, pencils — these things do not give light themselves; they are only seen in the light of others.

Question: Question 2: (i) Which part (organ) of the body is used to see things? (ii) Can you see things easily in the day? How/why? (iii) Can you see things easily at night? Why?

Answer: (i) The eye — we see things with our eyes. (ii) Yes, in the day we can see things easily, because the sun's light falls on everything and our eyes can see them clearly. (iii) No, at night things cannot be seen easily, because at night light is less; to see at night we need man-made light like a bulb and torch.

Question: Question 3 (A): Make a table — out of the following pictures, which things give only light, which give only heat, and which give both heat and light: 1 sun, 2 TV, 3 tube light, 4 electric iron, 5 electric heater, 6 torch, 7 fire, 8 candle/lamp. Question 3 (B): Tell by picture numbers which are the natural sources of light and which are man-made sources.

Answer: 3 (A) Giving only light: 2 TV, 3 tube light, 6 torch. Giving only heat: 4 electric iron, 5 electric heater. Giving both heat and light: 1 sun, 7 fire, 8 candle/lamp. 3 (B) Natural source: 1 sun. Man-made sources: 2, 3, 4, 5, 6 and 8 (the fire at number 7 in the picture is a fire lit by man, so it

too will be counted among the man-made). Some sources give only light, some only heat, and some give both.

Question: Question 4: Go around the whole home with one of your parents and make a list of five sources of heat. If they remain "on" for some time, do they become hot? Question 5: Riddle "Recognise me! Who am I?" — I am a big light in the sky; at night you cannot see me; I help every growing thing. Question 6: Read and learn the poem "Light" — what does the poem tell?

Answer: Question 4: Five sources of heat in my home: (1) gas stove, (2) electric heater, (3) electric iron, (4) geyser (water heater), (5) oven/tawa. Yes, if they remain on for some time they become hot, so they should be used carefully. Question 5: I am the sun — the sun is the biggest light in the sky, it cannot be seen at night, and with its light and heat plants and all living things grow. Question 6: The poem tells that light is everywhere: the bulb's light flickers, the lights of torches shine, the sun's light shines, and the candle's light also flickers — light is very necessary for our life.

Learning from the Lives and Teachings of the Prophets

Question: Activity 1 (p 146): Write five noble qualities of Hazrat Muhammad Mustafa (PBUH) in the boxes. Activity 2: (i) Where was Hazrat Muhammad Mustafa (PBUH) born? (ii) When Allah Almighty granted prophethood to Hazrat Muhammad (PBUH), what was his blessed age? (iii) Why did the people of Makkah call Hazrat Muhammad (PBUH) "Sadiq" and "Amin"?

Answer: Activity 1: Five noble qualities: (1) Sadiq — always truthful, (2) Amin — trustworthy, (3) merciful — kind to everyone, (4) gentle — soft with children and elders, (5) forgiving — forgave others' mistakes (respectable and honest are also his qualities). Activity 2: (i) Hazrat Muhammad Mustafa (PBUH) was born in Makkah Mukarramah (in the year 571). (ii) At the time of prophethood his blessed age was 40 years. (iii) The people of Makkah called him "Sadiq" and "Amin" because he always spoke the truth and was very honest and trustworthy; people kept their trusts with him. In this lesson we learn that the Holy Prophet (PBUH) taught the worship of one Allah alone, respect for parents, gentleness with elders, love with children, good behaviour with neighbours and helping the poor. Lesson from the story: an old woman threw garbage on the Holy Prophet (PBUH) daily; when one day no garbage came, he asked about her, learned she was ill, visited her, asked about her health and forgave her — on this kindness the woman felt ashamed and became a Muslim. The book revealed to him is the Holy Quran, which is the last book.

Question: Activity about Hazrat Musa (AS): (i) Where was Hazrat Musa (AS) born? (ii) What were the rulers of Egypt called in the time of Hazrat Musa (AS)? (iii) Why did the cruel Pharaoh want to kill the children (boys) in Bani

Israel? (iv) Write three qualities of Hazrat Musa (AS) and for each one write one quality which you can develop in yourself.

Answer: (i) Hazrat Musa (AS) was born in Egypt. (ii) In that time the rulers of Egypt were called "Pharaoh". (iii) The astrologers had told Pharaoh that a boy born in Bani Israel would end his kingdom, so the cruel Pharaoh began to get the boys of Bani Israel killed. Hazrat Musa's mother put him in a box in the River Nile; Pharaoh's wife Bibi Asiya (a kind and merciful lady) raised him. When grown up, Hazrat Musa (AS) took his people out of Egypt; at the Red Sea Allah made a path and Pharaoh's army drowned. At Mount Sinai Allah spoke to Hazrat Musa (AS); the book revealed to him is the Taurat and his followers are called Jews. (iv) Three qualities: (1) Bravery — I too will not lose courage in difficulty. (2) Opposing cruelty — I will support the weak. (3) Trust in Allah — I will keep trust in Allah in every work. Some of the Ten Commandments: worship only one true God, do not worship idols, respect your father and mother, do not kill any human, do not steal or betray trust, do not put a false blame on anyone.

Question: Activity 1 about Hazrat Isa (AS): Tell five qualities of Hazrat Isa (AS) and for each one tell one work which you can do for others. Activity 2: Write one work each which you can do: (i) To be truthful (ii) To respect others (iii) To be punctual (iv) To be helpful to someone (v) To be honest and upright (vi) To be kind (vii) To be obedient.

Answer: Activity 1: Hazrat Isa (AS) was born in Bethlehem. Allah Almighty gave him the power to show miracles: he cured the sick, gave sight to the blind, raised the dead by Allah's command, and could feed thousands of people. Five qualities and my works: (1) Kindness — I will look after a sick classmate. (2) Forgiving — I will treat even an enemy with justice and forgiveness (he taught to leave the thought of an eye for an eye and to forgive). (3) Giving charity secretly — I will give to a poor person so quietly

that nobody knows. (4) Sharing — if I have two coats, I will give one to a poor person, and I will give extra food to a hungry person. (5) Being a great teacher — I will teach good things to others. The book revealed to him is the Injeel and his followers are called Christians. Activity 2: (i) To be truthful: I will always speak the truth, even if there is a loss. (ii) To respect: I will talk politely with elders. (iii) To be punctual: I will reach school and every work on time. (iv) To be helpful: I will help a classmate carry his heavy bag. (v) To be honest: I will return a found thing to its owner. (vi) To be kind: I will be gentle with animals and children. (vii) To be obedient: I will obey my parents and teachers.

Being Just (Being Honest)

Question: Read the story "Faiza" and answer the questions: (1) Tell three such works which Faiza used to do but they were not fair. (2) What did Faiza do to become fairer? (3) If your behaviour is not fair, what will you do?

Answer: (1) Faiza's three unfair works: at meal time she would take more food than her share; while talking she would not wait for her turn; in games she always wanted to come first and did not follow the rules. (2) After her mother explained to her, Faiza began to take only her share, began to wait for her turn, and began to play according to the rules and law. With this she herself began to feel good and her brothers and sisters also began to like her. (3) If my behaviour is not fair, I will say sorry and change my behaviour to become fair; by apologising and changing behaviour a person becomes better.

Helping Others

Question: Read the story "Ali": Ali went to the bazaar with his father. Question from the lesson: Have you ever thought how important waiting for your turn at home, school and classroom was, and why? Questions of the story "Seema and Ayesha": (i) When Ayesha needed Seema's toy, what did she do? (ii) When someone takes your things without asking you, how do you feel? (iii) What is the meaning of sharing (playing together)? (iv) When you need a thing and someone else has it, what can you do?

Answer: Ali's story: Ali helped his father by carrying the shopping bags home from the bazaar, and he picked up the things that had fallen from the bag of the man walking ahead and helped him. Every person needs help. Answer of the lesson: Waiting for your turn is very important, because it keeps order, nobody pushes, and everyone gets an equal chance — a turn is necessary in food at home, in a queue at school, and in speaking in class. Seema and Ayesha: (i) Seema took the new toy car without asking and started playing and did not give Ayesha even one turn (in the story Ayesha said that they should play together). (ii) I feel hurt and angry when someone takes my thing without asking. (iii) Sharing means: using your thing together with another person and being happy together. (iv) I will politely ask for that thing and use it by turns.

End-of-Unit 12 Exercise

Question: Question 1: Draw a picture in which show how you can help others. (Describe in words)

Answer: In my picture a boy is helping an old man cross the road and another boy is helping a fallen classmate to get up. A girl is sharing her food with her friend. By helping others everyone becomes happy and society becomes good.

Question: Question 2: Put a tick (✓) on the correct answer: (i) Asma and Sana have some cake; Asma cuts two pieces of the cake, one much bigger and one much smaller. What should Asma do? (a) Give the smaller piece to Sana (b) Give the bigger piece to Sana (ii) Salma and Maryam are playing a game; Maryam does not know that Salma is cheating and Salma wins; Maryam says "Salma, you did not play fairly, you cheated" — what should Salma do? (a) Insist that she won fairly (b) Apologise and invite to play again (iii) Kashif and his friend are playing football; Kashif gets the ball first — what should Kashif do? (a) Keep the ball with himself the whole time and try to score himself (b) Standing near the goal, "pass" the ball to the other players of his team.

Answer: (i) ✓ (b) — Asma should give the bigger piece to Sana; fairness and hospitality is that the other person is given the good share. (ii) ✓ (b) — Salma should apologise and invite to play again fairly. (iii) ✓ (b) — Kashif should pass the ball to his teammates; in a team game everyone should play together, not alone.

Question: Question 3: (i) Give three reasons why waiting for your turn is important. (ii) Describe three occasions when waiting for your turn is important. (iii) Make a "Please forgive me" (sorry) card and give it to the

person whom you have hurt.

Answer: (i) Three reasons: turns keep order and there is no quarrel; everyone gets an equal chance; waiting for your turn is respect for others and teaches patience. (ii) Three occasions: while standing in the school queue; while answering a question in class; in a game and at the time of distributing food. (iii) "Please forgive me" card (model): "Dear friend! I made a mistake; please forgive me. I will be careful in future. Your friend." — By giving the card, friendship becomes strong again.

Question 4: For each prophet given in Column (A), write in Column (B) three things which you learned from his life and teachings: (i) The Holy Prophet Hazrat Muhammad Mustafa (PBUH) (ii) Hazrat Musa (AS) (iii) Hazrat Isa (AS). Question 5 (A): Think of a time when you cheated someone or someone cheated you — describe: This was cheating (dishonesty) because _____; I felt _____; It could have been made fair in this way _____. Question 5 (B): Think of a work in which someone helped you — tell what you did. Question 6: Make a list of five things which you share with others — table: Things which I share / With whom do I share.

Answer: my friend broke the rule in the game and defeated me;, hurt and angry; it, that the game is played again according to the rules and the friend says sorry.

Question: Additional activity: Read and learn the poem about fairness and honesty — what does the poem tell?

Answer: The poem tells that we should be fair and honest. A fair person treats everyone equally, does not cheat anyone, and respects his turn. Such a person earns respect and a good name in the world. That is why we should be fair in every work.

Additional Activities

Question: 1. Draw your favorite fruit with seed. (Describe your favourite fruit)

Answer: My favourite fruit is the mango. The mango is sweet and juicy and it has one big seed in the middle. Mangoes are found in summer.

Question: 2. List the ways plants are useful for us. Complete the table: what plants give us and what we make from plants.

Answer: Plants give us: clean air, food, shelter for birds, shade for us and a beautiful environment. We make from plants: furniture, paper, cloth (from cotton), medicine and wood as fuel to burn. Plants are very useful for us.

Question: 3. Write the names of two fruit you eat that have seeds and of two fruit which have no seeds.

Answer: (a) Two fruits with seeds: (i) mango, (ii) guava. (b) Two fruits without seeds: (i) banana, (ii) pineapple. New plants grow from the seeds of fruits.

Question: 4. Take two leafy plants. Carefully remove the leaves from one plant. Place both plants in a sunny spot and water and care for them the same way over the next few weeks. Observe what happens to the two plants and write it down.

Answer: Observation: The plant whose leaves remained kept growing fast and stayed healthy. The plant whose leaves were removed became weak and in the end it died. Result: Yes, without the leaves, the plant can't make food and dies, because the leaves make the food for the plant.
