Grade 10 Pakistan Studies

Solved Exercises - English Medium - Balochistan Textbook Board (BTBB)

Complete book: all 5 chapters, every chapter-end Exercise (fill in the blanks, multiple choice, true/false, short and detailed questions) plus the Activities prompts.

Chapter 1: History of Pakistan (Period-II)

Chapter 2: Pakistan in World Affairs

Chapter 3: Economic Developments (Part-I)

Chapter 4: Economic Developments (Part-II)

Chapter 5: Population, Society & Culture

Source: BTBB Grade 10 Pakistan Studies textbook, 114 pages. Medium confirmed from the book itself: cover and Chapter 1 lesson (book p.5 = PDF p.6) are in English. Exercises were read from rendered pages (book pp.22-24, 43-44, 65, 79-80, 108-110). Questions are reproduced from each chapter Exercise; answers are written in medium length. Notes on the book's questions (answers follow the book's intended option): Chapter 1 MCQ v: the local self-government system was announced on 14 August 2000. Chapter 2 Q1 iii: Pakistan became a member of the UNO on 30 September 1947. Chapter 5 True/False ii: the 1998 census urban share was 32.5%, not 45%, so the statement is False. Chapter 5 True/False vi: Rahman Baba is the famous Sufi poet of the Pashto language, not Sindhi, so the statement is False. Chapter 5 fill-in ii uses 'culture' and iv uses 'popularity', so that all five words of the book's word bank are used exactly once. Chapter 2 has no Activities box; Chapters 1, 3, 4 and 5 Activities are given as prompts with an approach note, since they are class activities, not factual questions.

Chapter 1: History of Pakistan (Period-II)

Exercise (Chapter 1)

A. Fill in the blanks. (Filling word shown in red.)

(i) General Yahya Khan **resigned** after the defeat in the 1971 War.

(ii) "Bread, cloth and house for everyone" was the **slogan** of Pakistan Peoples Party during the elections.

(iii) In 1972, the government took over all the banks under its **management**.

(iv) One important step of General Zia government was the promulgation of the **Hadood** Ordinance.

(v) On 1st December, 1988, **Benazir Bhutto** took oath as Prime Minister of the country.

(vi) Nawaz Sharif government initiated a development project called **Taameer-e-Watan** Programme.

(vii) Pakistan had its nuclear test in the **Chaghi-Kharan Desert**.

B. Choose the correct answer. (Correct option marked with a green tick.)

(i) Nationalization of the large private enterprises started during:

(a) Yahya khan's rule

(b) Benazir's rule

(c) Zulfiqar Ali Bhutto's rule ✓

(d) Zia-ul-Haq's rule

(ii) Benazir Bhutto's first government was terminated by President:

(a) Ghulam Ishaq Khan ✓

(b) Farooq Laghari

(c) Zia-ul-Haq

(d) Pervez Musharraf

(iii) Pakistan carried out its nuclear tests during:

(a) Zulfiqar Ali Bhutto's rule

(b) General Musharraf's rule

(c) General Zia's rule

(d) Nawaz Sharif's rule ✓

(iv) Nawaz Sharif's 2nd term of government was terminated in:

(a) 1999 ✓

(b) 1993

(c) 1990

(d) 2001

(v) The system of local self-governments was announced:

(a) 14 August, 1999

(b) 14 August, 2000 ✓

(c) 14 August, 2003

(d) 14 August, 2002

C. Short questions.

(i) Define "Trade Union".

A trade union is an organisation of workers formed to protect and promote their common interests. It bargains collectively with employers for better wages, working hours and working conditions, and it defends the rights of workers against unfair treatment or dismissal.

(ii) What were the impacts of Nationalization Policy of industries, of Zulfiqar Ali Bhutto?

Under Bhutto, major industries, banks, insurance companies and educational institutions were taken over by the state. The policy aimed at ending the concentration of wealth and giving the state control of the economy, but it discouraged private investment, weakened industrial efficiency and increased the burden on the government, so industrial growth slowed down.

(iii) What was the role of Pakistan in Jihad-e-Afghanistan against Soviet Union?

Pakistan played the role of a front-line state in the Afghan resistance against the Soviet occupation. It gave refuge to millions of Afghan refugees, provided training and transit support to the Afghan mujahideen, and acted as the main channel for American and Saudi assistance, which finally forced the Soviet withdrawal from Afghanistan in 1989.

(iv) Explain the policies of Benazir Bhutto's first term of government.

In her first term (1988-1990), Benazir Bhutto released political prisoners, restored trade unions and student unions, and tried to improve relations with India and Afghanistan. Her government faced serious economic problems and charges of corruption and mismanagement, and it was dismissed by President Ghulam Ishaq Khan in 1990.

(v) What were the most important events of Nawaz Sharif's second term of government?

The most important events of Nawaz Sharif's second term (1997-1999) were the nuclear tests at Chaghi in May 1998 in response to India's tests, the launching of major development projects including the motorway, and growing tension with the army, which ended with the military takeover of October 1999.

D. Detailed questions.

(i) Discuss the agricultural and constitutional reforms of Zulfiqar Ali Bhutto.

In agriculture, Bhutto fixed ceilings on land holdings and distributed surplus land among landless farmers, and he gave tenants greater security. In constitutional matters, his government produced the Constitution of 1973, which restored parliamentary democracy, declared Pakistan a federal Islamic republic, and gave the provinces a defined share of

power.

(ii) Describe the salient features of the 1973 Constitution.

The salient features of the 1973 Constitution are that Pakistan is a federal parliamentary republic, Islam is the state religion, and the Quran and Sunnah are the source of legislation. It guarantees fundamental rights, provides for an elected National Assembly and Senate, and divides powers between the federation and the provinces.

(iii) Describe the important measures taken for Islamization in the country during General Zia-ul-Haq's government.

Under General Zia, Islamization measures included the promulgation of the Hadood Ordinance, the introduction of Zakat and Ushr collection, the establishment of Shariat courts, and the Islamization of the banking system and education. Interest-free banking was introduced and Islamic punishments were enforced for offences such as theft and drinking.

(iv) Highlight the challenges and achievements during Benazir Bhutto's governments.

Benazir Bhutto's governments faced the challenges of a weak economy, provincial tensions, corruption charges and friction with the presidency and the army. Her achievements included the restoration of democratic politics, freedom of the press, the appointment of women to public office, and efforts to improve Pakistan's relations with its neighbours.

(v) Discuss the performance of Mian Nawaz Sharif as the Prime Minister of Pakistan.

As Prime Minister, Nawaz Sharif is remembered for economic liberalisation, privatisation, the construction of the Lahore-Islamabad motorway, and the 1998 nuclear tests, which made Pakistan a nuclear power. His governments were also criticised for confrontation with the judiciary and the army, and both his terms ended before completion.

Activities. (Class activities: approach notes, not single answers.)

(i) Arrange a debate contest among the students on the topic: Pakistan, A Nuclear Power.

Approach: divide the class into two teams, one supporting and one opposing the motion. Each side should prepare points from the chapter: the 1998 tests, deterrence against India, and the costs and responsibilities of a nuclear programme. Conclude with a teacher's summary on peaceful use and national security.

(ii) Ask students to make a chart displaying important features of the 1973 Constitution.

Approach: the chart should list the federal parliamentary system, Islam as state religion, fundamental rights, the two houses of parliament, and the division of powers between the centre and the provinces, with one short line under each heading.

(iii) Ask each student the names of the Presidents and the Prime Ministers of Pakistan in sequence; also ask them to display those names on chart with their

ruling periods.

Approach: prepare a timeline chart from 1947 onwards, listing each President and Prime Minister with the years of his or her rule, and check the sequence against the chapter's account of governments from Bhutto to Musharraf.

Chapter 2: Pakistan in World Affairs

Exercise (Chapter 2)

A. Choose the correct answer. (Correct option marked with a green tick.)

(i) The organization of South Asian countries is known as .....

(a) NATO

(b) SAARC ✓

(c) SEATO

(ii) In the year ....., the Indus Basin Treaty was signed.

(a) 1956

(b) 1971

(c) 1960 ✓

(iii) Pakistan became the member of UNO in .....

(a) 1947 ✓

(b) 1948

(c) 1949

(iv) At the time of the partition of India, the ruler of Kashmir was .....

(a) Hindu Raja ✓

(b) Sikh Raja

(c) Muslim Raja

(v) Pakistan Steel Mills, Karachi was set up with ..... assistance.

(a) America's

(b) China's

(c) Russia's ✓

(vi) Libya lies in .....

(a) Middle East

(b) North Africa ✓

(c) Asia

B. True or False. (Statement in blue, verdict in red.)

(i) Pakistan is the first Muslim nuclear power. **(T)**

(ii) The aim of establishing Pakistan was the preservation of Islamic Ideology of Life. **(T)**

(iii) The Congress wholeheartedly accepted the establishment of Pakistan. **(F)**

(iv) Japan is economically a weak country. **(F)**

(v) Tunisia is one of the Arab countries. **(T)**

(vi) The UNO was founded after the end of Second World War. **(T)**

C. Short questions.

(i) What is that RCD stands for?

RCD stands for Regional Cooperation for Development. It was an organisation formed by Pakistan, Iran and Turkey in 1964 for economic and cultural cooperation among the three countries.

(ii) What are the obstacles in establishing better relations between Pakistan and India?

The main obstacles are the Kashmir dispute, the water dispute over the rivers, the arms race, cross-border tension, and the lack of trust created by three wars and repeated ceasefire violations. The Kashmir issue remains the central obstacle to lasting peace.

(iii) Whose government was in Afghanistan at the time of American attack in 2001?

At the time of the American attack in 2001, the Taliban government was in power in Afghanistan. The United States attacked after the Taliban refused to hand over Osama bin Laden following the 11 September 2001 attacks.

(iv) What countries are included in SAARC?

SAARC, the South Asian Association for Regional Cooperation, includes Pakistan, India, Bangladesh, Sri Lanka, Nepal, Bhutan, Maldives and Afghanistan. It was founded in 1985 to promote economic and social cooperation in South Asia.

(v) Why Saudi Arabia is held in high esteem in the Islamic World?

Saudi Arabia is held in high esteem because it is the land of the two holy mosques at Makkah and Madinah, the birthplace of Islam, and the destination of Hajj and Umrah. It also supports Muslim countries economically and has a leading voice in the Islamic world.

(vi) Name some of the specialized agencies of the UNO.

Some specialized agencies of the UNO are UNESCO (education, science and culture), UNICEF (children), the World Health Organization (health), the Food and Agriculture Organization (food and agriculture), and the World Bank and the International Monetary Fund (economic development).

D. Detailed questions.

(i) Write essay on the geopolitical importance of Pakistan in the world.

Pakistan occupies a position of great geopolitical importance. It lies at the meeting point of South Asia, Central Asia, China and the Middle East, and it gives landlocked Afghanistan and the Central Asian states their nearest route to the warm waters of the Arabian Sea through the port of Gwadar. It shares borders with China, India, Iran and Afghanistan, and its location has made it important for regional trade, for the security of the Gulf, and for the great powers, which explains its role in the Cold War, the Afghan war and the present competition in the region.

(ii) Discuss the basic aims and objectives of Pakistan's foreign policy and her relations with the Muslim countries.

The basic aims of Pakistan's foreign policy are the security and integrity of the country,

friendly relations with all states, especially the Muslim countries, support for the Kashmir cause, and economic development through trade and cooperation. With the Muslim countries Pakistan has close religious, cultural and economic ties: it has received financial assistance from Saudi Arabia and the Gulf states, defence cooperation with Turkey and Iran, and it supports the causes of Palestine and Kashmir in the Organisation of Islamic Cooperation.

(iii) Write a comprehensive note on the history and factors of Indo-Pak relations.

Indo-Pak relations began with the partition of 1947, which left the disputes of Kashmir, the division of assets, and the canal waters unsettled. The two countries have fought wars in 1948, 1965 and 1971, and the Kargil conflict in 1999. The factors shaping the relationship are the Kashmir dispute, the water issue settled partly by the Indus Basin Treaty of 1960, the nuclear programmes of both states, trade, and repeated efforts at dialogue, which have been broken by wars and incidents of terrorism.

(iv) Give examples of the economic and defense relations between Islamic countries and Pakistan.

Economically, Pakistan receives oil on deferred payment and financial assistance from Saudi Arabia and other Gulf states, and it exports labour, textiles and food to the Muslim world. In defence, Pakistan has training and equipment cooperation with Turkey, Saudi Arabia and Jordan, and its forces have served in Saudi Arabia and the Gulf. The RCD and later the ECO also linked Pakistan economically with Iran and Turkey.

(v) Compare Pak-Russia versus Pak-America relations.

Pak-America relations have been close but uneven: America gave large military and economic aid during the Cold War and the Afghan war, but it also imposed sanctions, notably after the 1998 nuclear tests. Pak-Russia relations began with distrust, since Russia supported India, but they improved after the Cold War: Russia helped build the Pakistan Steel Mills, and in recent years the two countries have cooperated in defence, energy and trade, though the relationship remains less deep than Pakistan's ties with America.

Chapter 3: Economic Developments (Part-I)

Exercise (Chapter 3)

A. Fill in the blanks. (Filling word shown in red.)

(i) In 1947, when Pakistan was created, the country's **economic** base was very weak.

(ii) Mining is one of the **primary** activities of economy.

(iii) Food, clothing and shelter are **basic needs** of a human being.

(iv) In Salt Range, the salt mines of **Khewra** are well known and the oldest in Pakistan.

(v) Pakistan has the vast **irrigation** system in the world.

B. Short questions.

(i) Where are the largest and famous copper mines of Pakistan located?

The largest and most famous copper mines of Pakistan are located at Saindak in the Chagai district of Balochistan. Copper and gold are extracted there, and the Reko Diq deposit in the same district is another major copper-gold reserve.

(ii) Differentiate between the basic minerals and power minerals.

Basic minerals are those used as raw material in industry, such as iron ore, copper, chromite and limestone. Power minerals are those used as sources of energy, such as coal, petroleum, natural gas and uranium. Basic minerals build industry, while power minerals run it.

(iii) What is a karez?

A karez is a traditional underground water channel used in Balochistan. A gently sloping tunnel is dug from the foothills to the fields, with vertical shafts for cleaning, so that water flows by gravity to irrigate land without evaporation losses.

(iv) Which crops are called the Rabi and the Kharif crops?

Rabi crops are sown in winter and harvested in spring, mainly wheat, barley, gram and oilseeds. Kharif crops are sown in summer with the monsoon and harvested in autumn, mainly cotton, rice, sugarcane and maize.

(v) Give examples of cottage industry.

Examples of cottage industry are handloom cloth weaving, carpet making, pottery, embroidery, sports goods of Sialkot, surgical instruments, and woodwork. These are run in homes or small workshops with family labour and simple tools.

C. Detailed questions.

(i) Describe the agricultural problems of Pakistan and the measures taken for their prevention.

The agricultural problems of Pakistan are water shortage and waterlogging and salinity, small and fragmented holdings, outdated methods, shortage of credit and good seed, and dependence on uncertain rainfall. The measures taken are the construction of dams and

canals, the lining of watercourses, the supply of improved seed and fertilizer, agricultural credit through banks, and the use of modern machinery and crop protection.

(ii) Highlight the types and regional distribution of industries of Pakistan.

Pakistan's industries are of three types: agro-based industries such as textiles, sugar and food processing; mineral-based industries such as cement, steel and chemicals; and cottage and small industries such as carpets, sports goods and surgical instruments. Textiles are centred in Faisalabad and Karachi, sugar in Punjab and Sindh, cement near the Salt Range and in Sindh, and steel at Karachi, while cottage industries are spread across Punjab, Sindh and Khyber Pakhtunkhwa.

Activities. (Class activities: approach notes, not single answers.)

(i) Arrange a study tour for the students to some small and large industrial units in the nearby city.

Approach: visit one small unit, such as a textile or sports-goods workshop, and one large unit, such as a sugar mill or textile factory. Note the raw material, the machines, the number of workers and the finished product, and write a short report comparing the two units.

(ii) Take the students on a field trip to the nearest mining area for observation.

Approach: at the mining area, observe how the mineral is extracted, what tools and safety measures are used, and where the mineral is sent for processing. Relate the visit to the chapter's account of Pakistan's mineral resources.

Chapter 4: Economic Developments (Part-II)

Exercise (Chapter 4)

A. Fill in the blanks. (Filling word shown in red.)

(i) The goods brought from other countries into home country are called **imports**.

(ii) The goods produced in home country and sold to foreign countries are called **exports**.

(iii) Among the non-conventional sources of energy, **solar** energy is the most useful and cheapest.

(iv) Buying and selling of goods is called **trade**.

B. Short questions.

(i) Define Poverty Line.

The poverty line is the minimum level of income needed to meet the basic needs of life, such as food, clothing and shelter. A person or family whose income falls below this line is counted as poor.

(ii) Write a note on the use of non-conventional energy resources in Pakistan.

Non-conventional energy resources are solar, wind, biogas and tidal energy. Pakistan has great potential for solar energy in Sindh and Balochistan and wind energy along the coast near Gharo and Jhimpir, where wind farms have been installed. Their use is still limited by high initial cost, but they are cheap to run and cause no pollution.

(iii) What are the determining factors in foreign trade?

The determining factors in foreign trade are the availability of surplus goods, the demand for foreign goods, the prices in world markets, the quality of products, transport and port facilities, trade agreements, and government policies such as tariffs and export incentives.

(iv) Write a note on Gwadar Port.

Gwadar Port is a deep-sea port on the coast of Balochistan, near the Strait of Hormuz. It was developed with Chinese assistance and is the centre of the China-Pakistan Economic Corridor. It gives Pakistan a second major port besides Karachi, shortens trade routes for China and Central Asia, and is expected to bring development to Balochistan.

(v) How is the Poverty Line determined?

The poverty line is determined by calculating the cost of a minimum basket of goods and services needed for subsistence, mainly food providing a set number of calories per day, plus clothing, housing and other essentials. In Pakistan it is fixed by the government on the basis of household income and expenditure surveys.

C. Detailed questions.

(i) Discuss Pakistan's foreign trade in the terms of imports, exports and partner countries.

Pakistan's exports are mainly cotton textiles, rice, leather goods, sports goods and surgical

instruments, while its imports are mainly petroleum products, machinery, chemicals and edible oil. Its major export partners are the United States, China, the United Kingdom and European countries, and its major import partners are China, Saudi Arabia, the United Arab Emirates and the United States. Because imports exceed exports, Pakistan usually has an unfavourable balance of trade.

(ii) Define the "balance of trade" and discuss the status of the balance of payment of Pakistan.

The balance of trade is the difference between the value of a country's exports and imports of goods: it is favourable when exports exceed imports and unfavourable when imports exceed exports. The balance of payments covers goods, services and financial transfers. Pakistan's balance of payments is generally in deficit because of heavy imports of oil and machinery, and the gap is met by workers' remittances, foreign loans and aid.

(iii) Write essay on the causes and consequences of poverty in Pakistan.

The causes of poverty in Pakistan are rapid population growth, low literacy, unemployment, unequal distribution of land and wealth, low agricultural productivity, and political instability. Its consequences are illiteracy, poor health, child labour, low living standards and social unrest. The remedies discussed in the chapter are birth control, education, job creation, equitable distribution of resources, and programmes such as the Benazir Income Support Programme.

(iv) Explain the importance and production of petroleum and gas among the power resources of Pakistan.

Petroleum and gas are Pakistan's most important commercial power resources: they run transport, industry and power stations. Oil is produced at fields in the Potwar region, such as Khaur and Dhurnal, and in Sindh, while natural gas is produced mainly at Sui in Balochistan, the largest gas field, and at Mari and Qadirpur in Sindh. Domestic production meets only part of the demand, so large quantities of oil are imported.

Activities. (Class activities: approach notes, not single answers.)

(i) Take the students on a study trip to the nearby dam or grid station.

Approach: at the dam or grid station, observe how electricity is generated or distributed, note the source of power, and ask about the supply to nearby towns. Relate the visit to the chapter's account of energy resources.

(ii) Arrange a debate among the students on causes and effects of poverty in Pakistan.

Approach: one side should present the causes, such as population growth and unemployment, and the other side the effects, such as illiteracy and poor health. Conclude with the remedies discussed in the chapter, including education, jobs and poverty-alleviation programmes.

Chapter 5: Population, Society & Culture

Exercise (Chapter 5)

A. Fill in the blanks. (Filling word shown in red.)

(i) The first **census** of Pakistan was conducted in 1951.

(ii) The manners prevailing in a society over ages are called **culture**.

(iii) Embroidery is the important **handicraft** of Baloch women.

(iv) Mystical poetry has a great role in the **popularity** of Sindhi language.

(v) The non-muslim population of Pakistan is called **minorities**.

B. True or False. (Statement in blue, verdict in red.)

(i) Sindh is the largest province of Pakistan in terms of population. **(F)**

(ii) According to 1998 census, 45% of the total population of Pakistan is urban. **(F)**

(iii) Culture and customs are synonymous to each other. **(F)**

(iv) Urdu is the official language of Pakistan. **(T)**

(v) Freedom of faith is available to the religious minorities of Pakistan. **(T)**

(vi) Rahman Baba is the famous Sufi poet of Sindhi language. **(F)**

C. Short questions.

(i) Why is the population of Pakistan unevenly distributed?

The population of Pakistan is unevenly distributed because of differences in climate, water, soil and jobs. The fertile plains of Punjab and the cities attract large populations, while the dry mountains of Balochistan, the deserts and the northern areas, where water and employment are scarce, remain thinly populated.

(ii) Why is the urban population of Pakistan growing rapidly than the rural population?

The urban population is growing faster because people migrate from villages to cities in search of jobs, education, health facilities and better living conditions. Natural increase in the cities adds to this migration, while mechanisation in agriculture reduces rural employment.

(iii) Which changes were observed in the culture of the Arab society after the advent of Islam?

After the advent of Islam, Arab society gave up idol worship, tribal warfare and the killing of infant girls, and adopted the worship of one God, equality of all believers, respect for women, and the values of honesty, charity and brotherhood. Learning and cleanliness also became part of daily life.

(iv) What do you mean by the ethical values of a Muslim society?

The ethical values of a Muslim society are truthfulness, honesty, justice, tolerance, respect for elders, kindness to neighbours, and the protection of the rights of women, children and

minorities. They are drawn from the Quran and the Sunnah and guide both personal conduct and public life.

(v) Describe the salient features of the culture of Balochistan Province.

The salient features of Balochistan's culture are the Balochi and Brahui languages, the tribal social structure, hospitality and bravery, and the traditional dress of shalwar kameez with turban. Its famous handicrafts are embroidery, mirror work and rugs, and its folk music and dances, such as the chap, are performed at weddings and festivals.

(vi) Write down the characteristics of Urdu language.

The characteristics of Urdu are that it is written in the Nastaliq script from right to left, it draws its vocabulary from Arabic, Persian and Turkish as well as local languages, and it is the national language of Pakistan. It is spoken and understood across the country, it has a rich literature of poetry and prose, and it serves as a link between the provinces.

D. Detailed questions.

(i) Write a note on the growth and density of population of Pakistan.

Pakistan's population has grown rapidly: from about 33 million at the first census in 1951 to over 200 million today, because of a high birth rate and a falling death rate. The density is uneven: Punjab is the most densely populated province, while Balochistan, the largest province by area, has the lowest density. Rapid growth has put pressure on food, housing, jobs and schools.

(ii) Discuss the relationship between religion and culture in the context of Pakistani society.

In Pakistani society religion and culture are closely linked: Islam shapes dress, food, festivals, family life and moral values. Eid-ul-Fitr and Eid-ul-Azha are national festivals, and customs such as respect for elders and hospitality are reinforced by religious teaching. At the same time, each province keeps its own language, dress and folk traditions, so Pakistani culture is a blend of Islamic values and regional customs.

(iii) Highlight the role of minorities in the consolidation of Pakistan.

The minorities played an important role in the consolidation of Pakistan. They worked with the Muslim leaders in the freedom movement, and after independence they served the country in every field: Justice A. R. Cornelius was Chief Justice of Pakistan, and officers such as Major General Julian Peter and Air Commodore Nazeer Latif won gallantry awards in defence of the country. The Constitution guarantees their rights, their places of worship are protected, and they have reserved representation in the assemblies.

Activities. (Class activities: approach notes, not single answers.)

(i) Divide the students into two groups and ask them to collect various local dress designs.

Approach: each group should collect photographs or drawings of the dress of one or two provinces, label the special features, and present them to the class with a note on the

material and embroidery used.

(ii) Take the class to a visit of historical buildings nearby.

Approach: at the building, note its age, style and historical importance, and connect it with the chapter's account of Pakistan's cultural heritage. Each student should write a short paragraph on what was observed.
