Social Studies

Class 4 (English Medium)

Solved Exercises — Sindh Textbook Board

12 lessons — 230 questions

Chapter 1: Globe and Map Skills

A. Answer the following questions

Question: 1. Define the terms: map and globe.

Answer: A globe is a model of the Earth. It is made in the shape of a ball and shows the continents and oceans on it. A map is a drawing of the whole Earth or a part of it, drawn on paper as it looks from above.

Question: 2. List three differences between a map and a globe.

Answer: First, a globe shows the Earth in three dimensions like a ball, while a map is flat and two-dimensional, drawn on paper. Second, a globe shows the true shape of the Earth, while a map can show one country or city in a bigger size. Third, a globe is difficult to carry and handle, while a map can be folded and carried easily.

Applying map skills to the map of Sindh

Question: 1. Look at the title of this map. What does it tell us about the map?

Answer: The title of this map is “Sindh Districts”. The title tells us that this map shows all the districts of the province of Sindh, their boundaries and their locations.

Question: 2. What does the legend show?

Answer: The legend explains the symbols used in the map. In this map the legend shows the international boundary, the provincial boundary, the district boundary and the River Indus with different symbols, which makes the map easy to read.

Question: 3. (i) Look at the map and suppose you are in district Shaheed Benazirabad. Identify a district in each of the four cardinal directions:

North, East, South and West.

Answer: To the north of Shaheed Benazirabad is Naushahro Feroze district and to the east is Sanghar district. To its south is Matiari district and to its west is Jamshoro district. All four districts touch Shaheed Benazirabad.

Question: 3. (ii) Identify a district in each of the four intermediate directions: Northeast, Southeast, Southwest and Northwest.

Answer: To the northeast of Shaheed Benazirabad is Khairpur district and to the southeast is Tando Allahyar district. To its southwest is Hyderabad district and to its northwest is Dadu district. The intermediate directions lie between two cardinal directions.

Question: 4. (i) Measure the distance between Jamshoro and Sanghar on the map and write it down.

Answer: When we measure with a ruler on the map, the distance between Jamshoro and Sanghar is about three and a half centimetres. This is only the map distance; the actual distance is found with the help of the scale.

Question: 4. (ii) Use the scale on the map and note down the actual distance between Jamshoro and Sanghar.

Answer: According to the scale of this map, one centimetre on the map is equal to fifty kilometres on the ground. So three and a half centimetres make an actual distance of about 175 kilometres. In this way the scale helps us find big distances from a small map.

Question: 5. Take a pencil box: (i) Draw the outline of the pencil box on your copy. (ii) Draw another one twice its size. (iii) Measure the length and width in both drawings.

Answer: When we place the pencil box on the copy and draw around it, we get its real-size outline, which is about 18 centimetres long and 6 centimetres wide. In the drawing of twice the size, the length becomes 36 centimetres and the width 12 centimetres. This teaches us that when a

drawing is made bigger, both the length and the width become double.

Question: 6. On an outline map of Pakistan, draw the boundary of the province of Sindh.

Answer: On the outline map of Pakistan, the boundary of Sindh is drawn in the south-eastern part of the country. Balochistan is to the west of Sindh, Punjab to the north, India to the east and the Arabian Sea to the south. After drawing the boundary, “Sindh” is written inside it so that the province can be seen clearly.

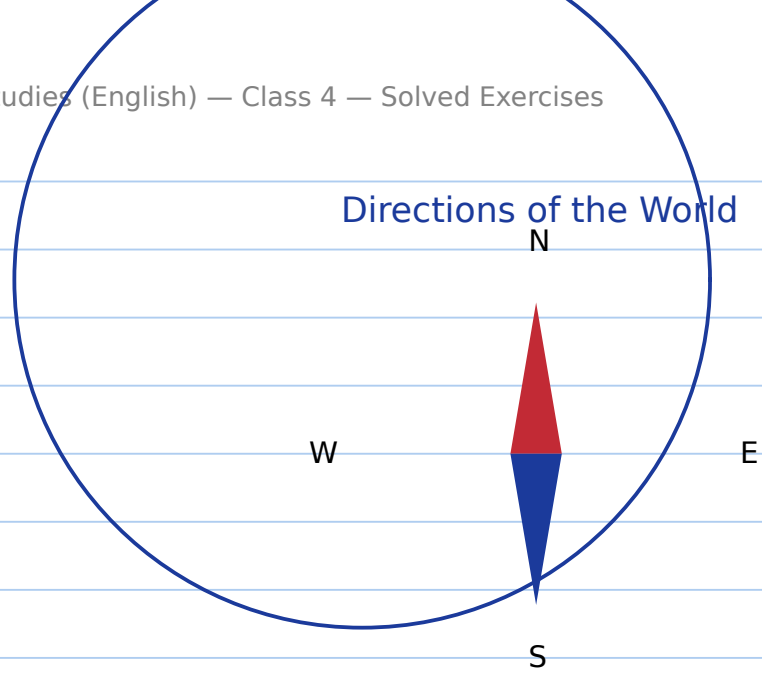

Question: 7. Draw a map of your classroom. Put all the elements: title, a legend or key with symbols and what they show, a compass rose and a scale on it.

Answer: On the top of the classroom map we write the title “Map of My Classroom”. In the legend we make different symbols for the teacher's table, the students' desks, the blackboard, the door and the windows, and the compass rose shows the north direction. In the scale we write that one centimetre of the map is equal to one metre of the classroom.

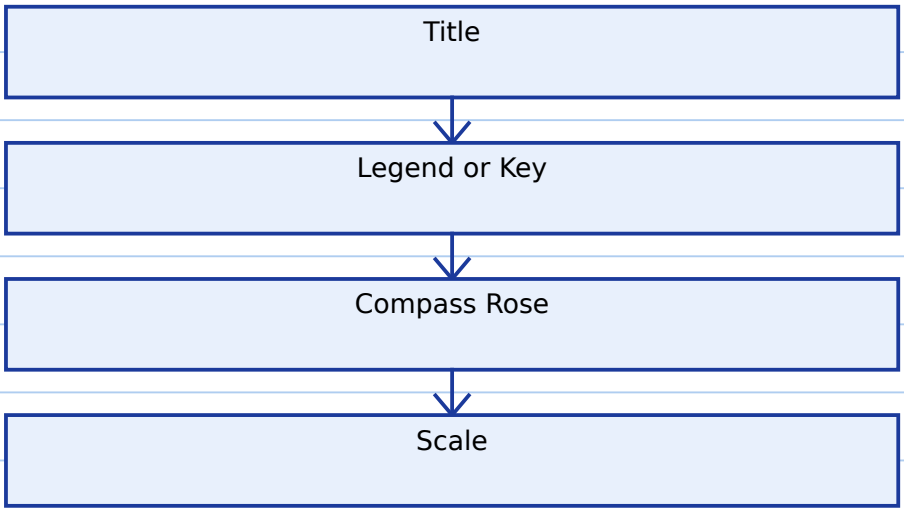

Question: 8. Draw a World map and name the continents and oceans on it.

Answer: On a world map we write the names of the seven continents: Asia, Africa, North America, South America, Antarctica, Europe and Australia. The big oceans are the Pacific Ocean, the Atlantic Ocean, the Indian Ocean, the Southern Ocean and the Arctic Ocean. Pakistan is in the continent of Asia and the Indian Ocean lies to its south.

Directions of the World

Elements of a Map

Chapter 2: The History of Sindh

A. Fill in the blanks

Question: (i) Look at the timeline given on page 23 and fill in the blanks: write the names and years of the dynasties that ruled Sindh.

Answer: The dynasties that ruled Sindh and their years are: the Soomras ruled from 1050 to 1351, the Samas ruled from 1351 to 1520, and different rulers ruled from 1520 to 1591. After them the Mughals ruled from 1591 to 1701, the Kalhoras from 1701 to 1783 and the Talpurs from 1783 to 1843.

(ii) Mehmood Ghaznavi conquered Sindh in _____.

Answer: 1026. He made Sindh a part of his empire, and after him the rule of Muslim rulers continued here.

(iii) The Kalhoras ruled Sindh from _____ to _____.

Answer: 1701, 1783. They made Hyderabad their capital and built the Pakka Qila (fort) there, which still exists today.

(iv) In 1591 Sindh was conquered by _____.

Answer: the Mughal Emperor Akbar. After this Sindh became a part of the Mughal Empire and Mughal governors began to rule here.

(v) The Talpurs took over the rule of Sindh from _____.

Answer: 1783. They took the government from the Kalhoras and ruled Sindh till 1843, when the British conquered Sindh.

(vi) The Sama dynasty ruled Sindh from _____ to _____.

Answer: 1351, 1520. They took the government from the Soomras and ruled for about 175 years; Jam Nizamuddin Samo was their famous ruler.

B. Answer the following questions

Question: 1. (i) Identify the effects of Muhammad bin Qasim coming to Sindh in 712, which last till today.

Answer: With the coming of Muhammad bin Qasim in 712, Islam began in Sindh and Sindh came to be called Bab-ul-Islam (the door of Islam). After this, mosques, madrasas and Islamic teachings spread here and local people accepted Islam in large numbers. Even today most people of Sindh are Muslims and the shrines of Sufi saints are centres of people's devotion.

Question: 1. (ii) Identify the effects of the British conquest of Sindh in 1843, which last till today.

Answer: After the British conquest of 1843, roads, railways, the telegraph and canals from the River Indus were built in Sindh. In 1853 the British fixed the script of the Sindhi language, which is still taught in schools today. Karachi became a big city and port, and big works like the Sukkur Barrage were also planned in that period.

Question: 2. Compare the Indus Valley Civilization with life in a village of Sindh today: give the similarities and differences.

Answer: The similarity is that in both periods people live near the river, do farming and build houses; the people of the Indus Valley grew cotton and wheat, and villagers grow the same crops today. The difference is that their houses were made of baked bricks and had a good drainage system, but they had no electricity, telephones or machines. Today's village has schools, hospitals, electricity and vehicles, but the cleanliness and planning of the old civilization is not seen everywhere.

Question: 3. Compare the life of the people of Sindh with the people of Punjab: the food they eat, the clothes they wear, the festivals they celebrate, the language they speak and the games they play.

Answer: The people of both provinces eat roti, rice and vegetables, wear

shalwar kameez and like to play cricket; these are the similarities. The difference is that the people of Sindh speak Sindhi, wear the Ajrak and the Sindhi cap and their famous game is Malakhro, while the people of Punjab speak Punjabi, like sarson ka saag and makai ki roti and their famous game is Kabaddi. Eids are celebrated in both provinces, but the Urs of Shah Latif is special in Sindh and Basant and Mela Chiraghan are special in Punjab.

Question: 4. Why did the British first come to Sindh?

Answer: The British first came to Sindh for trade, because they wanted to trade in the cloth and other goods of Sindh. In the Mughal period they were given permission to trade in Sindh, but later this permission was taken back. Slowly they increased their power and at last captured Karachi in 1839 and the whole of Sindh in 1843.

Question: 5. Tell how the people of Sindh have progressed after independence.

Answer: After independence the people of Sindh have made great progress in education, health and farming. Many universities including the University of Sindh, schools and hospitals have been opened, and more land has been brought under farming through the Sukkur Barrage and Kotri Barrage. Karachi has become the biggest city and trade centre of Pakistan, where the country's largest seaport is situated.

C. Make a table and read it

Question: Complete the given table: Historical Period, Social Problems, Solutions and Effects of solutions — for the Indus Valley Civilization.

Answer: In the Indus Valley Civilization the social problems were: floods of the river, storing food grain and arranging cleanliness. The people solved them by building strong houses of baked bricks, grain storehouses and a

drainage system of covered drains. The effects of these solutions can still be seen today: the ruins of Moen-jo-Daro show that a well-planned city makes life easy.

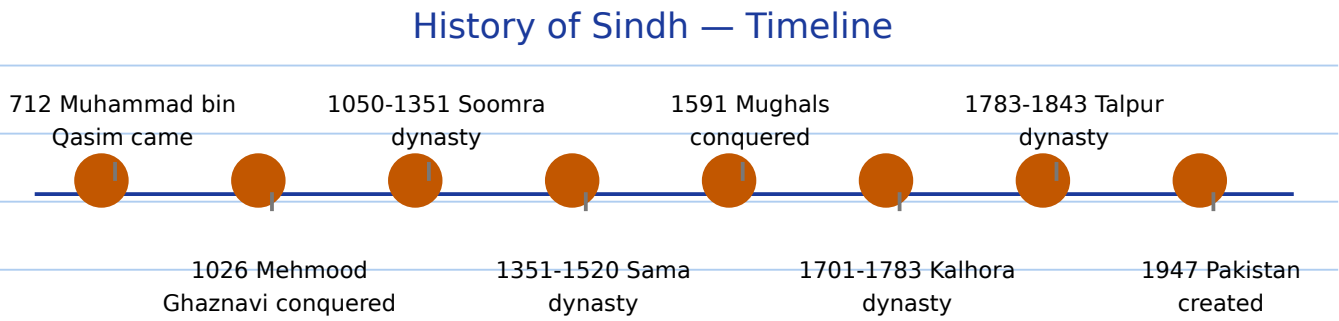

D. Practical work

Question: 1. Imagine that you are someone living in Moen-jo-Daro during the Indus Valley Civilization. Write a letter to a Class IV student living in Sindh today and tell him/her about your life.

Answer: Dear friend, I live in Moen-jo-Daro. Our houses are made of baked bricks, the streets are straight and clean, and every house has a bathroom and a well. We grow wheat and cotton near the River Indus and all the people take a bath in the Great Bath. I would be surprised to see vehicles and electricity in your city, but our city is also very clean and well planned.

Question: 2. Draw a timeline and use different colour pencils on it to show: the year Muhammad bin Qasim came to Sindh, the year Mehmood Ghaznavi conquered Sindh, the years of Soomra, Sama, Kalhora and Talpur rule, the British rule and the year Pakistan came into being.

Answer: On the timeline these years will be written: Muhammad bin Qasim came in 712, Mehmood Ghaznavi conquered Sindh in 1026, the Soomras ruled from 1050 to 1351 and the Samas from 1351 to 1520. After them the Kalhoras ruled from 1701 to 1783, the Talpurs from 1783 to 1843 and the British from 1843 to 1947, and Pakistan came into being in 1947. Using a different colour for each period makes the timeline easy to read.

Question: 3. Draw a timeline to show major events in the district you live in from 1970 to today.

Answer: On the timeline of my district, important years and events are written, such as a school or hospital being set up or a new road or bridge being built. For example: in 1970 a big flood came to our area, in 1990 electricity came and in 2015 a new school was opened. Writing these events in order after asking the elders helps us understand the history of our district.

Question: 4. (a) Draw a map of Sindh and locate Moen-jo-Daro, Debal (Thatta), Hyderabad, Miani and Karachi on it. (b) Identify why these places are important in the history of Sindh.

Answer: Moen-jo-Daro is near Larkana and is the famous city of the Indus Valley Civilization, while Debal (Thatta) is the port where Muhammad bin Qasim reached in 712. Hyderabad was the capital of the Kalhoras and the famous battle between the Talpurs and the British was fought at Miani in 1843. Karachi is a big seaport, which the British captured in 1839, and today it is the biggest city of Pakistan.

E. Inquiry

Question: 1. Find out about your family by writing down questions to ask your parents and looking at family photographs. Use the information to

write a story about your family.

Answer: From the questions asked to my parents I learn when and where they got married, where my grandparents lived and what work the family did. Old photographs show the houses, clothes and customs and tell us how life was lived in the past. Writing this information in order makes an interesting story of the family.

Question: 2. Find out the history of your village, town or city by interviewing your parents and elderly people. Write the history of the locality and draw a map of it showing some important places.

Answer: To find the history of the village we ask the elders when the village was settled and what important events happened here. On the map, important places such as the school, mosque, bazaar, well and playground are shown with symbols. In this way the story and the map together give us a complete introduction of our locality.

F. Extension Activities

Question: Begin collecting information about the province of Sindh in a file throughout the year and make a display of it in your school at the end of the year.

Answer: Throughout the year, newspaper cuttings, pictures and information about Sindh are collected in one file. At the end of the year they are divided into categories such as history, culture, famous personalities and places, and a display is arranged in the school. Inviting children of other classes to see the display increases everyone's knowledge.

Chapter 3: The Interaction Between the Land and the People of Sindh

A. Fill in the blanks

(a) The two famous lakes of Sindh are _____ and _____.

Answer: Manchar, Keenjhar. Manchar is one of the largest fresh water lakes of Pakistan and Karachi gets its water supply from Keenjhar.

(b) The hill near Hyderabad is _____.

Answer: Ganjo Takkar. It is a low rocky hill and people go there for outings.

(c) The Khirthar Mountains lie in the west of Sindh.

(d) The Indus Plains are irrigated through a network of _____.

Answer: canals. The canals taken out of the River Indus and the system of barrages carry water to the lands of the whole province.

(e) In the eastern part of Sindh lies the Thar Desert.

B. Answer the following questions

Question: 1. Name the physical features of Sindh.

Answer: Sindh has four physical features: the Khirthar Mountains in the west, the fertile plain of the River Indus in the middle, the Thar Desert in the east and the sea coast and delta in the south. The life and work of people is different in each feature area. Farming is done mostly in the plain, while in Thar people live by keeping cattle.

Question: 2. The area of the province of Sindh is 1,40,914 sq. km and the

population of Sindh is estimated to be 45 million. The area of the province of Balochistan is 3,47,190 sq. km and the population of Balochistan is estimated to be 0.82 million. Give two reasons for the difference in population.

Answer: The first reason is that Sindh has the fertile plain of the River Indus and plenty of water, so farming and jobs are more and more people live here. The second reason is that most of Balochistan consists of dry mountains and desert, where water and rainfall are less, so its population is small. A big city and seaport like Karachi also attracts people towards Sindh.

Question: 3. Define the following terms in your own words: (a) Population (b) Census (c) Migration.

Answer: (a) Population is the total number of people living in an area. (b) Census is the counting of all the people of a country or area by the government and collecting information about them. (c) Migration is the moving of people from one place to another to live there permanently, such as moving from a village to a city.

Question: 4. Why is a census conducted?

Answer: A census is conducted so that the government knows the population of the country and information about their age, education and work. With this information the government can plan schools, hospitals, roads and water facilities according to the population. A census is held after every ten years.

Question: 5. In your own words give the meaning of push and pull factors. Are people pushed away from or pulled to your area? Give three examples to support your answer.

Answer: Push factors are the conditions that force people to leave their area, such as unemployment, drought or flood. Pull factors are the

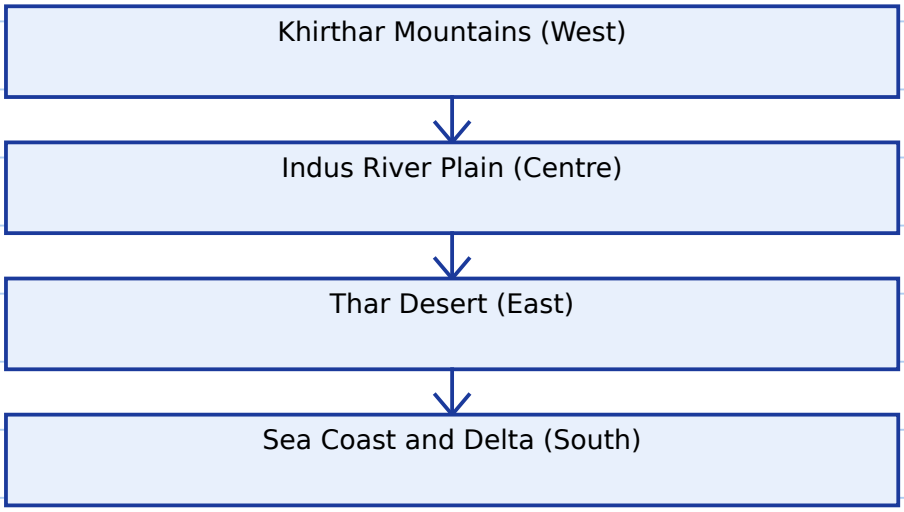

facilities that attract people to another place, such as jobs, good schools and hospitals. People are mostly pulled to our area, because here (1) jobs are available in factories, (2) there are good schools for children and (3) the hospital and bazaar are near.

C. Make a table

Question: Complete the table to show the location, importance and how people use each of the physical features of Sindh.

Answer: The Khirthar Mountains are in the west; they form the boundary with Balochistan and people graze cattle there and go for outings. The Indus Plain is in the middle; it is important for farming and people grow crops with canal water. The Thar Desert is in the east; people keep cattle there and store rain water. The sea coast and delta are in the south; people catch fish there and the Karachi port is used for trade.

Physical Features of Sindh

D. Practical Work

Question: 1. In small groups draw a map of Sindh on paper. Stick it on a hardboard. Using materials such as paper, clay and sand, make its physical features. Display it in your classroom.

Answer: On the map, high mountains are made with clay in the west, the green plain and river in the middle, Thar with sand in the east and the sea with blue colour in the south. Writing the name near each feature makes the map clear to understand. Displaying such a map in the classroom helps all the students remember the features of Sindh easily.

Question: 2. Make a poster to inform people of the need to keep picnic spots clean.

Answer: On the poster we write in big letters: “Keep picnic spots clean, they belong to all of us.” Pictures on it show how cleanliness saves us from mosquitoes and diseases and keeps the place beautiful. Putting the poster in the school and park teaches people to throw litter in the dustbin.

Question: 3. Look at the maps of the physical features and district population of Sindh and compare them: Why is Hyderabad thickly populated? Why is Dadu thinly populated?

Answer: Hyderabad is in the plain area near the river, where water, fertile land, business and jobs are plentiful, so its population is thick. A big part of Dadu is mountains and dry land, where water is less and jobs are also few, so its population is thin. This shows that people live where water and work are easily available.

Question: 4. Make a map of Sindh. Cut out straws to show the population of each district and stick them on the map near the name of the district.

Answer: On the map, a long straw is stuck where the population of a district is large and a short straw where it is small. Karachi and Hyderabad will have the longest straws and Tharparkar and Dadu will have short straws. Writing the name and population of the district near each straw makes the map easy to read.

E. Inquiry

Question: 1. Do an inquiry to find out about a problem (waterlogging and salinity, deforestation, water pollution) in your area. Share your findings with your class.

Answer: In the questionnaire, questions are asked about why the water in our area is salty, why trees are cut and where the dirty water goes. Collecting people's answers shows that waterlogging and salinity spoil the land and cutting trees increases heat. Sharing these findings in the class helps all the students think of solutions, such as planting more trees and keeping water clean.

Question: 2. Conduct a census of five houses in your neighbourhood. Identify the total number of people living in each house, their age, gender, education level, occupation and facilities of gas, electricity and water. Discuss how this information could be useful to your neighbourhood.

Answer: In the census of five houses we write the total people, the number of children and adults, educated and uneducated people and their occupations. We also write which houses have gas, electricity and clean water and which do not. This information is useful for the neighbourhood because it shows where facilities are missing, and schools, dispensaries and water supply can be planned.

F. Extension Activities

Question: Find out about the story of Noori Jam Tamachi. Write it down, draw pictures for the story and put it together to make a story book for the class library.

Answer: Noori was a girl of a fisherman family who lived on the bank of Keenjhar Lake, and Jam Tamachi was the ruler of Sindh. Jam Tamachi was so impressed by Noori's simplicity and good manners that he married her and gave her great honour. This story teaches us that a person is valued

by character, not by caste or wealth, and the story with pictures is made into a book and kept in the class library.

Chapter 4: Weather

A. Fill in the blanks

(i) The weather does not stay the same for long.

(ii) Thermometers are used to measure _____.

Answer: temperature. Temperature is told in degrees Centigrade or degrees Fahrenheit.

(iii) The anemometer consists of a set of cups attached to a rotating shaft.

(iv) The amount of water vapour in the atmosphere is known as _____.

Answer: humidity. When humidity is high, the air feels heavy and sticky.

(v) Common natural disasters are _____, _____, _____ and _____.

Answer: flood,, earthquake,, drought, cyclone. These disasters damage people's houses, crops and lives, so we should learn safety measures against them.

B. Answer the following questions

Question: 1. Define the term weather.

Answer: The day-to-day condition of the air of a place is called weather, such as today it is hot, cloudy or raining. Weather can change in a short time, while the general condition of an area over many years is called climate. Weather tells us what clothes we should wear and what work we should do today.

Question: 2. List the factors that affect weather.

Answer: The factors that affect weather include temperature, rainfall, the

speed and direction of wind, humidity and air pressure. The heat of the sun, clouds and a nearby sea also change the weather. All these together make the daily weather of a place.

Question: 3. How does the weather affect our dress, food and recreational activities?

Answer: In hot weather we wear light cotton clothes, take cold drinks and light food and play outside in the evening. In cold weather warm clothes, soup and hot food are liked, and in rain the outdoor games stop. In this way weather changes our daily life every day.

Question: 4. What is the importance of measuring, recording and forecasting the weather?

Answer: Measuring and recording the weather helps us forecast the weather of the coming days. With a forecast, farmers can decide about sowing and irrigation, and people can protect themselves before floods and cyclones. Ships, boats and journeys also become safe with weather forecasting.

C. Make and read tables

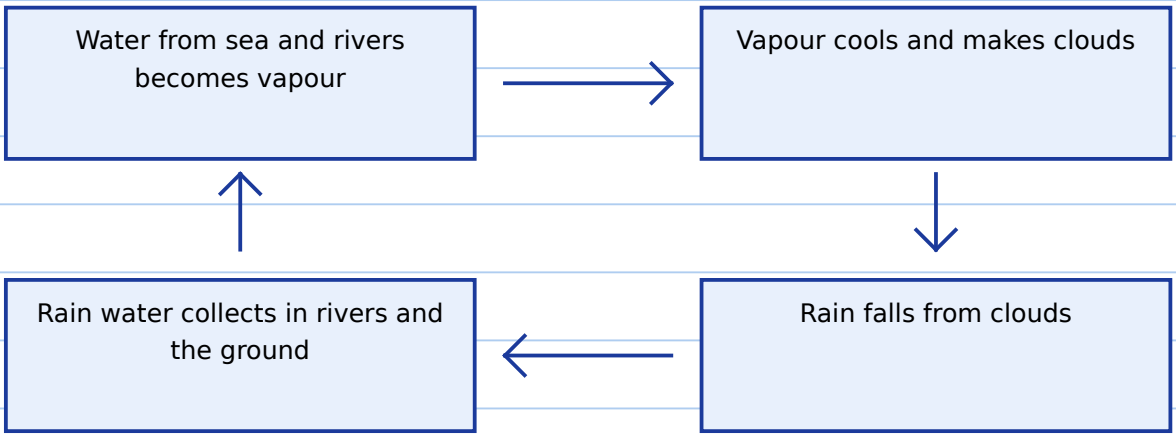

Question: 1. Complete the table of weather factors: factor that affects weather, what it tells us, instrument used to measure it and unit of measurement.

Answer: Temperature tells us the hotness or coldness of the air; the instrument is the thermometer and the units are degrees Centigrade or Fahrenheit. Rainfall tells us the amount of water that falls; the instrument is the rain gauge and the unit is the millimetre. Wind speed tells us how fast the wind blows; the instrument is the anemometer. Humidity tells us the amount of vapour in the air; the instrument is the hygrometer, and air pressure is measured with a barometer.

Question: 2. Look at the table. It shows the temperature and rainfall of Hyderabad and Lahore in July and December. Identify the differences. (Hyderabad: July 42 °C and 20 mm, December 06 °C and 02 mm; Lahore: July 45 °C and 80 mm, December 02 °C and 05 mm)

Answer: In July, Lahore is hotter than Hyderabad (45 °C) and it also has more rainfall (80 mm), while Hyderabad has 42 °C and only 20 mm of rain. In December both cities become cold, but Lahore is colder (02 °C) and Hyderabad is 06 °C. This shows that Lahore has stronger extremes of weather: more heat and rain in summer and more cold in winter.

The Water Cycle

D. Practical work

Question: 1. Draw the dress the people of your district wear, list the foods they eat, and the recreational activities they engage in during summer and winter.

Answer: In summer people wear light shalwar kameez, like lassi and cold drinks and play in the park in the evening. In winter people wear warm coats and sweaters, drink hot tea and soup and enjoy sitting in the sun during the day. Drawing both seasons shows clearly how weather and life are connected.

Question: 2. Draw and label a diagram of the water cycle.

Answer: In the diagram of the water cycle, the water of the sea and rivers is shown rising as vapour in the heat of the sun, labelled “evaporation”. Then clouds are formed, labelled “condensation”, and then “rain” is shown falling on the mountains and plains. At the end the water collects again in the sea through rivers, which is labelled “collection”.

E. Inquiry

Question: Identify three safety measures each to be taken during a flood, earthquake and cyclone.

Answer: In a flood: go to a high and safe place, do not drink dirty water and stay away from electric poles. In an earthquake: hide under a strong table, go to an open ground away from buildings and avoid stairs and lifts. In a cyclone: stay inside a strong house, keep doors and windows shut and stay away from the seashore. These measures protect life and property in every disaster.

F. Extension Activities

Question: Record the temperature for a month in your village, town or city. Identify the hottest day.

Answer: Every day at the same time the temperature is measured with a thermometer and written in a table with the date. At the end of the month, comparing all the readings shows that the day with the highest temperature is the hottest day. That day is marked in red colour and we tell how the weather was on that day.

Chapter 5: The Way We Live Together

A. Fill in the blanks

1. The Ajrak is traditional to _____.

Answer: Sindh. The Ajrak has been made in Sindh for centuries and it is presented to guests with honour.

2. Punjabis like to eat _____ and _____.

Answer: sarson ka saag, makai ki roti. This is the famous dish of Punjab, which is eaten especially in winter with butter.

3. The national game of Pakistan is _____.

Answer: hockey. Pakistan has won many World Cups and Olympic medals in hockey, so hockey has the status of the national game.

4. Two famous festivals of Khyber Pakhtunkhwa are _____ and _____.

Answer: the Shandur Polo Festival, the Kalash Chilam Joshi Festival. Polo is played at Shandur on the highest ground in the world, and Chilam Joshi is celebrated in the Kalash valley in the spring season.

5. Two famous Sindhi sufi poets are _____ and _____.

Answer: Shah Abdul Latif Bhittai, Sachal Sarmast. Both of them gave the message of peace, love and humanity in their poetry.

B. Answer the following questions

Question: 1. Define the word culture.

Answer: Culture is the way of life of a particular group of people living in a particular place. It includes their language, dress, food, games, festivals and customs. Culture keeps changing with time and passes from one generation to the next.

Question: 2. Describe the culture of the group you belong to.

Answer: The people of my group speak the Sindhi language and wear shalwar kameez; the men also wear the Ajrak and the Sindhi cap. We eat rice, fish and seasonal vegetables and sing folk songs at weddings. Our children play Malakhro and cricket, and respecting the elders is an important part of our culture.

Question: 3. Identify the similarities and differences between two groups of people (two cultures) living in Sindh.

Answer: The Sindhi-speaking and Urdu-speaking groups living in Sindh are similar because both groups celebrate Eids together, wear shalwar kameez and like hospitality. The difference is that the home language of one group is Sindhi and of the other is Urdu, and their wedding customs and special foods are a little different. Living together of both groups makes the culture of Sindh colourful.

Question: 4. List the factors that influence culture, give an example of each.

Answer: The factors that influence culture include climate and history. For example, because of the hot climate of Thar, people wear light and loose clothes, while warm clothes are worn in cold areas. An example of the effect of history is that in Sindh, fairs and Urs are celebrated because of the Sufi saints, and an old tradition like the Ajrak is still alive today.

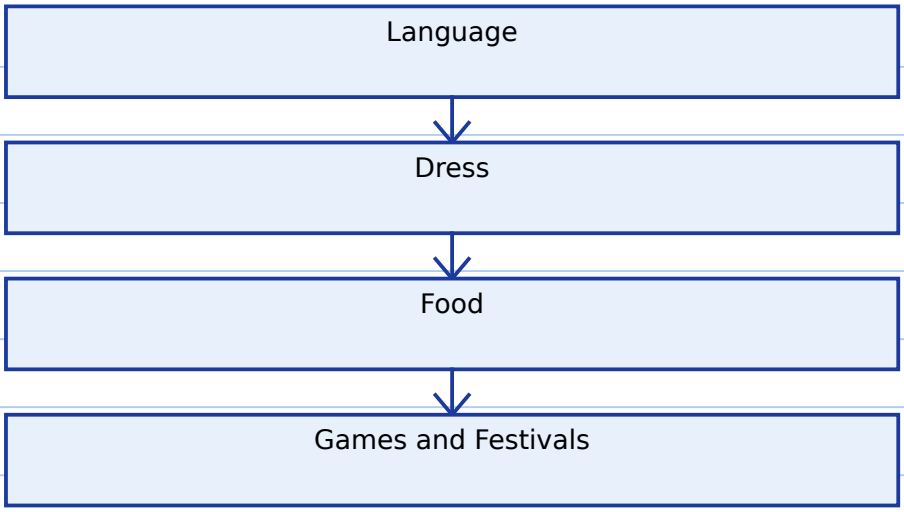

C. Make and read tables

Question: In the given table, compare the culture of different provinces of Pakistan: language, dress, food, sports and festivals.

Answer: Similarities: in all the provinces people mostly wear shalwar kameez, celebrate Eids and like cricket. Differences: Sindh is special for the Sindhi language, Ajrak and Malakhro; Punjab is special for the Punjabi

language, sarson ka saag and Kabaddi. Balochistan is special for the Balochi language and Balochi embroidered dress, while Khyber Pakhtunkhwa is famous for the Pashto language, Peshawari chappal and the Attan dance.

Parts of Culture

D. Practical Work

Question: Ask students to bring in something that shows their culture; food, a dress, a game or a musical instrument. Ask each student in turn to come up and talk about the item they have brought.

Answer: One student can bring an Ajrak and tell that the Ajrak is the identity of Sindh and is presented to guests with honour. Another student can bring a rabab or a flute and tell that this instrument is played in our fairs. In this way every child shows an item of his culture, gives new information to the whole class and learns to respect the culture of others.

E. Inquiry

Question: Collect information about a family living in another country. Compare the way your family lives with that family: write five sentences to show how both families are similar and five sentences to show how they

are different.

Answer: Sentences of similarity: both families send their children to school; both eat food together; both respect their elders; both celebrate special days; both help each other. Sentences of difference: we wear shalwar kameez, they wear trousers and shirts; we eat roti with our hands, they eat with fork and spoon; our language is Sindhi, their language is English; we live in a joint family, they live in a small family; our food is spicy, their food is plain.

Chapter 6: The Provincial Government

A. Fill in the blanks

1. The provincial government has three branches.

2. The executive branch carries out the _____.

Answer: laws. The Chief Minister and the ministers are the heads of this branch and the government departments work for the service of the people.

3. The main work of the judicial branch is to interpret the law.

4. Laws are made by the _____.

Answer: legislature (the Provincial Assembly). The members of the assembly are the elected representatives of the people and they make new laws and change old ones.

5. The courts that deal with crimes are called _____.

Answer: criminal courts. Cases of theft, fighting and other crimes are decided in them, while cases of property and money are heard in civil courts.

B. Answer the questions

Question: 1. List three school rules.

Answer: Three school rules are: first, come to school on time every day in a clean uniform. Second, listen to the teacher carefully and do not make noise in the class. Third, do not damage the school building and things and keep the school clean. Following these rules makes discipline and a good atmosphere in the school.

Question: 2. Name the three branches of government. What is the main task of each branch?

Answer: The three branches of government are: the legislature, the executive and the judiciary. The legislature makes laws, the executive carries out the laws and runs the country, and the judiciary interprets the law and gives justice. Because the work of the three branches is separate, the government runs well.

Question: 3. In steps tell how the provincial government is formed.

Answer: First step: the people vote and elect the members of the Provincial Assembly. Second step: the party with the most members forms the government and its leader becomes the Chief Minister. Third step: the Chief Minister makes his team of ministers and takes oath from the Governor. In this way the provincial government is formed through elections.

Question: 4. Describe the work of the executive branch of the government.

Answer: The work of the executive branch is to carry out the laws and run the affairs of the province. The Chief Minister is its head and different departments, such as education, health, police and agriculture, do the daily work. These departments run schools and hospitals, keep peace and provide facilities to the people.

Question: 5. What is the work of a judge? Why is the work of a judge important?

Answer: The work of a judge is to hear cases in the courts and give decisions according to the law after listening to both sides. The work of a judge is important because through it the innocent get justice and the criminal gets punishment. If a judge does not decide honestly, injustice and unrest will spread in society.

Question: 6. List three rights you have as a citizen of Pakistan. State one

responsibility for each right.

Answer: The first right is to get education, and with it the responsibility is to go to school regularly and pay attention to studies. The second right is the facility of health, and the responsibility is to keep hospitals and public places clean. The third right is to vote and give our opinion, and the responsibility is to respect the law and pay taxes. Rights and responsibilities together make a good citizen.

Question: 7. Why is it important to fulfill your responsibilities?

Answer: It is important to fulfill our responsibilities because if every person does not do his duty, dirt, disorder and injustice will spread in society. A responsible citizen keeps cleanliness, obeys the law and respects the rights of others. When all people fulfill their responsibilities, the area becomes good and peaceful.

Question: 8. List three things you can do to make your province a better place.

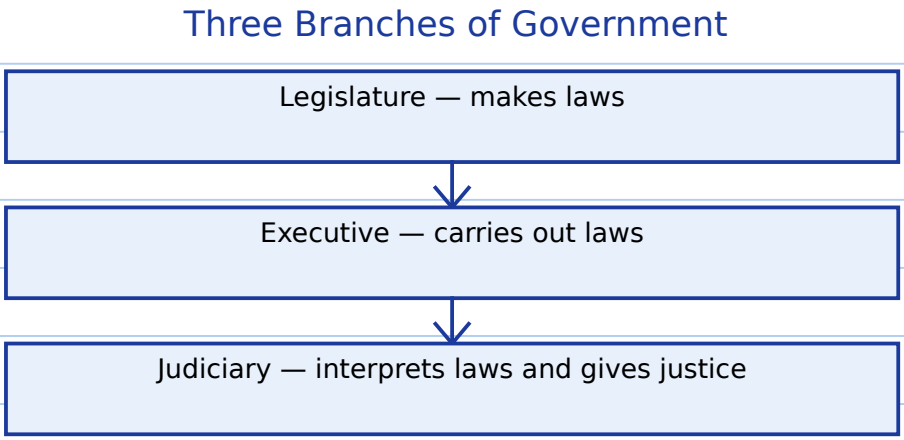

Answer: First, I will keep my school and neighbourhood clean and throw litter in the dustbin. Second, I will plant trees and look after them so that the environment stays good. Third, I will not waste water and electricity and will explain the same to other children. These small actions together take the province towards great improvement.

C. Make and read tables

Question: Collect and write the correct information in the given table: Branch, who are the members, what do they do and what is the importance of their work.

Answer: The members of the legislature are the elected representatives (MPAs); they make laws, and their work is important because the province cannot run without laws. The members of the executive are the Chief

Minister, ministers and government officers; they run the government and carry out the laws. The members of the judiciary are judges; they decide cases and give justice, which keeps people's rights safe.

D. Practical Work

Question: 1. In small groups, cut out three big branches from card paper to make a tree. On each branch write the name of one branch of government, the main work it does and give an example.

Answer: On one branch of the tree we write “Legislature” with the example that the assembly made the traffic law. On the second branch we write “Executive” with the example that the police carry out this law. On the third branch we write “Judiciary” with the example that the judge punishes the one who breaks the law. With such a tree the work of all three branches is understood at a glance.

Question: 2. You are on the playground and you find a piece of trash. Draw a picture of what a good citizen would do.

Answer: A good citizen picks up the trash and puts it in the nearest dustbin, as shown in the picture. He does not throw litter on the ground and also advises other children to keep cleanliness. With this habit the playground stays clean and all children stay healthy.

E. Inquiry

Question: Find out about two people, one male and one female, in your district who did something that benefitted others. Prepare a fact file on them by filling in the blanks.

Answer: Example about a male: his name is Dr Adeeb Rizvi; he set up the SIUT hospital in Karachi, where kidney patients are treated free of cost and thousands of lives have been saved. Example about a female: her name is Bilquis Edhi; she made homes for orphan and helpless children and served the poor all her life. In the fact file of both, the name, birth, education, profession and the work done for others are written.

Chapter 7: Means of Communication

A. Fill in the blanks

(i) We can speak face-to-face or on the phone.

(ii) Now a days, most people use mobile phones to talk to others.

(iii) We send and receive letters through the _____ and by _____.

Answer: post office, postman. The postman delivers letters from door to door and the post office sends letters to different cities.

(iv) The internet has made communication very easy.

B. Answer the following questions

Question: 1. List the different means of communication.

Answer: The means of communication include speaking face-to-face, letters, the telephone, the mobile phone, fax, the internet and e-mail. Besides these, newspapers and magazines, radio and television are also means of sending messages. Every means is different in its speed and reach.

Question: 2. Explain the ways in which computers have made communication easier.

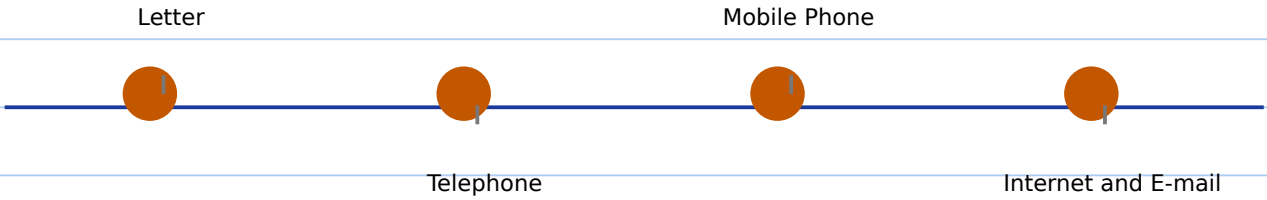

Answer: With computers and the internet we can send e-mail, which reaches another country in seconds. With Skype and video calls we can also see the person we are talking to, and through social media we can stay in touch with friends all the time. In this way the computer has ended the delay of letters and made communication fast and cheap.

C. Make and read tables

Question: List the means of communication and write two advantages and two disadvantages of each.

Answer: Letter: advantages — it is cheap and can be kept as a proof; disadvantages — it takes days to reach and can be lost on the way. Telephone: advantages — talk is instant and we get a reply at once; disadvantages — it does not work without electricity or signals and it costs money. Internet: advantages — fast contact with the whole world and pictures can also be sent; disadvantages — wrong use wastes time and affects health.

Development of Communication

D. Practical Work

Question: 1. Design a postcard. Draw a picture on one side, write a message to a friend on the other side and post it.

Answer: On one side of the postcard a picture of a beautiful place of our area, such as a river or a garden, is drawn. On the other side we write greetings to our friend and a short message about school and games, along with the friend's name and address. Then the card is posted from the post office and reaches the friend in a few days.

Question: 2. Make a personal telephone directory. Write the names of your friends in alphabetical order and write their telephone number next to

them.

Answer: In the directory, names are written in alphabetical order so that any name can be found quickly. In front of every name, that friend's telephone number is written in clear writing. Keeping such a directory at home makes it easy to make a call in time of need.

Question: 3. Find out the telephone numbers of the emergency services in your area: Police, Fire Brigade, Hospital, Ambulance. Make a list of them and put it up in a place in your home where everyone can see it.

Answer: Among emergency numbers, 15 for police, 1122 for rescue and ambulance and 16 for the fire brigade are important numbers; the hospital number is found from the local hospital. Each number is called to check that it is correct, then the list is put near the door or next to the telephone. Such a list helps in calling help at once in an emergency.

E. Inquiry

Question: With the help of your teacher, parents, older brothers and sisters and the internet find out the history of the mobile phone or the computer. Make a timeline giving the date of its invention and developments till today.

Answer: The important stages in the timeline of the computer are: the first big computer was made, then small personal computers came and then laptops and tablets became common. In the timeline of the mobile phone we show the first big phone, then the small mobile and today's smartphone, which also has the internet. Such a timeline shows that inventions became smaller, faster and cheaper with time.

Chapter 8: Getting Along With Others

A. Fill in the blanks

(i) Conflict is a normal and natural part of our lives.

(ii) Communication is a constructive response to _____.

Answer: conflict. When we talk with each other, misunderstanding ends and the conflict is solved before it grows.

(iii) Conflict can be resolved in constructive ways.

(iv) In mediation, the person asked to help is called a _____.

Answer: mediator. The mediator listens to both sides and gives such a decision which is acceptable to both.

(v) There are three main causes of conflict.

B. Answer the following questions

Question: 1. Define the terms peace and conflict.

Answer: Peace means calm, safety and everyone living together with love, where there is no quarrel and no fear. Conflict means a difference of opinion and unhappiness between two or more people over something. Conflict is not bad in itself; our response makes it constructive or destructive.

Question: 2. List three possible consequences of dealing with conflict constructively in society.

Answer: The first consequence is that friendship and trust increase among people and they learn to solve problems together. The second

consequence is that peace remains in society and work continues calmly. The third consequence is that children learn good behaviour from elders and become responsible citizens in the future.

Question: 3. List three possible consequences of dealing with conflict destructively in society.

Answer: The first consequence is that enmity and fear spread among people and friendships break. The second consequence is that people are injured by fighting and property is damaged. The third consequence is that unrest increases in society and the work of schools and businesses stops.

Question: 4. Name the 6 ways of resolving conflict.

Answer: The six constructive ways of resolving conflict are: (1) communicate — talking with each other, (2) negotiate — sitting together and deciding, (3) mediate — taking the help of a mediator, (4) arbitrate — accepting the decision of an appointed person, (5) litigate — going to court, and (6) legislate — making laws. Children generally use the first three ways, because they are easy and give a quick solution.

Question: 5. Identify three ways to create peace: (i) at home, (ii) at school, (iii) in your community.

Answer: (i) At home: listen to each other calmly, do not raise your voice in anger and share the housework. (ii) At school: stay in the line, share things with classmates and tell the teacher in case of a quarrel. (iii) In the community: respect the neighbours, keep public places clean and use mediation in a conflict. In this way peace can be created everywhere.

C. Make and read tables

Question: Complete the table given: Feelings, how I behave, and behaviour is positive or negative.

Answer: When happy, I laugh and share my joy with everyone — this

behaviour is positive. When angry, if I stay quiet and speak calmly the behaviour is positive, but shouting is negative. When jealous, feeling jealous of another's success is negative and sharing his joy is positive. When peaceful, living with love with everyone is positive, and when hurt, telling the problem to the elders instead of crying is positive behaviour.

D. Practical Work

Question: 1. Divide the class into groups of 4. Give each group one of the conflict situations and one conflict resolution strategy (communication, negotiation, mediation and arbitration) to be used to resolve it. Write a role play depicting the conflict and its resolution.

Answer: The groups act out each situation and solve the conflict with the given strategy. For example, in the conflict over the colour pencils, through communication both children agree to use the pencils turn by turn. With such practice students learn that instead of fighting, every problem can be solved by talking.

Question: Situation 1: Gul and Kavita are arguing over who would get to use the box of colour pencils.

Answer: Through communication both children listen to each other and decide that first Gul will fill colours in the picture and then Kavita will use the pencils in her turn. If needed, both can sit together and take different colours from the same box. In this way the work of both is done without a quarrel.

Question: Situation 2: Rehan, Aslam and Mir are responsible for coming up with a topic for a class debate. Each has a different idea and they can't decide which topic to go with.

Answer: Through negotiation, all three tell their own topics and count their benefits. Then they agree together on the topic which everyone likes and

on which speaking is easy. Taking a vote is also a good solution, by which everyone will accept the decision of the majority.

Question: Situation 3: Seema is upset because her best friend, Rehana, ignored her in break time and was sitting with Shazia.

Answer: Seema should talk openly with Rehana and tell her that she felt bad at being ignored. Rehana can listen and say sorry and tell her that she sat with Shazia only to help her for a while and the friendship has not ended. Such clear talking ends the misunderstanding and the friendship becomes stronger than before.

Question: Situation 4: Mehreen has accused Sheeba of cheating from her during a Social Studies test.

Answer: Through mediation, the teacher listens to both girls carefully and asks the witnesses. If Sheeba really cheated, she should say sorry and promise not to do so again; if the accusation is wrong, Mehreen will have to say sorry. Both have to accept the teacher's decision, which keeps honesty in the class.

Question: Situation 5: Zia and Gul are playing on the same cricket team but they both want to bat. They start yelling at one another.

Answer: Through arbitration, the captain of the team or the teacher decides who will bat first. For example, a toss can be made, or the one who batted less in the last match can be given the first chance. Both should accept the decision, because the success of the team lies in cooperating with each other, not in yelling.

Question: Situation 6: Maria is being teased by a few children in her class and she hates it. She complains to her teacher about it.

Answer: Maria's complaining to her teacher is the right step, because teasing is also a conflict which should be solved with the help of elders. The teacher explains to the teasing children that hurting anyone is a bad

thing and makes them say sorry. In this way Maria feels safe and the atmosphere of the class becomes good for everyone.

E. Inquiry

Question: 1. Find out from two adults their views on peace. Ask: What words or images come to mind when you hear the word peace? How would you define peace? Name two peace loving people and what characteristics make them peace loving. What do you think a world at peace would look like? What are some of the things you do to make the world more peaceful?

Answer: Hearing the word peace, the words calm, love and smiles and the picture of a safe home come to mind. Peace is defined as: where all people live with love, without fear and quarrels. Two peace loving people are Quaid-e-Azam Muhammad Ali Jinnah and Abdul Sattar Edhi; Jinnah worked through law and justice and Edhi served the poor all his life. In a peaceful world there will be no war and no quarrel, all children will go to school and everyone will respect each other. To make the world more peaceful we should speak the truth, help others and solve quarrels by talking.

Question: 2. Identify one conflict in your community. With the help of the adults: (i) describe the conflict, (ii) identify the consequences of the conflict, (iii) identify what can be done to resolve the conflict constructively.

Answer: (i) In our neighbourhood a quarrel took place between two families at the water tap, because both wanted to fill water at the same time. (ii) The consequence was that both families stopped talking to each other for some days and there was unrest in the neighbourhood. (iii) The constructive solution is that the elders of the neighbourhood become mediators and fix a time for each family to fill water, and both families say

sorry to each other and restore friendship.

Chapter 9: Goods and Services

A. Fill in the blanks

(i) People buy, use, and exchange _____ and _____.

Answer: goods, services. We buy food items and eat them, and we use the services of the doctor and the teacher.

(ii) A _____ is a physical item that can be bought, touched, and used.

Answer: good

(iii) A service is the action done for people who pay for it.

(iv) Three goods which I see around me in my classroom now are _____, _____ and _____.

Answer: a book,, a desk, a blackboard. All three goods are used in our studies every day.

(v) Two services which I use are _____ and _____.

Answer: education, health care. In school the teacher gives me education and in illness the doctor treats me.

B. Answer the following questions

Question: 1. What is a 'good'? Name 2 goods you use in your daily life.

Answer: A good is a physical thing which we can buy, touch and use. Two goods used in daily life are a toothbrush and a book. With a toothbrush we clean our teeth and from a book we read and get knowledge.

Question: 2. What is a 'service'? Name 2 services you use in your daily life.

Answer: A service is the work which a person does for others and takes its price. Two services used in daily life are the service of the barber and the service of the tailor. The barber cuts our hair and the tailor makes our

clothes.

Question: 3. Differentiate (differences) between a good and a service.

Answer: A good can be touched and can also be taken home and kept, such as a book and a chair. A service cannot be touched or kept; it is received only at the time when the work is done, such as the teaching of a teacher and the treatment of a doctor. The price of goods depends on their making and the price of a service depends on the skill of the worker.

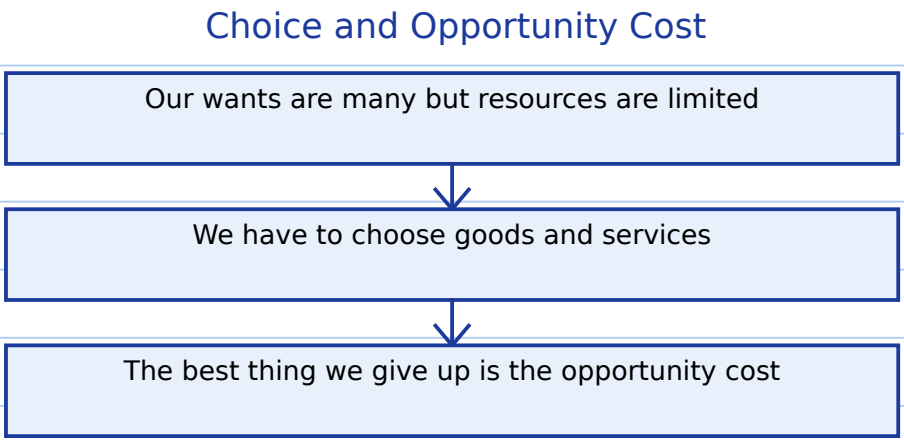

Question: 4. You watched your favourite show instead of studying for a spelling test. Name the choice and the opportunity cost.

Answer: My choice was to watch my favourite show, because I like that show very much. The opportunity cost was that I gave up preparing for the test, due to which my marks may be low. From this I learnt that the important work should be done first and recreation afterwards.

C. Make and read tables

Question: Write the role / functions of the following in the given table with the help of your class teacher / parents: Factory, Shopkeeper, Consumer, Producer, People, Hospital.

Answer: A factory makes goods in large quantity, such as cloth and shoes. A shopkeeper buys goods and sells them to people, and a consumer buys goods of his need. A producer makes a new thing from raw material and people are the users of these goods. A hospital gives the service of health to sick people and doctors treat them there.

D. Practical work

Question: 1. Draw and colour pictures of any three services which you use every day at home.

Answer: Three services used at home are electricity, water and gas; their pictures can be drawn as a bulb, a tap and a stove. With electricity the bulb lights and the fan runs, from the tap we get water and on gas food is cooked. Without these services the daily work of the home would become very difficult.

Question: 2. Draw and colour pictures of any three goods which you use everyday at school.

Answer: Three goods used at school are a book, a desk and a bell; their pictures are drawn and filled with beautiful colours. From the book we read, on the desk we sit and write, and from the bell we know the start and end of a period. These goods are very necessary for studies at school.

E. Inquiry: Goods and Services We Use Everyday

Question: Make a list of every single thing you have done since yesterday morning. Write these events in order. Identify which goods you used and which services you used during the day.

Answer: In the morning I washed my face with a toothbrush and soap

(goods), then I ate roti and tea (goods) and used the service of the school van. At school I used a book, copy and pencil (goods) and received the service of the teacher's teaching. Coming home, I used the services of electricity and water and used a ball (good) in the game. In this way our every day is full of goods and services.

Chapter 10: The Holy Prophet Muhammad (PBUH)

A. Answer the following questions

Question: 1. When and where was the Holy Prophet Muhammad (PBUH) born?

Answer: The Holy Prophet Muhammad (PBUH) was born on 12th Rabi-ul-Awwal, 20th April 571 A.D. in Makkah. He belonged to the Banu Hashim family of the Quraish tribe, and his father's name was Abdullah and his mother's name was Amina. His grandfather Abdul Muttalib named him “Muhammad”, which means the one who is praised again and again.

Question: 2. Why did the people of Makkah call him “As-Sadiq” and “Al-Amin”?

Answer: From his childhood he always spoke the truth and never broke anyone's trust. In his youth he was so honest in trade that people kept their valuable things with him as a trust. Because of these habits the people of Makkah called him “As-Sadiq”, meaning the truthful, and “Al-Amin”, meaning the trustworthy.

Question: 3. Why did the people of Makkah oppose the Holy Prophet (PBUH)?

Answer: When he invited the people to leave idol worship and worship the one Allah, the disbelievers of Makkah started opposing him. They did not want to leave the custom of their forefathers and they feared that with the new religion their leadership and benefits would end. For this reason they gave him and his companions many hardships.

Question: 4. What message do we get from the last sermon of the Holy Prophet (PBUH)?

Answer: From the last sermon we get the message that all Muslims are brothers of one another and no one is greater than another because of race or colour. He said that he was leaving among us the Book of Allah (the Quran) and his Sunnah; whoever holds fast to them will never go astray. Along with this he advised us to pay the rights of others and not to be cruel to anyone.

Activities

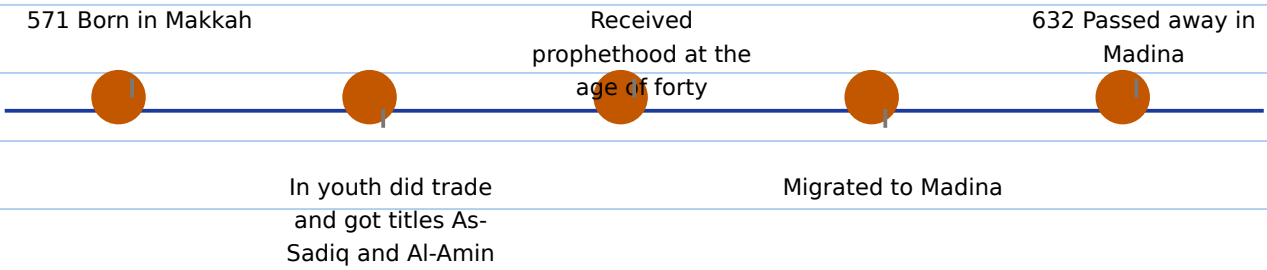

Question: 1. The teachings of the Holy Prophet (PBUH) are given in paragraph 7 of the chapter. How do you act upon each of them?

Answer: His teachings include speaking the truth, honesty, respecting elders and helping the poor. I always speak the truth, do not take anyone's thing without permission and help my parents in housework. Behaving well with neighbours and being kind to animals are also ways in which I act upon his teachings.

Question: 2. The Holy Prophet (PBUH) lived a simple life. Choose one way from his life to make your own life simple, try to do it and keep a record of your efforts in your diary.

Answer: I have chosen this way to make my life simple: I will do my own work myself and will not waste money. He used to mend his own clothes and lived on whatever food was available. Every week I will write in my diary which works I did myself and how much wasteful spending I avoided.

Life of the Holy Prophet Muhammad (PBUH)

B. Practical Work

Question: 1. Find Makkah and Madina on the map of Saudi Arabia.

Answer: On the map of Saudi Arabia, Makkah is in the western part of the country near the Red Sea and Madina is to its north. The Kaaba is in Makkah and millions of Muslims go there every year for Hajj. In Madina there is the Masjid-e-Nabawi and his blessed Roza, where Muslims go for Ziyarat.

Question: 2. Celebrate Eid Milad-un-Nabi (PBUH) in your school and invite a religious scholar to speak on the life and teachings of Hazrat Muhammad (PBUH).

Answer: On the day of Eid Milad-un-Nabi, a programme of Naats and speeches is arranged in the school. The religious scholar tells the children in simple language about his life, such as truthfulness, kindness and helping the poor. At the end all the students promise that they will act upon his teachings and become good Muslims.

Chapter 11: The Rightly Guided Caliphs

A. Answer the following questions

Question: 1. How did Hazrat Abu Bakr Siddique (RA) get the title “Siddique”?

Answer: When the Holy Prophet (PBUH) told about the event of Mi'raj, many people could not believe it, but Hazrat Abu Bakr (RA) confirmed it at once without any hesitation. He supported him in everything and even gave all his wealth for Islam. Because of this truthfulness and confirmation he got the title “Siddique”, which means the great truthful one.

Question: 2. Choose one quote of Hazrat Umer Farooq (RA). Say why you chose it. How could you apply it in your life?

Answer: A famous saying of Hazrat Umer (RA) is: “Take account of yourselves before you are taken to account.” I chose this saying because it teaches us to think about our deeds every day. Every night before sleeping I will think about what good deeds I did today and what mistake I made, and I will not repeat the mistake tomorrow.

Question: 3. Describe the services of Hazrat Usman Ghani (RA) for Islam.

Answer: Hazrat Usman (RA) was very generous and he spent his wealth for Islam with an open heart. He bought a well of sweet water in Madina and gave it for the Muslims, and he helped the army greatly at the time of war. In his caliphate the Holy Quran was collected in one form and sent to the whole world, which is why he is called “Zun-Noorain” and “Ghani”.

Question: 4. What qualities of Hazrat Ali's (RA) character do you like the most? Why?

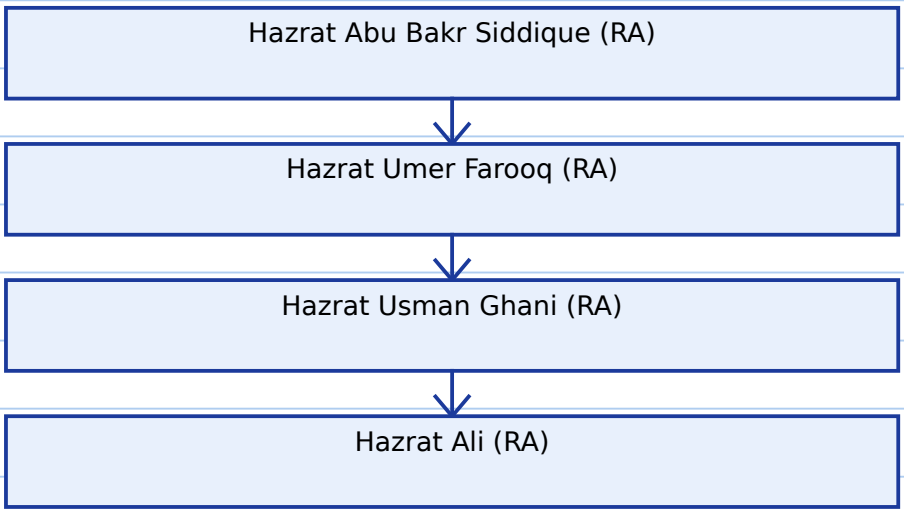

Answer: I like the simple life and generosity of Hazrat Ali (RA) the most.

Although he was the Caliph, he ate simple food, did his own work himself and no beggar went empty-handed from his door. I like this quality because it teaches that we should not be proud when we become great and should always help the poor.

Question: 5. Fill in the table: Name of Caliph, title given by the Holy Prophet Muhammad (PBUH) and the reason why the title was given.

Answer: Hazrat Abu Bakr (RA) has the title “Siddique”, because he was the first to confirm the event of Mi'raj. Hazrat Umer (RA) has the title “Farooq”, because he separated truth from falsehood. Hazrat Usman (RA) has the titles “Ghani” and “Zun-Noorain”, because he was very generous and was married to two daughters of the Holy Prophet (PBUH). Hazrat Ali (RA) has the title “Asadullah”, because he was very brave.

The Rightly Guided Caliphs

B. Practical Work

Question: The rightly guided Caliphs all lived a simple life. Think of one thing you can do to simplify your life. Try to do it and keep a record of your efforts.

Answer: I have chosen this thing to simplify my life: I will clean my own shoes and clothes myself and will buy a new thing only when it is really

needed. Although the rightly guided Caliphs were rulers, they did their own work themselves and ate simple food. Every week I will write in my diary which works I did myself and how much wasteful spending I avoided.

C. Extension Activity

Question: Invite an Islamic Scholar to give the class a lecture on the lives and achievements of the rightly guided Caliphs of Islam.

Answer: In the lecture the scholar tells the important things about the life of each Caliph, such as the truthfulness of Hazrat Abu Bakr, the justice of Hazrat Umer, the generosity of Hazrat Usman and the bravery of Hazrat Ali. Students can also ask questions and make notes of what they learn. Such a lecture gives children guidance from the lives of the rightly guided Caliphs and they try to become like them.

Chapter 12: Our Heroes and Heroines

A. Write the name of one important personality of each district on the map of Sindh

Question: Write the name of one important personality related to each district of Sindh.

Answer: The personalities related to the districts are: Kashmore — Mir Hazar Khan Bijarani, Jacobabad — General John Jacob, Shikarpur — Allah Bakhsh Soomro, Ghotki — Bhagat Kanwar Ram, Sukkur — Mir Muhammad Masum, Larkana — Hyder Bux Jatoi, Qambar Shahdadkot — the region of the Bhutto family (Shahnawaz Bhutto), Khairpur — Sachal Sarmast, Dadu — Allama Umar bin Muhammad Daudpota, Naushahro Feroze — the elders of the Makhdoom family, Shaheed Benazirabad — the elder scholars of the Syed family, Sanghar — Jam Sadiq Ali, Jamshoro — G. M. Syed, Matiari — Shah Abdul Latif Bhittai (Bhit Shah), Umerkot — Emperor Akbar (born in Umerkot), Mirpurkhas — Mir Fateh Ali Khan Talpur, Tando Allahyar — Watayo Faqeer, Tando Muhammad Khan — Mir Muhammad Khan Talpur, Hyderabad — Allama I. I. Kazi, Karachi — Quaid-e-Azam Muhammad Ali Jinnah, Thatta — Mirza Isa Khan Tarkhan, Sujawal — Sufi Shah Inayat (Jhok Sharif), Badin — Shah Abdul Karim of Bulri and Tharparkar — Rooplo Kolhi. These personalities are the identity of their districts and a source of pride for us.

B. Complete the table for the personalities you have studied above

Question: Complete the table: Name of Personality, what made him/her a hero/heroine, qualities he/she has and qualities I have / can develop.

Answer: Sachal Sarmast: he gave the message of peace and humanity

through his poetry; his qualities are simplicity and truthfulness; I can learn to speak the truth. Hyder Bux Jatoi: he struggled for the rights of farmers and got the Hari Act passed; his qualities are honesty and bravery; I can learn to help the weak. Dr Adeeb Rizvi: he started free treatment of kidney patients at SIUT; his quality is kindness and service; I can learn to help the sick. Arfa Karim: she became the world's youngest Microsoft expert at a small age; her qualities are intelligence and hard work; I can learn to work hard in studies.

C. Answer the following questions

Question: (i) Define the term heroism.

Answer: Heroism means those good qualities and great deeds because of which a person becomes an example for others. A hero is one who does not fear difficulties, helps others and thinks of the good of everyone instead of his own benefit. Seeing such people, others also learn to do good deeds.

Question: (ii) Name three people who are your heroes/heroines.

Answer: My three heroes are: Quaid-e-Azam Muhammad Ali Jinnah, who made Pakistan; Abdul Sattar Edhi, who served the poor and orphans all his life; and Dr Adeeb Rizvi, who treated kidney patients free of cost. All three devoted their lives to the good of others, so they are my heroes.

Question: (iii) List three qualities of your heroes/heroines.

Answer: Three qualities of my favourite hero Dr Adeeb Rizvi are: first, he is very kind-hearted and feels the pain of the sick as his own pain. Second, he is honest and spends every rupee of the hospital on the patients. Third, he is hardworking and even at an old age he sees patients every day. These qualities make him an example for everyone.

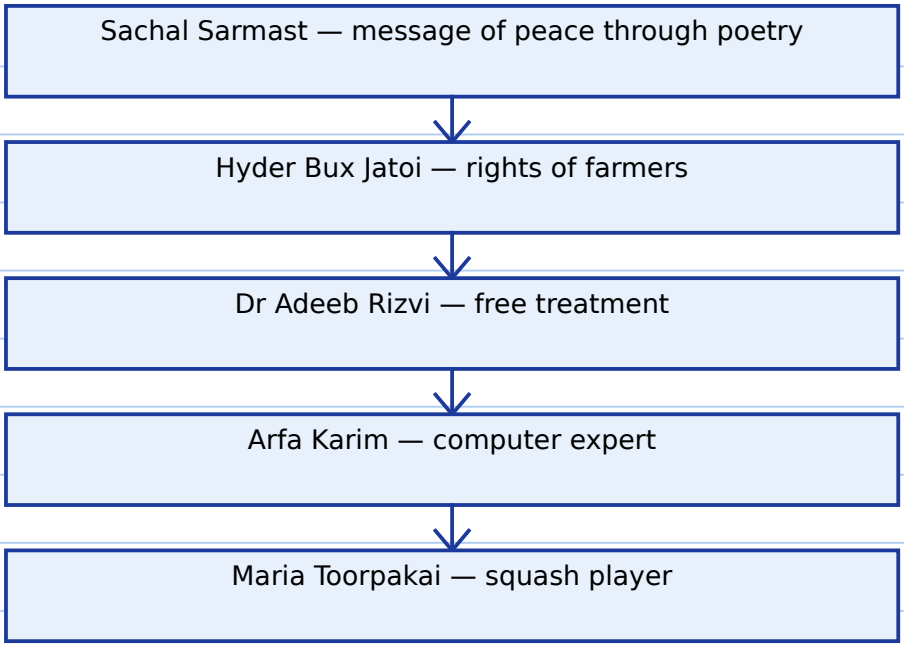

Question: (iv) Why are these people your heroes/heroines?

Answer: These people are important for me because from their lives I get guidance to become a good person. When I face a difficult task, I think about what my hero would have done in that situation. Their stories encourage me to work hard, speak the truth and serve others.

Question: (v) Identify the contribution of Allama I. I. Qazi, Lady Nusrat Haroon and Hyder Bux Jatoi for the development of Sindh.

Answer: Allama I. I. Kazi founded the University of Sindh in 1951 and became its first Vice Chancellor, through which higher education spread in Sindh. Begum Nusrat Haroon brought women into the Pakistan Movement and after independence worked for the education and betterment of women and helped migrant women. Hyder Bux Jatoi struggled for the rights of farmers, due to which the Sindh Tenancy Act was passed in 1950 and farmers started getting half of the produce.

Our Heroes and Heroines at a Glance

D. Practical work

Question: Make a book of heroes/heroines. Write the name of a hero/heroine on each page. Paste a picture of them and write a few lines

about what made them a hero/heroine.

Answer: On each page of the book the name of one hero or heroine is written in big letters and his or her picture is pasted. Below it, a few lines are written about the great work he or she did, such as Arfa Karim earned a name in the world of computers at a very young age. Reading such a book, other children also resolve to become like these heroes.

E. Inquiry

Question: Find out about a hero/heroine of your choice. Make a fact file about him/her: name, date and place of birth, things that he/she did that make him/her a hero/heroine and qualities that he/she has.

Answer: Name: Arfa Karim. Date and place of birth: 2 February 1995, a small village near Faisalabad, Punjab. Work that made her a heroine: at the age of only nine years she became the world's youngest Microsoft Certified Professional and made Pakistan's name bright. Qualities: she was very intelligent, hardworking and courageous, and even at a young age she had the spirit to achieve big goals.
