Social Studies

Class 6 (English Medium)

Solved Exercises — Sindh Textbook Board

43 lessons — 483 questions

Unit 1, Ch 1: Knowing and Understanding the Past

1. (i) History is the study of the past which provides information about _____ , _____ and _____.

Answer: people,, historical events, places.

1. (ii) We study history through primary sources and secondary sources.

1. (iii) It is essential that history is based on _____ and _____.

Answer: evidence, logical ideas (and is fully authentic).

Question: 2. (i) What is history?

Answer: History is the study of the past, which provides information especially about people, historical events and places.

Question: 2. (ii) What is the importance of studying history?

Answer: Knowing the past helps us understand the present and prepare for the future; we can learn lessons from past events and prevent them from happening again; knowing the history of our country and nation creates a sense of identity and pride in us; and it helps us play our part for the betterment of our country.

Question: B. Use your research and investigation skills. 1. Find out the history of the area you live in and write a short report on it. (For this you can take help from your parents and other people who have lived in this area for a long time.) Keep the following points in view for your guidance: • How old is this area? • Which are the old families of this area? • Which professions have the people of this area been associated with (what work do they do)? • What were their beliefs and laws? • Which things were included in their daily use?

Answer: This is a practical activity; it has no single fixed answer. Complete

it like this: ask the elders of your area (parents, grandparents) and write the answers to the five questions above; write each answer in one or two sentences; at the end write a short summary of the history of your area.

Question: C. Cooperate with others. 1. Recall and record all the events and facts of the school of the first day of Class 6. Now divide the class into groups of 4 students each. Now compare your stories in your groups with the help of the following questions: • Does each version (story) add different details? • Are some of them in conflict with each other? • How are these versions different from each other? • How will you decide inclusion and exclusion? • If you have to write a complete history of one day based only on facts, what will you include? • Write the history of that day in your own words.

Answer: This is a group activity; it has no single fixed answer. Complete it like this: each student tells their own story of the first day; the group together sees which things are the same in all stories (these are facts) and which things are different (these are each person's own views); in the end, write the history by selecting only those things which were the same in everyone's stories or are proven by evidence.

Unit 1, Ch 2: The Beginning of Human Life

1. (i) The two important theories about the beginning of human life are _____ and _____.

Answer: evolution.

1. (ii) Bipedal means _____.

Answer: The ability to walk on two feet.

1. (iii) Early humans wandered from place to place in search of _____.

Answer: food.

1. (iv) Scientists think that humans were born from their chimpanzee-like ancestors about _____ million years ago.

Answer: About six

1. (v) Modern humans are called _____.

Homo Sapiens.

Question: 2. Make a table showing the features of early humans and modern humans.

Answer: Early humans — lived in jungles and caves; hunted and ate wild fruits and roots; used stone tools; had no one permanent home. Modern humans — live in cities and houses; obtain food through agriculture and trade; use modern tools and machines; have education, writing and technology.

Question: 3. (i) Explain the difference between the theory of creation and the theory of evolution.

Answer: Theory of creation: Allah created man from clay and made him His vicegerent on earth; man is the offspring of Adam (AS). Theory of evolution: human life began from simple life, kept changing over millions of years through natural selection, and was born from chimpanzee-like

ancestors.

Question: 3. (ii) Identify the important features of the lifestyle of hunter-gatherer bands.

Answer: Hunter-gatherer bands lived in jungles and had no permanent home; they hunted and ate the meat of animals and ate fruits and roots of trees; they used stone tools; they moved from one place to another in search of food; they lived in caves and covered their bodies with animal skins.

Question: B. Use your research and investigation skills. 1. Search for both theories about the beginning of life on a card. Share those theories with the class from your information.

Answer: This is a research activity; it has no single fixed answer. Complete it like this: write the important points of both theories from Chapter 2 of the book on a card — theory of creation: man was created from clay, he is the offspring of Adam (AS); theory of evolution: life began in a simple form and changed through natural selection to become man — and tell the class.

Question: C. Cooperate with others. 1. Working together in a group of four, complete the following table. This table will help in comparing the life of the early humans and your life today: Similar | Dissimilar.

Answer: This is a group activity; it has no single fixed answer. Fill the table like this: Similar — both need food, water, shelter and clothes; both have families and friends; both need protection. Dissimilar — early humans lived in jungles and caves, today's humans live in houses and cities; early humans used stone tools, today's humans use machines and technology; early humans lived by hunting, today's humans live by agriculture and trade.

Question: C. 2. Fill the following table and identify the benefits

(advantages) and harms (disadvantages) of the lifestyle of hunter-gatherer bands: Benefits | Harms.

Answer: This is a discussion/opinion activity; it has no single fixed answer. The table can be filled like this: Benefits — simple life close to nature; few belongings and few worries; working together in a group. Harms — danger of food shortage; no permanent home or protection; danger from disease and wild animals.

Question: C. 3. Write three benefits (advantages) and three harms (disadvantages) of today's lifestyle: Benefits | Harms.

Answer: This is a discussion/opinion activity; it has no single fixed answer. The table can be filled like this: Benefits — availability of food, water and treatment; education and technology; safe and permanent homes. Harms — environmental pollution; less physical labour and new diseases; greater expense and busyness.

Unit 1, Ch 3: Society

1. (i) Society came into existence about _____ thousand years ago.

Answer: About one hundred

1. (ii) The change from an agricultural society to an industrial society took place in about _____.

Answer: In the late eighteenth century (about 1769, after the Industrial Revolution).

1. (iii) An agricultural society is one in which crops are _____ and animals are _____.

Answer: cultivated, reared.

1. (iv) Today's society can be called _____.

Answer: A post-industrial society.

Question: 2. Compare the characteristics of societies: Important characteristics | Society of hunter-gatherer bands | Agricultural society: Sources of food; Division of work; Increase in camp/home population; Migration of population; Clothes and shelters; Relation with the natural environment; Benefits of lifestyle; Harms (disadvantages).

Answer: Sources of food — Hunter-gatherer: hunting, wild fruits and roots; Agricultural: cultivation of crops and rearing animals. Division of work — Hunter-gatherer: no special division of work, all joined in searching for food; Agricultural: work was divided — some cultivated, some reared animals, some made pots/tools. Increase in camp/home population — Hunter-gatherer: small groups, low population; Agricultural: population grew, villages and towns formed. Migration of population — Hunter-gatherer: kept moving from place to place in search of food; Agricultural: settled permanently in one place. Clothes and shelters —

Hunter-gatherer: animal skins, caves and temporary shelter; Agricultural: cloth and permanent houses. Relation with the natural environment — Hunter-gatherer: complete dependence on nature; Agricultural: effort to control nature (cultivation, irrigation). Benefits of lifestyle — Hunter-gatherer: simple life; Agricultural: abundance of food and permanent residence. Harms (disadvantages) — Hunter-gatherer: danger of food shortage; Agricultural: more labour and dependence on land.

Question: 3. (i) State the meaning of society and culture.

Answer: Society: a group of people who live together, with a feeling of togetherness and mutual relation, who cooperate with one another, and whose beliefs, standards, customs and values are shared. Culture: the lifestyle of a group of people — it includes language in common conversation, religion, food and drink, wearing and dress habits, music and art, and those things which are passed from one generation to another.

Question: 3. (ii) Explain the difference between hunter-gatherer bands and agricultural society.

Answer: Hunter-gatherer bands moved from place to place in search of food, had no permanent home, and lived on hunting and wild fruits; in agricultural society people settled permanently in one place, cultivated crops and reared animals, which brought abundance of food, growth of population and division of work.

Question: 3. (iii) Identify what societies do for their organisation, survival and continuity?

Answer: For their organisation, survival and continuity, societies make laws and customs, divide work, cooperate with one another, pass their culture and values to the next generation through education and training, and arrange for the protection and food of their members.

Question: 3. (iv) Why do societies change or why do they remain? Write three reasons for each.

Answer: Reasons for change — (1) New technology and inventions (for example the discovery of agriculture, the Industrial Revolution); (2) Change in the natural environment (weather, course of rivers); (3) Trade and contact with other societies. Reasons for remaining — (1) Shared culture, traditions and beliefs; (2) Laws and organisation which keep the society established; (3) Values being passed from one generation to another through education.

Question: B. Use your research and investigation skills. 1. Search for the reasons because of which, in the late eighteenth century, agricultural societies changed into industrial societies.

Answer: This is a research activity; it has no single fixed answer. Complete it like this: write these reasons from Chapter 3 of the book and the table — invention of new machines, establishment of factories, use of the power of coal and steam, increase in the population of cities and increase in trade.

Question: C. Cooperate with others. 1. Working in a group of four, combine the information related to the history of Class 4 and Class 5.

Answer: This is a group activity; it has no single fixed answer. Complete it like this: the group members collect the things read about society and civilisation from the books of Classes 4 and 5 and make a list.

Question: C. 2. Make a list of examples of changes occurring in Pakistani society and the reasons behind them (for example: there is more population in cities — reason: more job opportunities in cities).

Answer: This is an observation/opinion activity; it has no single fixed answer. Write examples like this: there is more population in cities — reason: more job opportunities in cities; schools and hospitals are increasing in villages — reason: attention of the government and people

towards education and health; use of mobiles and internet has increased — reason: new technology.

Question: C. 3. Give examples of those things in which no change has come.

Answer: This is an observation/opinion activity; it has no single fixed answer. Examples: the basis of our religion and beliefs; the tradition of family and hospitality; celebrating Eids and other festivals; attachment to our own language and dress.

Question: C. 4. Arrange in a table the examples of changes you noticed or in which no changes occurred.

Answer: This is a group activity; it has no single fixed answer. Make two columns in the table: Change occurred | No change occurred; write the examples of the previous two questions in those columns.

Question: C. 5. Display your prepared chart in the classroom and discuss changes and similarities.

Answer: This is a classroom activity; it has no single fixed answer. Complete it like this: put up your chart in the class and tell which things changed and which did not, and why.

Unit 1, Ch 4: The Beginning of Civilization

1. (i) The collection of beliefs about life and the world is called Worldview. .

1. (ii) When most members of a society share beliefs about life and the world, it means _____.

Answer: A social worldview.

1. (iii) A society which attains the highest quality of social development and organisation is called _____.

Answer: civilisation.

Question: 2. Keeping the example of Pakistan in front, make an outline (table) of the characteristics of a civilisation.

Answer: Large urban centres — Karachi, Lahore, Islamabad. Specialisation of work — farmers, labourers, doctors, teachers, engineers. Social classes — different professions and classes. Balanced food supply — abundance of food from agriculture. Religion — Islam and other religions. Central government — federal and provincial government. Writing — Urdu and English writing. Art and architecture — Badshahi Mosque, Mazar-e-Quaid, folk art. Technology and inventions — mobile phones, internet, machines.

Question: 3. (i) Make a list of the reasons which affect a person's personal worldview.

Answer: Characteristics received in inheritance; life experiences (experiences of home, school and community); the environment and culture in which we live; family and school.

Question: 3. (ii) Explain with an example how a social worldview is formed?

Answer: When most people of a society believe in the same thing, a social

worldview is formed. For example, the people of the Indus Valley Civilisation gave great importance to cleanliness, therefore their cities had an excellent system of brick drains and bathrooms — that was their shared worldview.

Question: 3. (iii) Write the points that explain the characteristics of civilisations.

Answer: Large urban centres or settlements; specialisation of work; social classes; balanced food supply; religion; central government; writing; art and architecture; technology and inventions.

Question: B. Use your research and investigation skills. 1. Select a civilisation for your research. Identify its culture, style of government, religion, architecture, inventions, geographical features and writings.

Answer: This is a research activity; it has no single fixed answer. Complete it like this: select one civilisation (for example the Indus Valley Civilisation); write points about its culture, government, religion, architecture, inventions, geography and writing from Chapters 1-4 of the book and present them in class.

Question: C. Cooperate with others. 1. Working with a group of four, prepare a list of concrete examples which come forward because of contact with contemporary societies and the natural environment.

Answer: This is a group activity; it has no single fixed answer. Write examples like this: trading with other societies brings new things and ideas; new technology increases factories and cities; the natural environment (rivers, land, weather) affects the food and residence of a society.

Question: C. 2. How are human health and prosperity affected by social development and technology?

Answer: This is a discussion question; it has no single fixed answer. Write

the answer like this: with social development and technology, facilities of treatment, clean water, better food and education increase, which improves health and prosperity; but more machines and pollution also create new diseases.

Question: C. 3. What is the relation of social development and technology with the environment?

Answer: This is a discussion question; it has no single fixed answer. Write the answer like this: development and technology affect the environment in both ways — on one hand they help keep and protect the environment (for example the cleanliness system), on the other hand the smoke and waste of factories and vehicles also spoil the environment.

Question: C. 4. What do we do to obtain harmony with the environment?

Answer: This is a discussion question; it has no single fixed answer. Write the answer like this: we wear clothes according to the weather and build houses; we use fans, heaters and roofs to protect from heat and cold; we use river and rain water for cultivation and drinking.

Question: C. 5. What effect does the environment have on us?

Answer: This is a discussion question; it has no single fixed answer. Write the answer like this: the environment affects our food, health, residence and work — a good environment gives health and prosperity, a bad environment brings diseases and troubles.

Question: C. 6. Who guarantees the standard of our life?

Answer: This is a discussion question; it has no single fixed answer. Write the answer like this: the standard of our life is guaranteed by our society, government, family and ourselves — the government gives laws and facilities, the family gives training, and every person improves their life with their own hard work.

Question: C. 7. What are we doing to ensure the standard of life for future

generations?

Answer: This is a discussion question; it has no single fixed answer. Write the answer like this: we give education to children, keep the environment clean, plant trees, save water and resources from being wasted, and carry forward good laws and customs.

Question: C. Thought-provoking (combined): Do you think our society can sustain itself? Why?

Answer: This is a discussion/opinion question; it has no single fixed answer. Write the answer like this: Yes, if we keep our culture and values established, follow the laws, pay attention to education and cleanliness and protect the environment, then our society can sustain itself; if we do not take care of these things, society can become weak.

Unit 2, Ch 1: Land and People of the Indus Valley Civilization

1. (i) The Indus Valley Civilisation flourished on the bank of _____ the River Indus.

1. (ii) This civilisation remained continuously from _____ to _____ years ago.

Answer: about 3300, 1300

1. (iii) The two central cities of the Indus Valley Civilisation are _____ and _____.

Answer: Harappa, Mohenjo-Daro.

1. (iv) Our information about the inhabitants here and their ways has been obtained from the study of _____ which have been dug out so far.

Answer: archaeological remains (artefacts found by digging).

1. (v) Children's toys included _____ and _____.

Answer: Small carts with clay wheels, dice (and figures of different animals).

Question: 2. Match the artefacts given in Column A with the detail given in Column B: Column A — Dancing Girl; Seals; Bowl; Bull; Dice. Column B — Round and deep, used for eating; Coloured cube with a different number of holes on each side; A very tall horned animal engraved on seals; A statue of copper made in a special style; Square pieces of engraved stones which traders used in business.

Answer: Dancing Girl — A statue of copper made in a special style. Seals — Square pieces of engraved stones which traders used in business. Bowl

— Round and deep, used for eating. Bull — A very tall horned animal engraved on seals. Dice — Coloured cube with a different number of holes on each side.

Question: 3. (i) In which continent and along which river did the Indus Valley Civilisation flourish?

Answer: In Asia (South Asia), along the River Indus.

Question: 3. (ii) Write the names of the two famous cities of the Indus Valley Civilisation and tell where they are located?

Answer: Harappa — in Punjab, on the bank of the River Ravi; Mohenjo-Daro — in Sindh, on the bank of the River Indus.

Question: 3. (iii) What was the sanitary system of the Indus Valley Civilisation?

Answer: Dirty water from houses went through drains into the drains of the streets and from there out of the city; houses had bathrooms and wells; the streets had brick drains which were joined to the drains of the houses.

Question: 3. (iv) To which age does the Indus Valley Civilisation belong?

Answer: To the age of about three thousand three hundred to one thousand three hundred years ago (the Bronze Age).

Question: 3. (v) What are the important sources of our information about the Indus Valley Civilisation?

Answer: Archaeological remains — buildings, seals, pots, statues, toys and other things found by digging; because their writing has not yet been read, these remains themselves are the important source of our information.

Question: 3. (vi) What were the professions of the inhabitants of the Indus Valley Civilisation?

Answer: Farming, rearing animals, making pots, making cloth, making jewellery, trade and labour.

Question: B. Use your research and investigation skills. 1. After researching about the city of Mohenjo-Daro, prepare a one-page advertisement about it which invites people to visit the prepared site.

Answer: This is a research/creative activity; it has no single fixed answer. Complete it like this: write points about Mohenjo-Daro from the book — in Sindh on the bank of the River Indus, houses of baked bricks, the Great Bath, brick drains — and make an advertisement in which these things are written with an invitation to come for a visit.

Question: C. Cooperate with others. 1. Working in a group, make a model of a house of Mohenjo-Daro.

Answer: This is a group activity; it has no single fixed answer. Complete it like this: looking at the characteristics of houses from the book (walls of baked bricks, central courtyard, rooms, well, bathroom, drains), make a model of a house from clay, cardboard or card.

Unit 2, Ch 2: Art and Architecture of the Indus Valley

Civilization

1. (i) The inhabitants of the Indus Valley Civilisation were experts in _____ and _____.

Answer: Town planning, architecture.

1. (ii) The houses and other buildings here are made of Baked bricks.

1. (iii) Three samples of art found from the Indus Valley Civilisation were _____ , _____ and _____.

Answer: stone carving,, pots of pottery,, jewellery of jewellery-making.

1. (iv) We know that the inhabitants here were fond of some dance because a statue of _____ has been found here.

Answer: a dancing girl.

1. (v) Written seals were used for trade. This shows that the traders here could _____.

Answer: Write.

Question: 2. Match the artefacts given in Column A with Column B: Column A — Upper torso of the priest; Figures of a dancing girl; Stringed instruments; Bowl made of baked clay; Seal with pictorial symbols. Column B — Dance; Music; Pottery; Stone carving; Writing.

Answer: Upper torso of the priest — Stone carving. Figures of a dancing girl — Dance. Stringed instruments — Music. Bowl made of baked clay — Pottery. Seal with pictorial symbols — Writing.

Question: 3. (i) How was town planning done in the Indus Valley

Civilisation?

Answer: Cities were built in a grid pattern — there were straight streets from north to south and from east to west, the city was divided into several blocks, two bull carts could pass together through the wide streets, houses were built on both sides of the streets and drains were built along them, and the ratio of bricks was kept at 1:2:4.

Question: 3. (ii) Tell about the houses in which the inhabitants of the Indus Valley Civilisation lived.

Answer: Houses were made with wide walls of baked bricks; houses had a central courtyard with rooms around it; some houses were even two or three storeys high; houses had a well, a bathroom and a drainage system; stairs were built for going to the roof.

Question: 3. (iii) Write all the kinds of art which the inhabitants of the Indus Valley Civilisation practised. Make a plan (banner/poster) which highlights a sample of this art.

Answer: Stone carving, pottery, jewellery-making, dance and music, writing. Make the poster like this: with the big title "Art of the Indus Valley", a picture of one sample (for example the Dancing Girl or a seal) in the middle, and two or three sentences below it — what it is made of and what it was used for.

Question: B. Use your research and investigation skills. 1. Research the art and architecture of another civilisation (ancient Egypt and Mesopotamia) which existed in the periods of the Indus Valley Civilisation.

Answer: This is a research activity; it has no single fixed answer. Complete it like this: find points about the art and architecture of ancient Egypt (pyramids, temples) or Mesopotamia (ziggurats, temples) and compare them with the art and architecture of the Indus Valley (houses of baked bricks, the Great Bath, seals, statues).

Question: C. Cooperate with others. 1. Working with a small group, prepare a poster in which the different samples of the art of the Indus Valley Civilisation and today's samples are shown.

Answer: This is a group activity; it has no single fixed answer. Complete it like this: on the poster, put pictures of the samples of the Indus Valley (seal, statue, pots, jewellery) on one side and the same kind of samples of today (today's seals, statues, pots, jewellery) on the other side, and write their same and different points below.

Question: C. 2. Display the poster in the exhibition for everyone to see and learn.

Answer: This is a classroom activity; it has no single fixed answer. Complete it like this: put up your poster in the class or school and tell the other students about it.

Unit 2, Ch 3: Tools, Techniques, Science and Trade

1. (i) A system of measurement was devised for measuring _____ , _____ and _____.

Answer: length,, weight, angles (lines).

1. (ii) Most tools were made of Of stone. .

1. (iii) As a result of new metal-working techniques, _____ and _____ came into existence.

Answer: tools made, from them)

1. (iv) The economy of the Indus Valley depended on On trade. .

1. (v) Trade with other places was promoted by the facility of _____ and _____.

Answer: bull carts, boats (transport).

Question: 2. Make a list of the trade goods of the inhabitants of the Indus Valley Civilisation in which all bought and sold things are included.

Answer: Things sold — pots, beads, cloth, jewellery, seals, toys, grain.

Things bought — gold, silver, carnelian, turquoise, lapis lazuli, metals and precious stones (for making tools), shells and pearls, wood (for making boats).

Question: 3. (i) Which tools did the inhabitants of the Indus Valley Civilisation use? Give one example of a thing for which each tool was used.

Answer: Needles — for sewing cloth; fish hooks — for catching fish; axes — for cutting wood; chisels — for carving stone; knives — for cutting food.

(Tools in the book: needles, fish hooks, axes, chisels, knives.)

Question: 3. (ii) Describe the technology used for measuring weight.

Answer: Weights were used for weighing — the weights were in units of 0.05, 0.1, 0.2, 0.5, 1, 2, 5, 10, 20, 50, 100, 200 and 500; the smallest weight was less than one gram and the biggest weight was more than eleven kilograms; things were weighed by placing the weights in a balance.

Question: 3. (iii) Because of which technology did trade with other places become easy?

Answer: Transport technology — with the use of bull carts and boats, goods could be carried in large quantity and in less time to far places, which made trade easy.

Question: 3. (iv) How did we come to know that the inhabitants of the Indus Valley Civilisation traded with the people of other places?

Answer: We came to know from things found by digging — things of other countries (for example seals of Mesopotamia, minerals of Afghanistan and Iran, copper of India, green carnelian of China) were found in the cities of the Indus Valley, and things of the Indus Valley (seals, beads) were found in other countries.

Question: B. Use your research and investigation skills. 1. Look at the pictures given below. In your opinion, for what purpose were they used?

Answer: This is an observation activity; its answer is based on the pictures. The pictures show weights and a balance (for weighing), tools (for cutting/carving) and needles/hooks (for sewing and catching fish). They were used for weighing things in trade, sewing cloth, catching fish and making tools.

Question: C. Cooperate with others. 1. Working in a small group, prepare a picture booklet (collage) on the Indus Valley Civilisation. Write a new title under each picture which explains that picture.

Answer: This is a group activity; it has no single fixed answer. Complete it like this: collect pictures of the Indus Valley from the book (house, seal, statue, pots, boat, bull cart), write a title under each picture (for example "House of baked bricks", "Seal of trade") and show the booklet in the class.

Unit 2, Ch 4: The End of the Indus Valley Civilization

1. (i) The Indus Valley Civilisation came to an end in about _____.

Answer: About one thousand three hundred years ago.

1. (ii) Historians also could not discover the reasons which caused the _____ of the civilisation.

Answer: decline (end)

1. (iii) Three reasons because of which the Indus Valley Civilisation holds importance are _____ , _____ and _____.

Answer: Town, planning, architecture, cleanliness, and peace and tranquillity.

Question: 2. Make a table in which every viewpoint about the end of the Indus Valley Civilisation and the arguments given for each viewpoint are entered.

Answer: Viewpoint 1 — Aryan invasion: the Aryans invaded and destroyed the civilisation. Argument: the Vedic hymns mention the destruction of cities; human skeletons were found in Mohenjo-Daro. Viewpoint 2 — Floods: floods forced people to leave their homes. Argument: floods came in the River Indus; the city had to be rebuilt. Viewpoint 3 — Climate change: change in the monsoon and rise in temperature caused drought. Argument: agriculture and trade depended on rain; people moved to other places.

Question: 3. (i) State the importance of the Indus Valley Civilisation.

Answer: The Indus Valley Civilisation holds great importance in many respects — for example town planning and architecture, cleanliness, various kinds of art and handicraft samples which are still common today and by which the civilisation was recognised, and above all it was a

powerful civilisation with peace and tranquillity. Its people did not leave big monuments like the people of Egypt and Mesopotamia, but the remains of their cities are still visible today, and even today the people of Pakistan and India use many of their things.

Question: 3. (ii) Which two things have you learnt about the Indus Valley Civilisation on which, if acted upon, your city can also become better?

Answer: This is an opinion question; it has no single fixed answer. Two things can be: (1) An excellent system of cleanliness and water drainage — brick drains in houses and streets and arrangement for collecting rubbish; (2) Town planning — straight streets, a city divided into blocks and access of clean water to every house.

Question: B. Use your research and investigation skills. 1. Tell those things which can prove helpful in making your city or town better.

Answer: This is an opinion activity; it has no single fixed answer. Complete it like this: write the things learnt from the Indus Valley Civilisation — clean water, brick drains, arrangement for rubbish, straight and clean streets, trees and gardens, schools and hospitals — and tell how these will make your city better.

Question: C. Cooperate with others. 1. Working in a small group of four, identify what should be done to make your city or town famous in the country?

Answer: This is a group/opinion activity; it has no single fixed answer. Complete it like this: the group together makes a list of the good things of its city (historical site, cleanliness, schools, trade) and tells how by improving them the city can be made famous.

Unit 1 End Exercises

Question: A. 1. Match the names of the societies given in Column A with the statements given in Column B: Column A — Agricultural; Hunter-gatherer bands; Pastoralism (herdsmen); Industrial; Post-industrial. Column B — People were mostly busy in providing information; People kept migrating from one place to another so that their animals could get food; People kept moving from one place to another in search of food; People settled in one place for obtaining food and rearing animals; People use raw materials for the production of things.

Answer: Agricultural — People settled in one place for obtaining food and rearing animals. Hunter-gatherer bands — People kept moving from one place to another in search of food. Pastoralism (herdsmen) — People kept migrating from one place to another so that their animals could get food. Industrial — People use raw materials for the production of things. Post-industrial — People were mostly busy in providing information.

Question: A. 2. (i) Identify the three sources of historical evidence.

Answer: (1) Observations (eyewitness accounts); (2) Archaeological remains (things found by digging); (3) Written records (written documents).

Question: A. 2. (ii) State the characteristics of civilisation briefly.

Answer: Large urban centres or settlements; specialisation of work; social classes; balanced food supply; religion; central government; writing; art and architecture; technology and inventions.

Question: A. 2. (iii) Define the term society. Giving examples in support of your answer, explain how societies change?

Answer: Society: a group of people who live together, with a feeling of

togetherness and mutual relation, who cooperate with one another, and whose beliefs, standards, customs and values are shared. Societies change: (1) With new technology and inventions — for example, with the discovery of agriculture hunter-gatherer bands changed into agricultural society, and with the Industrial Revolution agricultural society changed into industrial society; (2) With change in the natural environment — for example change of weather or of the course of rivers; (3) With trade and contact with other societies.

Question: A. 2. (iv) Describe the life of the early humans.

Answer: Early humans lived in jungles and caves; they had no permanent home; they hunted and ate the meat of animals and ate fruits and roots of trees; they used stone tools; they moved from one place to another in search of food; they covered their bodies with animal skins.

Question: B. 1. Read Unit 2 about the Indus Valley Civilisation and identify examples of the characteristics of civilisation in the Indus Valley Civilisation.

Answer: All the characteristics of civilisation are found in the Indus Valley Civilisation: large urban centres — Harappa and Mohenjo-Daro; specialisation of work — farmers, craftsmen, traders; balanced food supply — abundance of food from agriculture and trade; central government — planned cities and rules; writing — pictorial symbols on seals; art and architecture — houses of baked bricks, the Great Bath, statues, jewellery; technology — the system of measurement, metal-working, bull carts and boats.

Question: C. 1. Prepare a short outline of such a reflection in which you examine what would be the consequences of living in a world in which there is no information related to history. Supporting your reflection, exchange views with your classmates while describing the importance of

history and its role in understanding the present and the future.

Answer: This is an opinion activity; it has no single fixed answer. Complete it like this: think that if we had no knowledge of the past, we would not be able to understand the present, we would repeat the mistakes of the past, we would remain deprived of our identity and pride, and we would not be able to prepare for the future; therefore history is necessary — it helps us understand the present, prepare for the future and give identity to our nation. Tell your views in the class and listen to the views of others.

Question: Cooperate with others. 1. Working in a group of four, prepare an advertisement for the post of a historian. The advertisement should include the following: • Complete detail of the work. • List of responsibilities. • And the required standard of performance.

Answer: This is a group activity; it has no single fixed answer. Write the advertisement like this: Title — "Applications required for the post of a historian"; Detail of work — researching past events, people and places, collecting evidence and writing history; Responsibilities — studying archaeological remains and documents, examining evidence, writing reports and books; Required standard — education in history, interest in research, ability to write truthfully and based on evidence.

Question: Cooperate with others. 2. When every group has read its advertisement, start a discussion in the whole class and explain the following points: • Consider the nature of the work of historians. • The most important characteristics required for this work. • And those aspects of this work which will prove more interesting.

Answer: This is a discussion activity; it has no single fixed answer. Discuss like this: the work of a historian — collecting evidence of the past, examining it and writing history; the most important characteristics — truthfulness, examination of evidence, patience and interest in research;

interesting aspects — discovering the secrets of old civilisations, studying things found in digging, and bringing the stories of the past to light.

Question: Creative works. 1. Listen to Sting's song 'History will teach us Nothing'. The teacher will provide you its tune. Listen to it and act upon it.

Answer: This is a listening activity; it has no single fixed answer. Complete it like this: take the tune of the song from the teacher, listen to the song carefully and think about its meaning — the song says that history teaches us nothing, but the lesson of our book is that history helps us understand the present and prepare for the future.

Question: Creative works. 2. Work in a group of four. Rewrite the song while identifying those points which history teaches us. Practise the song in your group.

Answer: This is a creative activity; it has no single fixed answer. Rewrite the song like this: history teaches us not to repeat the mistakes of the past; history gives us our identity; history helps us understand the present and prepare for the future. Practise it together in the group.

Question: Creative works. 3. Come in front of the class and sing the song which your group has written.

Answer: This is a presentation activity; it has no single fixed answer. Complete it like this: sing the song written by your group with confidence in front of the class.

Question: Technical considerations. 1. Record the song prepared by your group and upload it on the internet.

Answer: This is a practical activity; it has no single fixed answer. Complete it like this: record the song under the guidance of the teacher and upload it on the internet with the permission of the school.

Unit 2 End Exercises

Question: A. 1. Match the artefacts given in Column A with their uses given in Column B: Column A — Baked bricks; Pots; Carts; Plates; Figures of animals; Needles; Ruler; Seals; Scale of weights. Column B — Building of houses; Carrying things from one place to another; Eating food; Making jewellery; Measurement of clothes; Measurement of the weight of things; For playing; Sewing cloth; Trade.

Answer: Baked bricks — Building of houses. Pots — Eating food. Carts — Carrying things from one place to another. Plates — Eating food. Figures of animals — For playing. Needles — Sewing cloth. Ruler — Measurement of clothes. Seals — Trade. Scale of weights — Measurement of the weight of things.

Question: A. 2. (i) Identify on the map of the world the Indus Valley Civilisation and the other civilisations of that period.

Answer: The Indus Valley Civilisation — in South Asia, along the River Indus; its central cities were Harappa (in Punjab, on the bank of the River Ravi) and Mohenjo-Daro (in Sindh, on the bank of the River Indus). Other civilisations of that period — ancient Egypt (along the River Nile) and Mesopotamia (between the rivers Tigris and Euphrates).

Question: A. 2. (ii) In your opinion, which factors helped the Indus Valley Civilisation to spread?

Answer: This is an opinion question. According to the book, the helpful factors were: the water of the River Indus and fertile land which promoted agriculture; trade through bull carts and boats; the system of measurement and weights which made trade easy; town planning and the cleanliness system; skilled craftsmen and handicrafts (pots, cloth,

jewellery, seals).

Question: A. 2. (iii) Explain those tools which the inhabitants of the Indus Valley Civilisation used, and make a list of the tools used for the importance of their work.

Answer: Tools — needles (for sewing cloth); fish hooks (for catching fish); axes (for cutting wood); chisels (for carving stone); knives (for cutting food); weights and balance (for weighing); ruler (for measuring). Importance — with these tools, agriculture, sewing of cloth, trade and handicrafts became easy, which improved the economy and life.

Question: A. 2. (iv) What were the causes of the decline of the Indus Valley Civilisation?

Answer: Historians have still not been able to discover the certain causes. The three viewpoints given in the book: (1) Aryan invasion — the Aryans invaded and destroyed the civilisation; (2) Floods — floods in the River Indus forced people to leave their homes; (3) Climate change — change in the monsoon and rise in temperature caused drought, which harmed agriculture and trade and people moved to other places.

Question: A. 2. (v) How did the Indus Valley Civilisation affect the civilisations which came after it?

Answer: This is a discussion question. According to the book: the people of the Indus Valley did not leave big monuments like the people of Egypt and Mesopotamia, but the remains of their cities are still visible today, and even today the people of Pakistan and India use many of their things — such as houses of baked bricks, the cleanliness and drainage system, pots, beads, jewellery and methods of trade. Through these things its effect remained on later civilisations.

Question: A. 2. (vi) Which elements of the Indus Valley Civilisation are still present in Pakistan and India today?

Answer: Houses of baked bricks and houses with courtyards; wells and bathrooms; brick drains and the water drainage system; clay pots; beads and jewellery; bull carts; weaving and sewing of cloth; dice and toys; weights and balances in trade.

Question: B. 1. Sitting in pairs, discuss: one student represents the past and one the present. Discuss the following points in oral conversation.

Answer: This is a discussion activity; it has no single fixed answer. Complete it like this: one student becomes a person of the Indus Valley period and tells about the life of that period (houses of baked bricks, drains, trade, seals), the other student tells about today's life (machines, electricity, mobiles, factories); then both together discuss which things became better and which things were better in the Indus Valley period (for example cleanliness and planning).

Question: B. 2. Compare the culture and lifestyle of the Indus Valley Civilisation with today's Pakistan under the following headings. Give arguments in support of your answer: • Food • Clothes • Professions • Construction • Art • Tools • Government • Religion • Role of men and women in society

Answer: This is a comparison activity; it has no single fixed answer. Compare like this: Food — at that time too they ate grain, fruit and meat, today too the same food is eaten; Clothes — at that time cloth was made by hand, today it is made by machines; Professions — at that time there were farming, handicrafts and trade, today along with these there are new professions like doctor, teacher, engineer; Construction — at that time there were houses of baked bricks, today there are houses of cement and iron; Art — at that time there were statues, seals and jewellery, today too these arts exist; Tools — at that time there were tools of stone, copper and bronze, today there are iron and machines; Government — at that time

there was organised administration of cities, today there is federal and provincial government; Religion — at that time too religion was a part of life, today too it is; Role of men and women — at that time too both men and women worked, today too both share in education, work and home responsibilities.

Question: C. 1. Imagine that you live in the Indus Valley. Draw a picture of your house on a postcard with a river on one side of it. On the other side of the letter, invite your friend to come here so that he may live with you in this valley. Tell your friend the benefits of living near the river.

Answer: This is a creative activity; it has no single fixed answer. Complete it like this: on one side of the postcard draw a house of baked bricks, a courtyard, a well and the River Indus beside it; on the other side write: "Dear friend! Come to my house, there are benefits of living near the river — water for cultivation, fish, boats for trade, cool air and a good place for outings."

Question: Cooperate with others. 1. Working in a group of four, prepare a one-page report on the Indus Valley Civilisation. The report should include the following information: • A map showing the location of the Indus Valley Civilisation. • Culture of the people: food, clothes, professions, construction, art, religion and government. • How was trade done, which things were bought and sold, and what was the nature of foreign trade? • Create a character representing any one word of English, Urdu or Sindhi. After that write a paragraph on it. • Explain how the civilisation reached decline? • Which elements of the Indus Valley Civilisation do we still see in the culture of Pakistan and India today?

Answer: This is a group report activity; it has no single fixed answer. Write the report like this: Map — the River Indus in South Asia, Harappa and Mohenjo-Daro; Culture — food (grain, fruit, meat), clothes (hand-made

cloth), professions (farming, handicrafts, trade), construction (houses of baked bricks, drains, the Great Bath), art (statues, seals, jewellery), religion (religion a part of life), government (organised administration of cities); Trade — through bull carts and boats, sold (pots, beads, cloth, jewellery, seals) and bought (gold, silver, precious stones, wood); Character — for example the character of a "seal": "I am a seal, traders used to stamp me on goods"; Decline — Aryan invasion, floods or climate change (three viewpoints in the book); Elements still present today — houses of baked bricks, drains, pots, jewellery, bull carts, dice.

Question: Creative works. 1. Make a toy using clay, chiuna, etc.

Answer: This is a creative activity; it has no single fixed answer. Complete it like this: make a toy like the toys of the children of the Indus Valley from clay — for example a small cart with wheels, a figure of an animal or a dice — and dry it and colour it.

Question: Technical considerations. 1. Write an email to any friend or relative living abroad in which those two interesting things are mentioned which you have learnt about the Indus Valley Civilisation.

Answer: This is a writing activity; it has no single fixed answer. Write the email like this: "Dear friend! I learnt two interesting things about the Indus Valley Civilisation: (1) Their cities had an excellent system of brick drains and bathrooms; (2) Their traders used seals and their writing has still not been read."

Question: Technical considerations. 2. Run a campaign for the protection of Mohenjo-Daro with the cooperation of your school fellows and teachers.

Write an electronic petition: encourage your friends, family members, fellows and others to sign it. As soon as a thousand are recorded on it, send it to the officials responsible for the protection of the Department of Archaeology.

Answer: This is a practical activity; it has no single fixed answer. Complete it like this: write an electronic petition under the guidance of the teachers — "Mohenjo-Daro is our national heritage, it should be protected"; take signatures on it from friends and family members; when a thousand signatures are done, send it to the Department of Archaeology.

Question: Become a responsible and active member of society. 1. You have come to know through the media that the Department of Archaeology is not looking after Mohenjo-Daro properly. You know something about the Indus Valley Civilisation, therefore write a request for protection to the government's Minister of Culture. Give at least three arguments according to which the minister should play a role.

Answer: This is a writing activity; it has no single fixed answer. Write the request like this: "Respected Minister of Culture! Mohenjo-Daro is our national heritage. There are three reasons for its protection: (1) It is one of the oldest civilisations of the world and is our identity; (2) Its remains help us learn about the past; (3) Its protection will promote tourism and education. Please arrange for its proper care."

Question: Become a responsible and active member of society. 2. Write a letter to a television channel to persuade it for a programme on the Indus Valley Civilisation. Give three arguments to make it practicable.

Answer: This is a writing activity; it has no single fixed answer. Write the letter like this: "Respected channel management! There are three reasons for making a programme on the Indus Valley Civilisation: (1) People will know about their ancient civilisation and feel proud of it; (2) Interest in learning history will arise in students; (3) Visits to places like Mohenjo-Daro will be promoted."

Unit 3, Ch 1: Government

1. (i) The system under which a community governs is called _____.

Answer: government (system of government).

1. (ii) The government makes _____ in order to rule the country.

Answer: laws and public policies

1. (iii) In Pakistan there is a _____, _____ and _____ system of government.

Answer: federal,, parliamentary, democratic

1. (iv) In a federal government, powers are divided between _____ and _____.

Answer: the federal (national), the provincial governments.

1. (v) In the parliamentary system of government, the legislature and the executive branches are not _____.

Answer: separate; the powers of the executive are not separated from the legislature.

Question: 2. Make a table showing three countries in which a federal form of government is in force, three countries in which a parliamentary form of government is in force, and three countries in which a democratic form of government is in force.

Answer: The chapter text names no country at all, so this table cannot be filled from the chapter text. This is a research task: pupils must find such countries from sources outside the book.

Question: 3. (i) Define the term government.

Answer: Government is a group of people which exercises its powers in a country (state). It has the authority to make laws and public policies for the whole country.

Question: 3. (ii) Make a list of the purposes of government.

Answer: The purposes (duties) of government: (1) to protect the lives and property of the citizens; (2) to protect the fundamental rights of the people — the fundamental rights of the citizens are recorded in Pakistan's Constitution of 1973; (3) to provide public services for the betterment of the people, such as education and health services; (4) to protect the ideology and identity of the country; (5) to make trade agreements with other states for the protection of its national interests.

Question: 3. (iii) What is meant by the federal system of government?

Answer: The federal system of government means that powers are divided between the federal (national) and the provincial governments. Each level of government has full powers in several matters, while some powers are shared; for example the federal government has the powers over matters affecting the country as a whole, such as defence, foreign affairs and finance, while the provincial governments have some powers over matters such as education and health. Both the federal and the provincial governments have the power to levy taxes.

Question: 3. (iv) Write the names of the federal units of Pakistan.

Answer: According to the Constitution, the federal units of Pakistan are: the four provinces — Sindh, Punjab, Khyber Pakhtunkhwa and Balochistan; the Federal Capital Territory — Islamabad; Gilgit-Baltistan.

Question: 3. (v) What is the important characteristic of the parliamentary system of government?

Answer: The most distinctive characteristic of the parliamentary system is that the powers of the executive are not separated from the legislature. The Prime Minister itself selects the executive, which forms a cabinet consisting of members of the legislature under the leadership of the Prime Minister; the executive is answerable to the law-making assembly.

Question: 3. (vi) How do people elect their representatives in a democratic form of government?

Answer: In a democratic form of government people elect their representatives through democratic elections: not everyone can govern itself, so people elect their representatives through elections. All adult citizens have the right to take part (to vote) in free, fair and regularly held elections.

Question: B-1. Find three countries whose system of government is like Pakistan's — federal, parliamentary and democratic.

Answer: The chapter text gives no names of such countries, so this answer cannot be given from the chapter text. This is a research task: pupils must find three countries from sources outside the book in which a federal, parliamentary and democratic system exists at the same time.

Question: C-1. Working together in groups of four: How far has the government succeeded in achieving its purposes? What is the way of checking this? Tell any three suggestions which fulfil the purpose of the establishment of government in a better way.

Answer: This is a group-discussion task; no single fixed answer is given in the chapter. According to the chapter material, the way to check is: judge the government against its own purposes — were the lives and property of the citizens protected? Were the fundamental rights protected? Were public services such as education and health received? Was the ideology and identity of the country protected? Were the national interests protected? The suggestions should also be drawn from those same purposes, for example improving public services, strengthening the protection of rights, and involving the public more in decisions.

Unit 3, Ch 2: Structure and Functions of the Federal Government

1. (i) The three branches of government are _____, _____ and _____.

Answer: the legislature, (law-making), the executive, the judiciary.

1. (ii) Parliament, or the law-making branch, consists of two houses: _____ and _____.

Answer: the National Assembly (lower house), the Senate (upper house).

1. (iii) The head of the government is _____.

Answer: the Prime Minister. (The President is the head of the state.)

1. (iv) The Prime Minister nominates the cabinet from among the members of the _____.

Answer: National Assembly.

1. (v) The highest court of Pakistan is the _____.

Supreme Court.

Question: 2. Make a table in which the duties of all the branches of government are stated.

Answer: Table (in written form): (1) Legislature (law-making branch) — making new laws and improving existing laws; apart from a finance bill, only the National Assembly can approve a law; representing the people; checking and supervising the powers of the executive; selecting and training future leaders; holding the government answerable. (2) Executive — ensuring the enforcement of the law; implementing policies; running the day-to-day work of the government; maintaining law and order; taking

emergency action in emergency situations; enforcing the law and restoring public confidence for political and social stability in the country. (3) Judiciary — providing justice; interpreting the law; protecting and defending the Constitution; deciding disputes between the federal and provincial governments; deciding provincial disputes; hearing appeals against the decisions of the subordinate courts; taking suo motu action in important matters; reviewing the laws passed by Parliament; advising the federal government on constitutional and judicial matters; the decision of the Supreme Court is binding on the federal and provincial governments; protecting the fundamental rights of the citizens in accordance with the Constitution of 1973.

Question: 3. (i) Write the names of the branches of government and their important work.

Answer: (1) Legislature (law-making branch) — making laws; Parliament consists of two houses: the National Assembly and the Senate. (2) Executive — enforcing the law and running the government; it includes the President and the Prime Minister; the Prime Minister is the head of the government. (3) Judiciary — doing justice and interpreting the law; it includes the Supreme Court, the High Courts, the Federal Shariat Court and the subordinate courts.

Question: 3. (ii) Make a list of the duties of the law-making branch.

Answer: The duties (work) of Parliament: (1) Legislation — the basic work of Parliament is to make new laws and improve existing laws; apart from a finance bill, every kind of law is proposed and approved in the National Assembly; laws are debated before approval. (2) Representation — the members of the National Assembly do the work of contact between the people and the government; they are the representatives of the people and their important responsibility is to inform the people. (3) Checking and

supervision — the assemblies supervise the powers of the executive so that it remains responsible and answerable; to perform this duty, oral or written questions are regularly asked of the ministers, which are asked in the assembly if they are against the public interest. (4) Selection and training — the assemblies do the work of selecting future leaders and training them; in a parliamentary system like our country, the ministers continue their membership of the assembly along with their executive office; in this way they prepare themselves for future leadership. (5) Answerability — the assemblies review the work being done by the government and keep the people ready so that they keep an eye on the rule of law and the Constitution.

Question: 3. (iii) Explain the purpose of the establishment of the Senate.

Answer: The Senate is a permanent law-making institution which guarantees continuity in national affairs. It makes laws, keeps an eye on the executive, represents equality among the provinces and promotes harmony, which is essential for the progress and stability of the country. The Senate has 104 members; the term of its members is six years, although elections for half of its members are held again after three years.

Question: 3. (iv) How are the members of the National Assembly elected?

Answer: The total number of members of the National Assembly is 342. 272 are elected for a term of five years; the remaining 70 members (among whom are 60 women and 10 non-Muslims) are elected in proportion to the seats won by the political parties. Political parties take part in the elections; for the elections the political parties select their representatives; on election day people vote in their constituency for the representative of their choice; after the election the votes are counted; the candidate receiving the most votes is made a member of the National Assembly (MNA).

Question: 3. (v) Who forms the executive in the federal government?

Answer: In the federal government the Prime Minister forms the executive: the cabinet, in which the Prime Minister and the ministers are included, has its ministers selected from among the members of the National Assembly so that they run the different ministries. The executive branch includes the President and the Prime Minister; the Prime Minister is the head of the government, while the President has the status of head of the state along with a few responsibilities.

Question: 3. (vi) Explain the importance of the judiciary.

Answer: The importance of the judiciary is that it provides justice in society, interprets the law, protects and defends the Constitution, and protects the rights and freedoms of the citizens. The decision of the Supreme Court is binding on the federal and provincial governments, and it protects the fundamental rights of the citizens in accordance with the Constitution of 1973. According to the chapter activity: write a few sentences about why justice is necessary for society — without justice, peace, trust and the protection of rights are not possible in society.

Question: 3. (vii) Write the similarity and the difference found between the federal and provincial governments.

Answer: Similarity: like the federal government, the provincial governments are also organised in the same three branches (legislature, executive and judiciary); their duties are the same, although their administration is separate. Differences: (1) Law-making branch — the federal legislature consists of two houses (National Assembly and Senate), whereas the provincial legislature has only one house, called the Provincial Assembly. (2) Executive — the heads of the federal executive are the President and the Prime Minister, whereas the heads of the provincial executives are the Governor (head of the province) and the Chief Minister

(head of the provincial government); the provincial cabinet consists of provincial ministers. (3) Judiciary — the biggest court of the federal judiciary is the Supreme Court, whereas the biggest court of a province is the High Court; the subordinate courts are included under the High Court.

Question: 3. (viii) Review the fundamental rights in the Constitution of Pakistan and write five rights which in your opinion are very important.

Answer: The chapter text gives no list of the fundamental rights — the chapter only states that the fundamental rights of the citizens are recorded in the Constitution of 1973 and that it is the duty of the government to protect them. Therefore the five rights must be drawn from the chapter's own statements, as given in Chapter 1 among the duties of government: (1) protection of life and property; (2) protection of fundamental rights (such as freedom of expression and access to information); (3) receiving public services such as education and health; (4) equality before the law — the law is supreme over all, and in its eyes all citizens are equal; nobody is above the law; (5) the democratic right — to vote in free, fair and regularly held elections and to elect one's representatives. This selection will be according to the pupil's own opinion; the chapter has no fixed list of five rights.

Question: B-1. In a small group of four, make a diagram to explain the difference between the following: the law-making branch of the federal and provincial governments; the members of the executive branch of the federal and provincial governments; the judicial system of the federal and provincial governments.

Answer: Diagram (in written form): (1) Law-making branch — Federal: Parliament, two houses (National Assembly + Senate); Provincial: one house (Provincial Assembly). (2) Members of the executive branch — Federal: President + Prime Minister + federal cabinet (ministers) + federal

secretary; Provincial: Governor + Chief Minister + provincial cabinet (provincial ministers) + Chief Secretary. (3) Judicial system — Federal: Supreme Court (the biggest court) + Federal Shariat Court + special tribunals; Provincial: High Court (the biggest court of the province) + subordinate courts (including session courts and magistrates' courts).

Unit 3, Ch 3: Local Government

Question: 1. (i) What is local government?

Answer: Local government is the lowest level of government, which runs the administration of a single district, tehsil and union council. This government is formed of the elected representatives of the people. Local government gives people the right and authority to decide in matters affecting them.

Question: 1. (ii) Describe the structure of local government.

Answer: Under the Sindh Local Government Act 2013, the local government system provides a three-tier system: these include the District Council, the Tehsil Council and the Union Council. To run the government of each level (tier) there are elected Chairmen and Vice-Chairmen; all members of the local government are answerable to the Chairman, who is an elected office-holder. In big cities they are called Mayor and Deputy Mayor. The urban system includes the Metropolitan Corporation, Municipal Corporation, Town Committee and Union Committee.

Question: 1. (iii) Differentiate between the powers of the Tehsil Council and the Union Council.

Answer: Union Council: it is the basic tier of local government, consisting of villages; its responsibilities are: registering the births, deaths and marriages of children; repairing inns, drains and small roads; managing the cleaning of drains and toilets etc.; working in agriculture, industry, trade, workshops, education and other matters. Tehsil Council: it is the tier of local government at the tehsil level; its responsibilities are: approving development projects; approving the annual budget; providing,

supervising and managing services; informing the district about the performance of the government offices located in the tehsil.

Question: 2. Make a table to explain the administrative structure of local government.

Answer: Table (in written form): (1) Union Council — the basic tier of local government, consisting of villages; head: elected Chairman and Vice-Chairman. (2) Tehsil Council — the tier of local government at the tehsil level; head: elected Chairman and Vice-Chairman. (3) District Council — the tier of local government at the district level; head: elected Chairman and Vice-Chairman. (4) Urban system — Metropolitan Corporation, Municipal Corporation, Town Committee, Union Committee; heads in big cities: Mayor and Deputy Mayor. Elections: elections for the general seats of the Union Councils are direct, whereas elections for the reserved seats of women, farmers, labourers and minorities are indirect; the Chairmen of the Union Councils render services for a term of four years.

Question: B-1. Make a small group and discuss the role of local government in it.

Answer: This is a group-discussion task. Points for discussion according to the chapter material: the purposes and objectives of local government — to extend the responsibilities of the state for the citizens to some extent; to transfer powers to the lower level so that the problems of the people are solved; to give the people opportunities to decide in matters affecting their lives; to give the local population the opportunity to allocate resources for necessary development and their facilities; to provide a strong foundation for practising democracy. The duties of local government — preparing annual development plans and budgets, collecting taxes and providing facilities to the citizens through the

establishment of different committees; public services such as cleaning of cities, repair, public parks, schools, hospitals, supply of drinking water and electricity and looking after them.

Question: C-1. Bring forward three local problems which the local government has not solved so far.

Answer: This is a research task; the chapter text gives no three problems of any particular area, so the answer must come from the pupils' own observation of their area. According to the chapter material, such problems can be from the areas of responsibility of local government: cleaning of cities, repair of roads and drains, public parks, schools, hospitals, supply of drinking water and electricity and looking after them.

Unit 3, Ch 4: Elections

1. (i) In Pakistan, general elections are held after every five years.

1. (ii) In Pakistan the age of a voter is _____ years.

Answer: 18 years — every Pakistani citizen whose age is more than eighteen years and whose name is included in the voters' list is eligible to vote.

1. (iii) In Pakistan the minimum age of a representative is _____ years.

Answer: 25 years (thirty years or more for the Senate).

1. (iv) The institution responsible for holding elections in the country is called _____.

Answer: the Election Commission of Pakistan (ECP).

Question: 2. Make a table explaining the role of the Election Commission, political parties, media and citizens in elections.

Answer: Table (in written form): (1) Election Commission of Pakistan (ECP) — an independent institution whose work is to hold clean, transparent and fair elections of the National Assembly, Senate, Provincial Assemblies and the institutions of local government; it includes one Chief Election Commissioner and four members; its duties include: holding elections in a transparent and fair manner according to the law; announcing the elections; conducting the elections; preparing a correct voters' list; delimiting constituencies; encouraging the voters; providing facility to all so that they can benefit from new election technology; establishing relations among the participants; and continuing work on electoral reforms in Pakistan. (2) Political parties — helping voters obtain the national identity card; helping voters get their names entered in the electoral rolls;

providing candidates of their choice and the party manifesto; informing the people of the party's stance on their problems and difficulties and showing that if they succeed they will solve their problems and promising to act on the manifesto; persuading the people to vote in favour of their party's candidate; arranging to bring the voters out on election day; appointing their agents at the polling stations on election day so that they can guide the people in casting votes. (3) Media — broadcasting the pictures and news of all political parties and candidates in an informed and impartial manner; providing information about the positions of the candidates and their parties with reference to important public problems and matters; asking the candidates difficult questions about public problems; holding debates between the candidates of different political parties; immediate publication of the election results. (4) Citizens — voting in local, provincial and national elections; becoming a member of a political party; becoming a candidate for public office; helping the election campaign by giving financial support; helping voters to come out on election day; playing the role of an observer on election day.

Question: 3. (i) Define the terms "election", "constituency" and "representative".

Answer: Election: all the citizens of the state have the right to vote at a specific time; the process under which the people of an election constituency use their vote and elect their representatives is called an election. Constituency: the area/constituency all of whose citizens have the right to vote at a specific time and whose people elect their representative. Representative: the person who is elected for the law-making assembly; representatives are elected to make laws and decide about the other affairs of the state on behalf of the people.

Question: 3. (ii) Arrange a list of the ways by which citizens can improve

their society.

Answer: Citizens can improve their society by these ways: (1) staying informed about their village, town or city through newspapers, radio, television and the internet; (2) writing a letter to their MNA / MPA; (3) obtaining membership of a Community Based Organisation (CBO) for the betterment of the community; (4) keeping their community clean and green; (5) obeying the law; (6) signing a memorandum whose purpose is to take a step against the responsible people; (7) expressing through peaceful demonstrations, sit-ins, boycotts and other ways; (8) serving the country by joining the military or other institutions. Ways of taking part in elections: voting in local, provincial and national elections; becoming a member of a political party; becoming a candidate for public office; helping the election campaign by giving financial support; helping voters to come out on election day; playing the role of an observer on election day.

Question: B-1. Find out who the MPA and MNA of the area you live in are, and to which political party they belong. Find out what the manifesto of their party is with reference to education. If that party is in power, is it doing everything for the promotion of education in Pakistan, especially Sindh, which it promised?

Answer: This is a research task; its answers depend on the pupil's own area and are not given in the chapter text. The method of checking according to the chapter material: find out the names and party of the MPA / MNA of your area; look at the promises about education in the party's manifesto; then compare those promises with practical steps — has work been done for the promotion of education? The chapter states that the work of political parties is to inform the people of the party's stance and promise to act on the manifesto, and the work of the voters is

to keep an eye on their performance.

Question: C-1. Hold an election to select the monitor of your class. Nominate three candidates. All three should prepare their own manifesto in which they state what they will do for the pupils of the class. Give them the opportunity to run their campaign and ask the pupils for votes. Hold the election, count the votes and announce the winner.

Answer: This is a practical activity; it has no book answer. The method according to the chapter material: nominate three candidates; each candidate writes his/her manifesto (what he/she will do for the pupils of the class); run the campaign and ask for votes; complete the election by voting, counting the votes and announcing the result — exactly as happens in real elections: candidate, manifesto, campaign, vote, counting and result.

Unit 3 End Exercises

Question: (Unit-end exercise) 1. Match the public office given in Column A with the role given in Column B. Column A: Prime Minister of Pakistan | Chairman of the Senate | President of Pakistan. Column B: Represents the President when the President goes abroad. | Plays a global role in state ceremonies and foreign visits, and signs legislation and agreements. | Is the leader of the house of the National Assembly.

Answer: Matching: Prime Minister of Pakistan — Is the leader of the house of the National Assembly. Chairman of the Senate — Represents the President when the President goes abroad. President of Pakistan — Plays a global role in state ceremonies and foreign visits, and signs legislation and agreements. Note: the acting-president role of the Chairman of the Senate is not stated explicitly in the chapter text; this match follows by elimination of the remaining options.

Question: (Unit-end exercise) B-1. Find out the members of the National and Provincial Assemblies elected from your district in the 2013 general elections.

Answer: This is a research task; its answers depend on the pupil's own district and are not given in the chapter text. Method: find out the members of the National and Provincial Assemblies elected from your district in the 2013 general elections from the Election Commission's record or from newspapers.

Question: (Unit-end exercise) B-2. Find out the federal or provincial ministers belonging to your district.

Answer: This is a research task; its answers depend on the pupil's own district and are not given in the chapter text.

Question: (Unit-end exercise) C-1. Make a group and discuss in it the powers of the Supreme Court, including the power of reviewing a law passed by Parliament.

Answer: This is a group-discussion task. Points for discussion according to the chapter material: the Supreme Court reviews the laws passed by Parliament; the Supreme Court protects and defends the Constitution of 1973; the decision of the Supreme Court is binding on the federal and provincial governments; the Supreme Court decides disputes between the federal and provincial governments.

Question: (Unit-end exercise) D-1. Arrange a clear group in which a debate is held on the topic of foreign policy, for example the deterioration in relations between Pakistan and India because of Indian aggression in Kashmir.

Answer: This is a debate activity; it has no book answer. According to the chapter material: foreign affairs are the responsibility of the federal government; the government makes trade agreements with other states for the protection of its national interests; both sides' points must be presented in the debate.

Question: (Unit-end exercise) W-1. Devise a procedure for online complaints about the ineffective provision of facilities by the local government.

Answer: This is a practical activity; it has no book answer. According to the chapter material: the responsibility of local government is the provision of public services (cleaning of cities, repair of roads and drains, parks, schools, hospitals, drinking water and electricity); the complaint procedure should concern those same services, and the complaint should reach the members of the local government or the complaints centre.

Question: (Unit-end exercise) Z-1. Exchange views with your friends on

Facebook about the online procedure and obtain positive feedback from them.

Answer: This is a practical activity; it has no book answer. Method: share the complaints procedure given above with friends on Facebook, take their opinions, and improve it in the light of the positive feedback.

Question: (Unit-end exercise) Y-1. Write a letter to the news editor of a newspaper in which you mention the shortage of water in your area.

Answer: This is a practical activity; it has no book answer. According to the chapter material, the letter should include these points: the problem of water shortage in your area; the supply of water is the responsibility of the local government; a request to the concerned authorities to solve the problem.

Unit 4, Ch 1: Media - Understanding and Role

1. (i) The different means (channels) of communicating with others are called _____.

Answer: media.

1. (ii) The use of electric means for contact with others is called _____.

Answer: electronic media.

1. (iii) One means of media or communication is _____.

Answer: newspapers. (Media includes newspapers, TV, radio, journals, billboards, film, phone and the internet.)

1. (iv) A message read through a signalling machine is called _____ digital media.

1. (v) Information transferred in paper form is called _____ print media.

1. (vi) Contact between people through internet and telephone technology is called _____.

Answer: social media.

Question: 2. Make a table explaining the different roles of the media.

Answer: Table (in written form): (1) News and information — media is the medium which conveys news and information about the affairs and events occurring in our country and around us; it keeps us informed of the latest state of social, political and economic affairs and tells us about the current situation and coming natural disasters so that we can adopt suitable precautionary measures. (2) Education — the reach of the media is so wide and broad that it can be used for the work of education; the media presents educational programmes to give children the alphabet, numbers and other information about the world; programmes on science,

technology, literature and politics are presented for the education of adults; the internet is playing a direct educational role. (3) Increase in awareness — the most important role of the media is to increase the awareness of people about social, political and economic affairs. (4) Entertainment — media is a source of entertainment for people; it includes audio (radio), visual (TV, cinema) and print media (journals, newspapers, books and cartoons etc.); the use of media for entertainment is increasing day by day. (5) Public announcements — companies and institutions need the media to convey information and messages to the public; for example a warning about the spread of an epidemic, about delay in medicines, or about elections and the promotion of democracy. (6) Advertisements — the media also plays an important role in advertising goods and services; business institutions take the help of the media for the sale of their goods; advertisements encourage consumers to buy goods. (7) Expression of opinion — in the past viewers had very few opportunities to give their opinion on the suggestions and comments appearing in the media; now they have the opportunities to write letters to the editor in newspapers, take part in discussions on radio and television, and comment online.

Question: 3. (i) Define the term media with examples.

Answer: Media are those means of communication through which news, information, entertainment, education and valuable messages are spread; they are called the means of mass communication. Examples: newspapers, TV, radio, journals, billboards, film, phone and the internet.

Question: 3. (ii) Explain the different forms of media.

Answer: There are four forms of media: (1) Print media — communication through paper or hard cloth; it includes newspapers, journals and books. (2) Electronic media — communication through electric (electronic) means; it includes television and radio. (3) Digital media — the media

which is understood through numerical signals by means of a machine; this media can be seen, made, stored and improved on computers; it includes websites, email and the internet. (4) Social media — communication through social contact; because of the mobile phone and the internet, users exchange the promotion of information, ideas, pictures and videos through it; examples: WhatsApp, Facebook, Twitter, LinkedIn, Google and YouTube.

Question: 3. (iii) Explain how the internet plays the role of media.

Answer: The internet is playing a direct educational role — it provides people of every age the opportunity to learn by themselves about different topics. The internet is a part of digital media (website, email, internet), and social media also runs through the internet, by which information is promoted and exchanged, and ideas, pictures and videos are exchanged.

Question: 3. (iv) Identify a social, political or economic problem which is under discussion in the media.

Answer: The chapter text gives no particular current problem which is under discussion in the media; therefore it has no book answer. This is an observation task: the pupil must choose a problem from the newspapers, TV, radio or internet which is under discussion in the media at that time, and identify it.

Question: 3. (v) Explain the role of the media in increasing awareness of those matters.

Answer: Increasing awareness is the most important role of the media: the media increases the awareness of people about social, political and economic affairs. It provides them information about such matters and suggestions of steps to obtain them. Many social problems were highlighted through the media so that people tried to solve them; the media provides important information about political matters, steps and

scenes; in this way people can understand their rights better and make correct decisions; through increasing awareness the media is playing a role in the building and progress of society.

Question: 3. (vi) In the light of your own experiences, tell what help the media gives in educating the public.

Answer: According to the chapter material: the reach of the media is so wide and broad that it can be used for the work of education. The media presents educational programmes to give children the alphabet, numbers and other information about the world; programmes on science, technology, literature and politics are presented for the education of adults; special programmes are broadcast on radio and television on special people and topics important for them; the internet is playing a direct educational role and gives people of every age the opportunity to learn by themselves about different topics. (The "your own experiences" part is the pupil's own; the answer above is based on the chapter material.)

Question: B-1. Tell the different forms and work of social media and identify its three advantages and three disadvantages.

Answer: Forms of social media (examples): WhatsApp, Facebook, Twitter, LinkedIn, Google and YouTube. Work: because of the mobile phone and the internet, users exchange the promotion of information, ideas, pictures and videos through it. Note: the chapter gives no list of three advantages and three disadvantages of social media. The chapter mentions the general benefits of media (news and information, education, increase in awareness, entertainment, public announcements, advertisements, expression of opinion); there is no list of disadvantages in the chapter, so they cannot be given from the chapter text.

Question: B-2. Compose a message of public welfare on some recent

social evil or disease and display it at a prominent place in the class or school.

Answer: This is a practical activity; it has no book answer. Method according to the chapter material: use the public-announcements role — such as a warning about the spread of an epidemic or a message about delay in medicines; write the message and display it at a prominent place in the class or school.

Question: C-1. Work together in small groups of four for the research of part "B" of this exercise.

Answer: This is a group activity; the material is the same as in question "B" above — the forms and work of social media, and the message of public welfare — to be prepared together in the group.

Unit 4, Ch 2: Media in a Democratic Society

1. (i) The media helps in protecting and promoting the rights of _____ and _____.

Answer: freedom of expression, access to information.

1. (ii) When the media reports about some action of public office-holders, it is playing the role of a _____.

Answer: guardian (watchdog).

1. (iii) Access to information helps citizens in making correct decisions about _____ on public offices.

Answer: the personalities holding

1. (iv) If the media has to play a correct role, it should be _____ and _____.

Answer: free, impartial.

Question: 2. (i) What is the importance of the media in a democratic society?

Answer: The importance of the media in a democratic society is this: democracy demands that citizens have the right to freedom of expression and access to information; the media plays an important role in establishing a healthy democratic state; it keeps people informed of the work of public office-holders and keeps an eye on their performance; it helps people make correct and responsible decisions in elections; it brings transparency in public affairs and gives the government an opportunity to reform.

Question: 2. (ii) How does the media strengthen the right to freedom of expression and the right to access to information?

Answer: Article 19 of the Constitution says: every citizen shall have the

right to freedom of speech and expression, and the media shall be free; Article 19(A) says: keeping in view the reasonable restrictions imposed by the law, every citizen shall have the right to access to all matters of public importance. The media strengthens these rights in this way: it provides information to the citizens; it keeps them informed of the performance of public office-holders; it gives people the opportunity to express their opinion; it makes the office-holders answerable.

Question: 2. (iii) Why should the media be free and impartial?

Answer: The media should be free and impartial so that it can expose corruption and motivate the administration to take steps. The media being free and impartial means that the media — that is, radio, television, newspapers or the internet — are free from the control of the government; and apart from the threats and pressure of the media (publicity), the freedom of the media should be protected through laws so that, free from the fear of any punishment and harm, it can work openly for public rights.

Question: 2. (iv) What restrictions does the Constitution of Pakistan place on freedom of expression?

Answer: According to Article 19 of the Constitution, these reasonable restrictions can be imposed by law on freedom of expression: with reference to the glory of Islam, the security of Pakistan or any part of it, defence, friendly relations with foreign states, public order, decency and morality, or contempt of court, and incitement to commit an offence.

Question: 2. (v) List the duties of PEMRA.

Answer: In 2002 the Pakistan Electronic Media Regulatory Authority (PEMRA) was created to run the electronic media in Pakistan according to regulations. Its important objectives (duties) are: (1) to raise the standard of information, awareness and entertainment; (2) to increase the opportunities available in Pakistan with reference to the choice of news,

latest conditions, science and technology, music, sports and drama etc.; (3) access of communication to the local community through the transfer of authority and responsibilities to the first level; (4) to ensure accountability, transparency and better governance through the provision of free information.

Question: B-1. Watch a news programme and a talk show (discussion) on television and tell how these programmes inform ordinary people about the government.

Answer: This is an observation activity; the answer about any particular programme is not given in the chapter text. The method of checking according to the chapter material: does the programme tell about the work and performance of public office-holders? Does it keep an eye on the steps of the government and convey them to the people? Does it bring transparency in public affairs? Does it help people make correct decisions in elections? The programme is to be judged on these very points.

Question: C-1. Together with your parents, make a list of those achievements of the media which it has done for the promotion of democracy in Pakistan — give at least one example with reference to each achievement.

Answer: This is a home activity; the answer about any particular achievement or example is not given in the chapter text. According to the chapter material, the achievements can be: keeping the people informed of the work and performance of public office-holders; exposing corruption; bringing transparency in public affairs; helping people make correct decisions in elections; giving the government an opportunity to reform. The examples are to be given from one's own observation and discussion with parents.

Unit 4, Ch 3: Demands of Media

1. (i) Sometimes the media does not only give information, but gives us _____.

Answer: an opinion (its own point of view).

1. (ii) A fact can be _____.

Answer: proved — facts can be seen and tested directly.

1. (iii) The tendency to give preference to a person, group or point of view over another is _____.

Answer: bias (partiality).

1. (iv) The technique of using information to arouse emotions is called _____.

Answer: arousing emotions (a technique of propaganda).

1. (v) When all men or women behave in the same manner, it means that this is an example of _____.

Answer: stereotyping.

Question: 2. Make a table: in Column A list the techniques used for providing wrong information; in Column B write the definitions, and in Column C give examples.

Answer: Table (in written form) — common techniques of propaganda: (1) Card stacking — by bringing forward already selected and uncounted public interests, the biggest fault is brought forward. (2) Name-calling — lowering someone's reputation by using negative words. (3) Bandwagon — phrases such as "everyone is like this" or "everyone does this". (4) Arousing emotions — using information to arouse emotions. (5) Transfer — attributing the status or dignity of one thing to another thing so that it too appears dignified; or attributing the fault of one thing to another so that it

too is shown as bad. (6) Glittering generality — presenting a personality in an extremely positive way. (7) Testimonial — praising an idea with reference to a well-known and famous personality. (8) Plain folks — bringing forward an ordinary personality so that ordinary people can be reached and their views can be supported. Note: the chapter gives no separate concrete example for each technique; the statements above are based on the chapter's own definitions.

Question: 3. (i) Why is it necessary to have the ability to distinguish between fact and opinion?

Answer: It is necessary because the information provided by the media can be incomplete and misleading. When news and information are given, the media sometimes presents its own opinion instead of presenting the facts, which is not a proper method. Therefore it is necessary that we can distinguish between every fact and opinion; instead of immediately accepting the information obtained, we should first investigate and research, and then decide according to our own thinking and understanding which thing in it should be accepted as correct according to our own opinion and view.

Question: 3. (ii) Write the different forms of bias (partiality) in the media and one example of each.

Answer: To test the bias of the media, the chapter gives these questions (each with an explanation and an example): (1) Deliberate mistake — find out whose point of view has been presented. Example: presenting only one party's point of view, without including the point of view of all sections of society. (2) Selection of the event — find out which event's report is being broadcast repeatedly. Example: broadcasting the report of the same event repeatedly. (3) Choice of source — find out who the sources of information are. Example: taking information only from those sources

which hold the same point of view. (4) Name-calling — find out whether one party has been declared good and the other bad. Example: using good words for one party and bad words for the other. (5) Placement of events — find out what prominent place has been given to the events. Example: giving a prominent place to one event and keeping the other behind. (6) Length or depth — find out how the proportion of a news item has been estimated. Example: giving much time to one news item and very little to another. (7) Urban bias — although our country has many cultural and moral values, urban areas are highlighted in the media; example: giving priority to the news of cities over the news of villages. Note: in the chapter the forms of bias are given in the form of these questions, not with separate names and concrete examples; the examples above explain those questions.

Question: 3. (iii) Define the term stereotyping. Give three examples of it, as women in Sindh are stereotyped.

Answer: Definition of stereotyping: stereotyping is a general characteristic which is presented with exaggeration about a group and applied to all the members of that group; for example, seeing all the members of a group in the same way. Three examples of gender stereotyping given in the chapter: (1) "Women look after the house" — the work of women is only to look after the house and train the children. (2) "Men run the house" — only men earn and go out of the house. (3) The division of work between men and women is fixed — men are for outside work and women are for house work. Note: the chapter gives no Sindh-specific example; the examples above are from the chapter's general gender-stereotyping section.

Question: 3. (iv) What is propaganda? How can it harm a purpose or a benefit?

Answer: Propaganda: a systematic effort made to promote one's own

ideology or point of view is called propaganda. It is done to influence the attitudes of people, whose purpose is to harm some ideology or point of view. Harm: through distorted and biased information, a particular way of thinking is strengthened; sometimes unnecessary messages are also included, which bring forward some emotional or rational reaction or action about the information provided — in this way people form a wrong opinion without research and make wrong decisions.

Question: 3. (v) List the names of the different techniques of propaganda and their examples.

Answer: The common techniques of propaganda (names and explanations — with examples given in the table in Question 2 above): card stacking; name-calling; bandwagon; arousing emotions; transfer; glittering generality; testimonial; plain folks. The definition and explanation of each technique is given in the answer to Question 2 above; the chapter gives no separate concrete example for each technique.

Question: B-1. The important purpose of advertising is to persuade people to buy goods. For this work only the good aspect is highlighted in the advertisement. Identify four examples of bias in any four advertisements published in a journal.

Answer: This is an observation activity; the answers about the advertisements of any particular journal are not given in the chapter text. Method according to the chapter material: the role of advertisements is that they encourage consumers to buy goods; to test bias use these questions: has only one aspect been shown in the advertisement? Has one party been declared good and the other bad? Is the information incomplete or misleading? Examples of bias in four advertisements are to be found on these very points.

Question: C-1. Working together with a small group, do the research told in

part "B". Each one of you should select an advertisement and identify the bias found in it. Work together to prepare a suitable and balanced advertisement and identify its requirements.

Answer: This is a group activity; the material is the same as in "B-1" above — each pupil selects an advertisement and identifies the bias in it; then the group together prepares a suitable and balanced advertisement, in which the information is complete and unbiased and not only the good aspects but correct information is given.

Unit 4 End Exercises

Question: 1. Match the terms of Column A with the definitions given in Column B. Column A: Bias (partiality) | Fact | Media | Propaganda | Social media. Column B: The means of communication by which news, information, entertainment and education are spread. | Communication through social contacts. | An event which has happened and which can be tested. | Giving preference to a person, group or point of view over others, even in a wrong way. | Spreading opinions and ideas through organised efforts (whether by play or script).

Answer: Matching: Bias (partiality) — Giving preference to a person, group or point of view over others, even in a wrong way. Fact — An event which has happened and which can be tested. Media — The means of communication by which news, information, entertainment and education are spread. Propaganda — Spreading opinions and ideas through organised efforts (whether by play or script). Social media — Communication through social contacts.

Question: 2. (i) What is the role of the media in society?

Answer: The roles of the media in society are: conveying news and information; giving education; increasing awareness; providing entertainment; making public announcements; giving advertisements; giving the opportunity to express opinions. The most important role is to increase the awareness of the people.

Question: 2. (ii) How does the media encourage the rights of freedom of expression and access to information?

Answer: Article 19 of the Constitution gives every citizen the right to freedom of speech and expression, and the media is free; Article 19(A)

gives every citizen the right of access to matters of public importance. The media encourages these rights in this way: it provides information to the citizens; it keeps them informed of the performance of public office-holders; it gives people the opportunity to express their opinion; it makes the office-holders answerable.

Question: 2. (iii) How does the media give incomplete and misleading information, and why is awareness of these methods necessary?

Answer: The media gives incomplete and misleading information by these methods: bias (partiality) — presenting the point of view of one party only, selection of the event, choice of source, name-calling, placement of events, length or depth; stereotyping — presenting all the members of a group in the same way; propaganda — strengthening a particular way of thinking through distorted and biased information. Awareness of these methods is necessary so that people do not form a wrong opinion without research and do not make wrong decisions; before accepting information, investigation and research should be done.

Question: B-1. Interview people of the media and ask them in which media they work and whether that media is promoting democracy in Pakistan.

Answer: This is an interview activity; its answers depend on the people interviewed and are not given in the chapter text. Points to ask according to the chapter material: in which media (print, electronic, digital, social) do you work? Does your media keep the people informed of the work of public office-holders, bring transparency, and help people make correct decisions in elections?

Question: C-1. Write a report of some event of your school. Paste pictures and write captions under them.

Answer: This is a practical activity; it has no book answer. According to the chapter material, the report should keep a distinction between fact (the

event which happened and which can be tested) and opinion; the information should be complete and unbiased.

Question: D-1. Make an advertisement for buying and selling chocolate or biscuits. One of you should do the work of selling it, and the other should record it on a mobile phone and upload it on the internet.

Answer: This is a practical activity; it has no book answer. According to the chapter material: the purpose of an advertisement is to persuade people to buy goods; the information in the advertisement should be correct and complete, not only the good aspects — bias should be avoided.

Question: W-1. Together with your classmate, prepare an advertisement for TV. Also prepare a name for the advertisement and a short jingle (Jingle) for its sale.

Answer: This is a practical activity; it has no book answer. According to the chapter material: the information in the advertisement should be correct and complete; bias (showing only the good aspects) should be avoided.

Question: Z-1. Email the report prepared in part "C" of this exercise to your headmaster, teacher and classmates.

Answer: This is a practical activity; it has no book answer. Method: send the report of the school event prepared in "C-1" by email to the headmaster, teacher and classmates. (Email is a part of digital media.)

Question: Y-1. Inform anyone in your family about the methods which the media uses to spread misleading and harmful information. Give different examples to make them understand.

Answer: This is a practical activity; its material is taken from the chapter material: the misleading methods of the media — bias (one party's point of view, selection of the event, choice of source, name-calling, placement of events, length or depth); stereotyping (presenting all the members of a group in the same way); techniques of propaganda (card stacking,

name-calling, bandwagon, arousing emotions, transfer, glittering generality, testimonial, plain folks). Give examples from the chapter's definitions and explanations to make the family understand; specific new examples are not given in the chapter.

Unit 5, Ch 1: The South Asia Region

1. (i) The South Asian region consists of _____ countries.

Answer: eight countries: Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka.

1. (ii) A piece of land which has common characteristics is called _____.

Answer: a region.

1. (iii) The north, north-west and north-east of South Asia are surrounded by _____.

Answer: mountain ranges.

1. (iv) To the south of Pakistan lies the Arabian Sea.

1. (v) South Asia is a region because it has _____, _____ and _____ characteristics.

Answer: common, physical, human, historical

Question: 2. Make a table with the names of the South Asian countries in one column and in the second column their landforms, common characteristics of the inhabitants, climate, history and form of government. Then underline their similarities.

Answer: Table columns: Country | Landforms | Common characteristics of inhabitants | Climate | History | Form of government. Example: Pakistan — mountains in the north, plains, Arabian Sea; majority Muslim; hot and dry climate; under British rule until 1947; democracy. India — Himalayas, Deccan Plateau, plains; multi-religious; monsoon climate; under British rule until 1947; democracy. Similarities: common physical characteristics, common history (British rule until 1947) and common culture.

Question: 3. (i) Define the term region.

Answer: A region is a piece of land which has common physical or human characteristics, such as mountains, forests, wildlife and climate (physical), or language and form of government (human).

Question: 3. (ii) Write the names of the countries which are included in South Asia.

Answer: Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka.

Question: 3. (iii) Describe the characteristics which show South Asia as a separate region.

Answer: The characteristics which show South Asia as a separate region: (1) Land — mountain ranges in the north, north-west and north-east, Arabian Sea in the south; India is a large peninsula. (2) Common physical characteristics — mountains, plains, climate. (3) Common history — except Afghanistan, Nepal and Bhutan, all countries remained under British rule until 1947. (4) Common physical characteristics of the inhabitants.

Question: B. 1. Research the landforms, climate, inhabitants, history and form of government of every country of South Asia. Make a table (outline) of the information obtained.

Answer: This is a research activity: collect information from the text of Chapters 1 and 3 about each country's landforms (mountains, plains, islands), climate, inhabitants (religion, language, race), history (British rule until 1947) and form of government (democracy, monarchy, etc.) and write it in a table.

Question: C. 1. Cooperate with others. Work together in small groups to learn about landforms.

Answer: This is a group activity: work together in small groups and collect

information about the landforms of South Asia (mountains, plateaus, plains, islands, coasts).

Unit 5, Ch 2: The Land of South Asia

1. (i) When mountain ranges change through upfolds and downfolds, _____ mountains are formed.

Answer: uplift, dome-shaped

1. (ii) When plates move towards each other and collide, _____ mountains are formed.

Answer: the layers of rock meet and bend upwards and downwards, forming fold mountains.

1. (iii) When lava (liquid matter) spreads on the surface of the earth, a cone-shaped mountain is formed which is called _____.

Answer: formed.

1. (iv) Plains are formed by _____ or _____.

Answer: Erosion, deposition. Today's plains were once mountain ranges, valleys or underwater sea areas; they changed into plains because of erosion and deposition.

1. (v) The three large plains of South Asia are _____, _____ and _____.

Answer: the Indus, (Pakistan), Ganga (India), Brahmaputra (Bangladesh).

Question: 2. Make the following table and fill in its blank spaces. (Name of landform | Definition | Two examples from South Asia) — Mountain, Plateau, Plain region.

Answer: Table — Mountain: Definition — a high part of the land which is much higher than the surrounding land; examples from South Asia — the Himalaya, Karakoram and Hindu Kush ranges. Plateau: Definition — high and flat land; examples from South Asia — the Deccan Plateau (India), Pothohar (Pakistan), Balochistan Plateau. Plain region: Definition — low

and flat land formed from the fertile soil brought by rivers; examples from South Asia — the Indus, Ganga and Brahmaputra plains.

Question: 3. (i) Explain with the help of diagrams how dome (uplifted) and volcanic mountains are formed?

Answer: Dome (uplifted) mountains: when plates move away from each other, cracks appear in the earth and magma (melted rock) rises up, pushing a part of the land upwards and forming a dome-shaped mountain. Volcanic mountains: magma below the earth heats up and comes up, erupts from the top of the mountain and spreads as lava; the lava cools and hardens and forms a cone-shaped volcanic mountain.

Question: 3. (ii) How are plain regions formed?

Answer: Plains are formed in two ways: (1) Erosion — mountains wear down through wind, water and ice; (2) Deposition — valleys and underwater sea areas fill up with the fertile soil brought by rivers and become plains.

Question: 3. (iii) Why are the plain regions of the Indus (Mehran) and Ganga so fertile?

Answer: Because these plains are formed from the fertile soil (silt) brought by the rivers; every year floods and river water bring new fertile soil, which keeps the land fertile.

Question: 3. (iv) Explain why most people live in plain regions?

Answer: Because plain regions are flat and fertile; farming, water, transport, business, schools and hospitals are easily available there; in mountain regions transport and farming are difficult.

Question: B. 1. Research the animal and plant life in the mountains of South Asia. Make a list of the animals and plants found in the north, north-east and north-west of South Asia.

Answer: This is a research activity: collect information about the animals

(such as snow leopard, bear, markhor) and plants (deodar, pine, fir) found in the mountains of South Asia (Himalaya, Karakoram, Hindu Kush) and make a list.

Question: C. 1. Cooperate with others. Work in a small group of four to make a large map of South Asia. Show the landforms in it. Display your map in a prominent place so that all children can see it and learn.

Answer: This is a group activity: in a group of four pupils make a large map of South Asia and show in it the mountains (Himalaya, Karakoram), plateaus (Deccan, Balochistan), plains (Indus, Ganga, Brahmaputra) and islands (Sri Lanka, Maldives).

Unit 5, Ch 3: The People of South Asia

1. (i) The people of Nepal are called Nepali. .

1. (ii) The two ethnic groups of Sri Lanka are Sinhalese and Tamil. .

1. (iii) The majority of the people of Pakistan are Muslim. .

1. (iv) Eighty percent of the people are associated with the profession of _____.

Answer: fishing.

1. (v) _____ consists of groups of islands.

Answer: Maldives. Maldives

Question: 2. Make a table to show the similarities and differences among the people of South Asia. Include country, ethnic group, religion, food, dress, work and employment in the list.

Answer: Table columns: Country | Ethnic group | Religion | Food | Dress | Work/Employment. Example: Pakistan — Punjabi, Sindhi, Pashtun, Baloch etc. | Islam (majority) | bread, rice, lentils | shalwar qameez, sari | agriculture, industry, jobs. India — many ethnic groups | Hinduism, Islam, Sikhism, Christianity etc. | rice, bread, lentils | sari, dhoti, shalwar qameez | agriculture, industry, jobs. Similarities: common history, similar foods and dress; differences: religion, language and ethnic groups.

Question: 3. (i) Describe the lifestyle of the people of South Asia.

Answer: The lifestyle of the people of South Asia is both similar and different: most people live in villages and practise agriculture, some live in cities and do jobs or business; foods (bread, rice, lentils), dress (shalwar

qameez, sari) and religious customs differ between countries, but the common history and culture bring them close to one another.

Question: 3. (ii) Compare Pakistan and Bangladesh. What similarities and differences are there between them?

Answer: Similarities: both are Muslim-majority countries, both remained under British rule until 1947 (Bangladesh was part of Pakistan until 1971), agriculture is important in both and bread/rice is the common food. Differences: the national language of Pakistan is Urdu and of Bangladesh is Bengali; Pakistan has the Indus plain and mountains, Bangladesh has the Brahmaputra/Ganga delta and heavy rainfall.

Question: 3. (iii) Explain how landforms affect the lifestyle of the inhabitants of South Asia?

Answer: Landforms affect lifestyle: in mountain regions people rear livestock and live in wooden houses; in the plains there is agriculture and trade and dense population lives there; on islands (Maldives) there is fishing; in coastal regions ports and trade provide employment.

Question: 3. (iv) Make a list of the important professions of the inhabitants of South Asia.

Answer: Important professions of the inhabitants of South Asia: agriculture (farming), fishing, livestock rearing, textile industry, handicrafts, trade, jobs (teacher, doctor, engineer), labour and service work.

Question: B. 1. Make a small programme about the festivals celebrated in every country of South Asia, including life, festivals, food, dress, music and the food of another country of South Asia. Eat and show the food of another country of South Asia. Write a letter about the similarities and differences between your country and that country.

Answer: This is a cultural activity: choose one festival (such as Eid, Diwali, Baisakhi), food, dress and music of every country of South Asia and make

a small programme; eat and show the food of another country; and write a letter about the similarities and differences between your country and that country.

Question: C. 1. Cooperate with others. Working together in small groups, research a country of South Asia.

Answer: This is a group research activity: in small groups collect information about one country of South Asia (such as Nepal, Bhutan or Sri Lanka) and present it in class.

Unit 5, Ch 4: People and Their Work

1. (i) The activities which use land resources such as land, water and minerals are _____.

Answer: primary economic activities.

1. (ii) _____ activities use raw material to make new things.

Answer: Secondary. Secondary

1. (iii) _____ activities point to that aspect of the economy which provides services.

Answer: Tertiary (third-stage). Tertiary

Question: 2. (i) Define primary, secondary, tertiary and fourth-stage activities. Give an example of each.

Answer: Primary activities: activities obtained directly from land resources (land, water, minerals) — examples: agriculture, fishing, mining, forestry. Secondary activities: making new things from raw material — examples: textile industry, sugar industry. Tertiary (third-stage) activities: providing services — examples: trade, transport, banking, education, health. Fourth-stage activities: information and decision-making services — examples: research, planning, management, computer and IT services.

Question: 2. (ii) Write the names of at least five workers working at the fourth stage. Tell which skills they use in their work?

Answer: Five fourth-stage workers: (1) Scientist/researcher — skill of research and experiments. (2) Planner — skill of planning and analysis. (3) Manager/administrator — skill of management and decision-making. (4) Computer programmer — skill of computers and software. (5) Teacher/professor — skill of teaching and giving information. (6) Doctor/medical expert — skill of treatment and research.

Question: 2. (iii) Fill in the T-chart showing the list of workers and the skills needed for their work — banking, farming, machine-making, fishing, business, teacher, coach (guide) and cleaning.

Answer: T-chart — A: Worker | B: Skills needed for this work: Banking — accounting, money management, dealing with customers. Farming — knowledge of land, seed, water and weather. Machine-making — skill of operating and repairing machines. Fishing — sailing a boat, catching fish and knowledge of weather. Businessman — skill of buying and selling, accounting and negotiation. Teacher — skill of teaching, explaining and discipline. Coach (guide) — giving training and knowledge of the game. Cleaning — knowledge of cleanliness and health principles.

Question: 3. 1. What does it cost you to take fruits and vegetables to the local market?

Answer: This is a practical/research activity: ask a farmer or trader in your area how much it costs in transport, labour, packing and market fees to take fruits and vegetables from the field to the market; the book gives no fixed amount for this.

Question: 3. 2. Keeping all factors in view, tell how food prices are within your reach?

Answer: This is an observation activity: keeping your household expenditure, market prices, income and seasonal prices in view, write whether food items are within your reach or not; the book gives no single answer to this.

Question: 3. 3. Visit a third-stage workplace such as a factory, government office, service provider, etc. and find out from its central manager what information and skills applicants for work here should have?

Answer: This is a visit activity: visit a factory, government office or service institution and ask the manager what education, training and skills a job

applicant should have; the book gives no single answer to this.

Question: B. 1. Explain the affairs of your home through an essay.

Answer: This is a writing activity: write an essay about who does which work in your home (primary, secondary, third or fourth stage) and why each work is necessary for the home.

Question: C. 1. Look at the job advertisements in newspapers. Consider two want-advertisements in the newspaper which include the nature of work, salary, working hours, etc.

Answer: This is an observation activity: find two job advertisements in a newspaper and note the nature of work, salary, working hours and required skills in them.

Unit 5 End Exercises

Question: A. 1. Identify the landform. (i) A low-lying piece of low land | (ii) A depression between two plateaus | (iii) A plateau with a wide base, steep slope and pointed peak | (iv) A high place which is the product of a plain.

Answer: (i) Plain — a low-lying piece of low land is a plain. (ii) Valley — a depression between two plateaus or mountains is a valley. (iii) Mountain — a landform with a wide base, steep slope and pointed peak is a mountain. (iv) Plateau — a high and flat place formed as the product of a plain (erosion/deposition) is a plateau.

Question: A. 2. (i) List the importance of mountains.

Answer: Importance of mountains: (1) Rivers rise from mountains and give water for farming and drinking. (2) Mountains are a treasure of forests, wildlife and minerals. (3) Mountains are places of tourism and recreation. (4) Mountains form the natural borders of countries. (5) Wood, herbs and minerals are obtained from mountains.

Question: A. 2. (ii) Tell how mountains are formed?

Answer: Mountains are formed in three ways: (1) Fold mountains — the layers of rock bend when plates collide. (2) Dome mountains — through the uplift of the land and magma rising up. (3) Volcanic mountains — through lava erupting and hardening.

Question: A. 2. (iii) Find the countries of South Asia on the map. Remember the mark on the picture to tell the important characteristics of each country.

Answer: This is a map activity: find the eight countries (Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka) on the map of South Asia and remember each country's important characteristic

(such as capital, large mountain or river) with a mark on the picture.

Question: A. 2. (iv) Tell how people use mountains (producing forest goods, extracting minerals, farming and recreation)?

Answer: People use mountains in this way: (1) Forest production — obtaining wood, herbs and plants. (2) Extracting minerals — taking minerals from mines. (3) Farming — growing tea and fruits on mountain slopes. (4) Recreation — excursions, snowfall and tourism in the mountains.

Question: A. 2. (v) Write the names of the different types of industries and the differences between them.

Answer: Types of industry: (1) Primary industries — obtained directly from land resources (agriculture, fishing, mining). (2) Secondary industries — making new things from raw material (cloth, sugar, steel). (3) Third-stage services — providing services (trade, banking, transport). (4) Fourth-stage services — information and decision-making (research, management, IT). Difference: primary industries give natural resources, secondary industries make goods, third-stage industries give services and fourth-stage industries give information and decisions.

Question: B. 1. Research the religious, social, political and economic activities of the inhabitants of South Asia.

Answer: This is a research activity: collect information from the text of Chapters 3 and 4 about the religious (Islam, Hinduism, Buddhism, Sikhism, Christianity), social (language, dress, food), political (democracy, monarchy) and economic (agriculture, industry, trade) activities of the inhabitants of South Asia.

Question: B. 2. Find places for South Asia which are specific to obtaining the primary, secondary, tertiary and fourth production stages.

Answer: This is a research activity: find examples in South Asia of primary

(fields, mines, forests), secondary (factories, mills), tertiary (markets, banks, schools, hospitals) and fourth-stage (universities, research institutions, IT companies) places.

Question: C. 1. Cooperate with others. Working together as a class, prepare a newspaper containing maps, pictures and articles related to the land and inhabitants of South Asia.

Answer: This is a group activity: working together as a class, prepare a newspaper with maps, pictures and articles about the land (mountains, plains, plateaus) and inhabitants (religion, dress, food, professions) of South Asia.

Question: D. 1. Communicate to others. Work together to prepare a map of the basic features of South Asia showing: the Karakoram mountain range, the Deccan Plateau, the Balochistan Plateau, the coastal plains of Sri Lanka, the Himalaya, the Indus plains in Pakistan.

Answer: This is a group map activity: show the Karakoram range, the Deccan Plateau, the Balochistan Plateau, the coastal plains of Sri Lanka, the Himalaya and the Indus plains in Pakistan on a map of South Asia.

Question: W. 1. Create. Organise a fair of the different countries of South Asia. There should be a group of workers in your class representing these countries. There should be a stall to show each country's national dress, music, food and culture.

Answer: This is a creative group activity: set up a stall for every country of South Asia showing that country's national dress, music, food and culture.

Question: Z. 1. Fast in terms of learning readiness. Obtain pictures of men and women working for the different stages (primary, secondary, tertiary, fourth and fifth) with your mobile camera. Load them on a USB and describe why decisions are needed.

Answer: This is a practical activity: take pictures with a mobile camera of

people working at the different stages (primary, secondary, tertiary, fourth) and describe why each stage's work is necessary. (The book gives no explanation of a fifth stage.)

Question: H. 1. Take a step for everyone's betterment. Write a letter to the newspaper editor explaining why peace and calm are necessary in South Asia?

Answer: Model letter: Dear Editor! Peace and calm are necessary in South Asia because peace increases trade, education and progress, people learn from one another's culture and the inhabitants of all countries live in prosperity; war and quarrels increase poverty, unemployment and destruction. Therefore all countries should work together for peace.

Unit 6, Ch 1: Population

Question: 1. (i) What is the meaning of the term population?

Answer: Population means the number of people living in a town, city or village. If many people live together in a place, the population of that place is high, and if few live there, the population is low.

Question: 1. (ii) Write three reasons for people living in a particular region.

Answer: Three reasons for people living in a particular region: (1) Availability of fertile land and water. (2) Employment opportunities (factories, trade, jobs). (3) Education and health facilities.

Question: 1. (iii) Explain the meaning of the term population density.

Answer: Population density means the number of people living in one unit of an area. If many people live together in an area, the population of that area is dense, and if few live there, the population is sparse.

Question: 2. 1. With the help of books and the internet, find out what the present population of the world is these days?

Answer: The book does not give the present-day population; according to the book's 2015 table, the largest population in the world was China's (1346 million), followed by India's (1241 million). Find the current figure from books or the internet.

Question: 2. 2. Rank the ten most populous countries of the world in order of size.

Answer: Ranking according to the book's 2015 table: 1. China 1346 million, 2. India 1241 million, 3. America 312 million, 4. Indonesia 238 million, 5. Pakistan 200 million, 6. Brazil 197 million, 7. Nigeria 162 million, 8. Bangladesh 151 million, 9. Russia 143 million, 10. Japan 128 million.

Question: B. 1. Put your information and research skills to work. Find out

what the population of your city or town was thirty years ago and how much the population has increased by now?

Answer: This is a research activity: ask elders or check records for the population of your city or town thirty years ago and compare it with the present population to write the increase; the book gives no single answer to this.

Question: C. 1. Communicate with others. Interview an elder and find out why people migrated from your area?

Answer: This is an interview activity: ask an elder why people migrated from your area — common reasons: employment, education, shortage of water, political disputes or better facilities.

Question: D. 1. Research. Make a pie graph and explain how the population of Pakistan is divided among the different provinces?

Answer: This is a research activity: collect figures for the province-wise division of Pakistan's population (Punjab, Sindh, Khyber Pakhtunkhwa, Balochistan, etc.) and make a pie graph; the book does not give province-wise figures.

Question: H. 1. Cooperate with others. Discuss in groups on the topic: by 2050, which country's population will have increased the most? Find reasons for your answer.

Answer: This is a discussion activity: discuss in groups which country's population will have increased the most by 2050 — the book tells that the world's population is increasing and experts say that by 2050 the total population of the world will become 9.6 billion; more children being born and a fall in the death rate are its reasons.

Unit 6, Ch 2: Growing Population of South Asia

Question: 1. (i) Write the reasons for the increase in population in Pakistan.

Answer: Reasons for the increase in population in Pakistan: (1) The birth rate is higher than the death rate. (2) Better health facilities and a fall in the death rate. (3) Early-age marriage. (4) The desire for more children. (5) Little awareness about family planning. (6) Poverty and considering children a source of income.

Question: 1. (ii) Explain the population trends in South Asia.

Answer: Population trends in South Asia: the population is continuously increasing because the birth rate is higher than the death rate; most people live in plain and fertile regions; migration towards cities is increasing; Pakistan, India and Bangladesh are among the most populous countries of the world.

Question: 2. 1. Why has there been a dramatic fall in the death rate in the world?

Answer: There has been a dramatic fall in the death rate in the world because health facilities have improved, treatment and vaccines for diseases are available, cleanliness has improved, availability of food has increased and child deaths have decreased.

Question: B. 1. Research the increase in population that has taken place in Pakistan over the last ten years.

Answer: This is a research activity: research the figures (census, books, internet) for the increase in Pakistan's population over the last ten years; the book does not give fresh figures for this.

Question: C. 1. Working in groups, bring forward the reasons why there are more men than women in Pakistan.

Answer: This is a discussion activity: discuss in groups — according to the book there are more men than women in Pakistan; its common reasons are considered to be: giving more importance to boys, fewer health facilities for women and less care of girls (the book gives no detailed reason for this).

Question: D. 1. Write a letter to the editor of the daily "Dawn" and suggest measures to the government for controlling the increase in population.

Answer: Model letter: Dear Editor! To control the increase in population, the government should spread education, give health facilities, create awareness about family planning, focus on women's education and increase employment opportunities. This will reduce the increase in population and the country will progress.

Question: H. 1. It is said that educating the public is one way of controlling the increase in population. Make a poster in which information about the problem is given to the public.

Answer: This is a poster-making activity: write on the poster — "Education is the best way to control population" — and show the problems of population increase (shortage of food, water, schools, jobs) and the solutions (education, awareness, family planning).

Question: W. 1. Working in groups, find out the reasons for China's one-child policy.

Answer: This is a research activity: in groups find the reasons for China's one-child policy — the population in China had increased very much, so the government adopted a one-child policy so that the increase in population could be controlled.

Unit 6, Ch 3: Growing Population - Problems and Solutions

Question: 1. (i) Define the term overpopulation.

Answer: Overpopulation means the number of people which is more than the resources of a place; that is, people increase so much that it becomes difficult to maintain a reasonable standard of living for them.

Question: 1. (ii) Write two lines each on the problems arising because of overpopulation.

Answer: (1) Shortage of housing facilities — people do not get houses to live in and dirt increases in densely populated areas. (2) Pressure on health facilities — patients increase in hospitals and not everyone gets treatment. (3) Shortage of water — more people need more water for drinking and farming but water decreases. (4) Unemployment — jobs are few and job-seekers are many.

Question: 2. 1. Research the effects of several factors (housing facility, food, water, education and health care) on the standard of living of the people of South Asia.

Answer: This is a research activity: collect information about the effect of housing, food, water, education and health facilities on the standard of living in South Asia — where these facilities are few, the standard of living is low, and where facilities are more, the standard is better.

Question: B. 1. Research why population migrates?

Answer: This is a research activity: find the reasons for migration of population — employment, education, shortage of water and land, natural

disasters, political disputes and the search for better facilities.

Question: C. 1. Working in groups, prepare an outline giving suggestions to the government for controlling population.

Answer: This is a group activity: prepare an outline in a group — suggestions to the government: spread education, give health facilities, create awareness of family planning, increase women's education, increase employment opportunities and enforce the law on the age of child marriage.

Question: D. 1. Prepare a hanging banner for increasing public awareness explaining that the rapid increase in population is an obstacle in fulfilling basic needs.

Answer: This is a banner-making activity: write on the banner — "The rapid increase in population is an obstacle in fulfilling basic needs (food, water, house, school, job)" — and show the benefits of a small family.

Question: H. 1. Imagine that the number of pupils in your classroom has doubled — make a list of the effects of this increase in number.

Answer: Effects of the number of pupils in the classroom doubling: (1) Sitting space will decrease. (2) The teacher will be able to give less time to each pupil. (3) Books, copies and material will fall short. (4) Noise and dirt will increase. (5) Cleanliness and air will decrease. (6) Not everyone will get equal attention.

Question: W. 1. Discuss in groups why sparsely populated regions are sparsely populated.

Answer: This is a discussion activity: discuss in groups — sparsely populated regions are sparsely populated because there water, fertile land, employment and facilities are few, the climate is harsh (deserts, snowy regions, mountains) or the land is not suitable for farming.

Unit 6 End Exercises

Question: 1. (i) What is the difference between the distribution of population and the density of population?

Answer: Distribution of population means how people are spread over an area (many in some places, few in others); density of population means the number of people living in one unit of an area. Distribution tells the spread, density tells the number per unit.

Question: 1. (ii) Write three reasons according to which (a) the number of children is greater in developing countries (b) the number of children is less in developed countries.

Answer: (a) The number of children is greater in developing countries because: the birth rate is high, marriage takes place at an early age, there is a desire for more children and there is little awareness about family planning. (b) The number of children is less in developed countries because: education is greater, marriage takes place late, family planning is common and people prefer a small family.

Question: 2. 1. Why do people in countries like India, Pakistan and Bangladesh of South Asia want more children?

Answer: People in India, Pakistan and Bangladesh of South Asia want more children because children are considered a source of income and support in old age, marriage takes place at an early age, there is little awareness about education and family planning, and in some families boys are given more importance.

Question: B. 1. Find the reasons for the unequal distribution of population in the world.

Answer: This is a research activity: find the reasons for the unequal

distribution of population in the world — availability of water and fertile land, climate, employment opportunities, education and health facilities and transport; where these facilities exist the population is dense, where they do not exist it is sparse.

Question: C. 1. Working together in groups, make a graph of the population of every classroom of your school. Find the population of each class and transfer it onto a bar graph.

Answer: This is a practical activity: count the number of pupils in each class and show it on a bar graph — write the names of the classes on one axis and the number of pupils on the other axis.

Question: D. 1. Bring into a conceptual introduction such factors which affect population density. (Concept map: raw material for factories, less fertile soil, which factors affect population density, employment opportunities + blank boxes)

Answer: Factors affecting population density: (1) Raw material for factories — where raw material exists there are factories and employment, and population becomes dense. (2) Less fertile soil — where soil is less fertile there is less farming, and population remains sparse. (3) Employment opportunities — where there is employment, people come and live. (4) Availability of water, (5) Climate, (6) Education and health facilities, (7) Transport.

Question: H. 1. Work together in groups to complete the following task. Colour in the given map below the parts where there is abundance and scarcity of population. Use red colour for abundance and yellow colour for scarcity. (Map: map of South Asia — population density)

Answer: This is a map activity: on the map of South Asia colour the densely populated parts (the Indus, Ganga and Brahmaputra plains, coastal regions) in red and the sparsely populated parts (mountains,

deserts, dense forests) in yellow.

Unit 7, Ch 1: Why Do We Make Choices

1. (i) Our wants are unlimited and our resources are limited. .

1. (ii) People cannot obtain all the things and services which they need, therefore they have to make a _____.

Answer: choice.

1. (iii) People's choice depends on _____, _____ and _____.

Answer: income,, cost, wants; values also affect choice.

Question: 2. Make a table. Column A gives a list of wants. In Column B indicate by which activity each want can be fulfilled. (Column A — List of wants: Shoes, Horse riding, Watching a film, Eating fish and chips, Opening a bank account | Column B — Means of fulfilling the want)

Answer: Table — Shoes — buying from a shoe shop. Horse riding — at a horse-riding club or recreational place. Watching a film — at the cinema or on TV. Eating fish and chips — from a restaurant or shop. Opening a bank account — in a bank.

Question: 3. (i) Define the term scarcity. Why does scarcity occur?

Answer: Scarcity is a situation in which all the things and services which people need are not available. Scarcity occurs because our wants are unlimited but resources (time, money, goods) are limited.

Question: 3. (ii) Define the term choice. Why do we have to make choices?

Answer: Choice means selecting one out of several alternatives. We have to make choices because resources are limited and we cannot fulfil all wants at one time; choice is actually a decision in which we use our time, money and abilities.

Question: 3. (iii) Which factors do we keep in mind when making a choice?

Answer: When making a choice we keep these factors in mind: income (how much money we have), cost (what is the price of the thing), wants (how much we need it) and values (which things we give importance to in our life).

Question: 3. (iv) What are values and how do they affect our choices?

Answer: Values are the things to which we give importance in our life, such as honesty, truthfulness, hospitality, education and family. Values affect our choices because we choose those things which match our values; for example, a person who gives importance to education will spend money on books.

Question: B. 1. Find out from ten pupils what they will buy with the fifty rupees they get as Eidi? Find out why they bought those same things? Write a short paragraph on this and tell why, in your opinion, each child bought different things with the Eidi?

Answer: This is a survey activity: ask ten pupils what they will buy with the fifty rupees of Eidi and why; write in a short paragraph that every child's wants, likes and values are different, therefore each child chooses different things.

Question: C. 1. Answer the questions through role play of scarcity and choice in a small group: (a) In a gift shop there are ten gifts, out of which Asif has chosen two. He says he likes both very much. His mother said that you can get only one of the two. So choose one — and what is the opportunity cost of this choice for Asif? (b) Some pupils of a classroom are quarrelling with one another about whose turn it is to use the blocks kept in the activity area of the classroom and since when they have been there? There are many pupils in the class but only four pupils can use this area at one time. One said to the other, "You have been here for an hour." He said, "No! I have just come." A third one heard both of them. "What is

the solution to this?" (c) Decorate a table with pencils and put on it pencils equal to half the number of pupils in the class. Give ten rupees to each pupil. Each one will get a chance to buy one pencil which costs ten rupees. When all the pencils finish, there will still be many pupils who will have no pencil. Why did many pupils not get pencils?

Answer: (a) The opportunity cost for Asif is the other gift which he gave up; that is, if he chose one gift, the other gift is his opportunity cost. (b) Solution: make a turn system for the blocks area — give each pupil a fixed time (such as 15 minutes) and put up a turn list so that everyone gets an equal chance. (c) The pupils did not get pencils because the pencils were fewer than the number of pupils (scarcity); when the pencils finished, the remaining pupils did not get a pencil despite having money.

Question: C. 2. On some festival (Eid, Christmas, Diwali) three persons want to buy gifts for children. Anil's father wants to buy a toy car. Shahid's father wants to buy a bike but the bike had finished in the store, so he had to buy another scooter. Tariq's father also wants to buy a toy car but he did not have suitable money, so he could not buy it and had to buy another toy. Why could Shahid's and Tariq's fathers not shop according to their wish? What affected their choice?

Answer: Anil's father: he got the thing of his choice because it was available in the store (availability). Shahid's father: the bike had finished in the store, so he had to buy another scooter — his choice was affected by scarcity/availability. Tariq's father: he did not have suitable money, so he could not buy the toy car and had to buy another toy — his choice was affected by income/cost.

Unit 7, Ch 2: Competition and Compromise (Movie Game)

1. (i) We have to make choices because we face scarcity. .

1. (ii) The process of choosing with limited resources and time is called making a _____.

Answer: trade-off.

1. (iii) A graph which shows the trade-off in decision-making for facing scarcity is called _____.

Answer: the Production Possibility Frontier (PPF).

Question: 2. Decide according to the situation given below (how to make a better choice from resources by making some trade-offs): You got a hundred rupees on your birthday. Write four possible ways of spending the money, also noting the price of each alternative. (You may spend all the money on one thing, or some on one and some on another, and you may also save some of your money — saving all is also in your control.) (Table: Spending options | Buy shoes | Buy clothes | Eat or buy food | Watch a film | Give dinner or a gift to friends | Buy a gift for the family | Saving — rows 1-4)

Answer: Model table (total 100 rupees in each option): Option 1 — Shoes 100, Clothes 0, Food 0, Film 0, Gift to friends 0, Gift for family 0, Saving 0. Option 2 — Shoes 0, Clothes 50, Food 30, Film 20, Gift to friends 0, Gift for family 0, Saving 0. Option 3 — Shoes 0, Clothes 0, Food 40, Film 0, Gift to friends 30, Gift for family 30, Saving 0. Option 4 — Shoes 0, Clothes 0,

Food 0, Film 0, Gift to friends 0, Gift for family 50, Saving 50.

Question: 3. (i) Define the terms trade-off, cost and benefit.

Answer: Trade-off: when we give up one thing to obtain another thing, it is called a trade-off. Cost: whatever has to be given (money, time or another thing) to obtain something is its cost. Benefit: the profit or advantage obtained from something is its benefit.

Question: 3. (ii) Make a list of the factors (apart from capital) which affect our choice.

Answer: Factors (apart from capital) which affect our choice: (1) Time. (2) Wants and desires. (3) Values. (4) Availability (whether the thing is available or not). (5) Likes and interests. (6) Pressure/advice of family and friends. (7) Weather and occasion.

Question: 3. (iii) Explain the future or consequences of the following choices: Abid starts smoking tobacco at the age of eighteen. Zoya leaves school at the age of eleven. Shahid leaves school at the age of ten and starts working in a garage.

Answer: Abid (smoking at eighteen): health will deteriorate, money will be wasted, and study and future will be badly affected. Zoya (leaving school at eleven): education will remain incomplete, a good job will not be found, and earnings in the future will be low. Shahid (leaving school at ten and working in a garage): he will remain deprived of education, will do low-wage work, and chances of progress will decrease.

Unit 7, Ch 3: Opportunity Cost

1. (i) _____ is the price of that second-best alternative which could have been chosen.

Answer: Opportunity cost. Opportunity cost

1. (ii) If there is no opportunity cost of spending something, we will call it _____.

Answer: free — such as the air for breathing.

1. (iii) Those people who use goods and services to fulfil their personal needs and wants are called _____.

Answer: consumers.

1. (iv) Individuals and institutions which use their resources in the production of goods and services are called _____.

Answer: producers.

Question: 2. Make a table like the one below. Understand the situations and fill in the boxes. (Situations: Waqas is buying a new computer for his office, not a new fax machine. Asifa buys a lollipop, not ten-rupee chocolates, from the school canteen. The minister decides to allocate a hundred million rupees for building a new highway instead of benefiting the unemployed. Abid buys a new sweater and has to give up the shoes which he saw in the store last week. A king company has bought a new machine for goods, so it cannot recruit new workers. A family has to give up seaside recreation and spend that money on repairing broken health. A country faces the threat of attack from its neighbouring country. It decides to spend a large part of its budget on buying weapons instead of making weapons.) (Table: Who is making the choice? (Business, government or individual) | What are they choosing? | Opportunity cost (what do they

have))

Answer: Table — Waqas (individual) | New computer | New fax machine. Asifa (individual) | Lollipop | Ten-rupee chocolates. Minister (government) | Building a new highway | Benefiting the unemployed. Abid (individual) | New sweater | Shoes. King company (business) | New machine | Recruiting new workers. Family (individual/household) | Repairing broken health | Seaside recreation. Country (government) | Buying weapons | Making weapons.

Question: 3. (i) Define the term opportunity cost.

Answer: Opportunity cost is the price of that second-best alternative which could have been chosen but was not chosen; that is, the thing which has to be given up to obtain something is its opportunity cost.

Question: 3. (ii) Explain that every economic decision has some opportunity.

Answer: Every economic decision has some opportunity (opportunity cost) because resources are limited; when we choose one thing we have to give up another thing, and the given-up thing is the opportunity/opportunity cost of that decision.

Question: 3. (iii) How does the government face opportunity costs?

Answer: The government also faces opportunity costs because its budget is limited; when the government spends money on one work (such as building a highway) it has to give up another work (such as helping the unemployed), and the given-up work is the opportunity cost of that spending.

Question: B. 1. Put the following situations before different friends of your class, school or neighbourhood and find out from them what decision they will make and why? (Situations: (i) You have only twenty-five rupees of pocket money left. You know that you can buy a candy bar with it or keep

the money safe in your money box. (ii) You have thirty minutes before the drama. You want to play cricket for that long or watch TV. (iii) Your parents have money for one thing to eat. You want cricket coaching or swimming lessons. (iv) Your family is giving a party at the beach. You want them to take friends out and feed them something or take them to show a film. (v) Your school is giving pupils a chance to donate for sports equipment. What is your choice or what have you given up?)

Answer: This is a survey activity: ask friends about each situation what they will choose and why. Model table — Situation i: Choice — buying a candy bar, Why — likes sweets, Opportunity cost — saving the money. Situation ii: Choice — playing cricket, Why — likes the game, Opportunity cost — watching TV. Situation iii: Choice — cricket coaching, Why — wants to learn cricket, Opportunity cost — swimming lessons. Situation iv: Choice — showing a film to friends, Why — it will be fun together, Opportunity cost — feeding them outside. Situation v: Choice — giving a donation, Why — wants to help school sports, Opportunity cost — keeping the money for oneself.

Question: B. 2. Collect everyone's answers and identify the opportunity cost of each situation according to the table given below. (Table: Name of pupil | What choice was made | Why | Opportunity cost)

Answer: This is a table-filling activity: write each pupil's name, his choice, the reason for the choice and the opportunity cost of that choice (the given-up alternative) in the table; a model is given in the answer to the question above (B.1).

Unit 7 End Exercises

Question: A. 1. Match the terms given in Column A with their definitions given in Column B. (Column A: Necessities, Wants, Opportunity cost, Producer, Consumers | Column B: Use goods and services to fulfil their personal needs. / These are the demands which are needed to live life. / Use resources for the production of goods and services. / These are the demands which are not basic, they just make life better and pleasant. / Any option left out at the time of making a choice, the best alternative.)

Answer: Matching — Necessities — These are the demands which are needed to live life. Wants — These are the demands which are not basic, they just make life better and pleasant. Opportunity cost — Any option left out at the time of making a choice, the best alternative. Producer — Use resources for the production of goods and services. Consumers — Use goods and services to fulfil their personal needs.

Question: 2. (i) In the figures given below, what is the opportunity cost of going from point A to point B? (A) 100 units (B) 80 units (C) 50 units.

Answer: In going from point A to point B the opportunity cost is 20 units (100 − 80 = 20); that is, to obtain point B, 20 units of point A have to be given up.

Question: 2. (ii) If you have twelve hours in a day which you can spend on work and recreation, how will you spend the next five days — show the five possible trade-offs (combinations of work and play) on a graph.

Answer: Five possible combinations (work + recreation = 12 hours): (1) 12 hours work, 0 hours recreation. (2) 9 hours work, 3 hours recreation. (3) 6 hours work, 6 hours recreation. (4) 3 hours work, 9 hours recreation. (5) 0 hours work, 12 hours recreation. Show these five points on a graph and

join them to make the Production Possibility Frontier (PPF) line.

Question: B. 1. Survey the class to decide which educational trip should be taken at the end of the year? Ask every pupil to tell a place for the other class. (Some special farmhouse, museum, some amusement park)

Answer: This is a survey activity: ask every pupil of the class which place he would prefer for the educational trip at the end of the year — some special farmhouse, museum, or some amusement park — and count everyone's answers.

Question: B. 2. Ask the pupils to tell the cost and benefits of each decision and write the explanation of their choice in three sentences.

Answer: This is a writing activity: every pupil writes in three sentences what the cost (fare, ticket, food) of his chosen trip is, what the benefit (learning, fun) is, and why he chose that place.

Question: C. 1. Demonstrate practically how trade-offs are made while playing the following roles: School Board (administration) meeting: Decide how the school board will spend five lakh rupees for the school. Also write a list of the different alternatives of expenditure. Remember that you cannot spend all the money on only one work. Family meeting for a festival (Eid, Christmas or Diwali): Five thousand rupees of budget is to be allocated. A household of four persons wants to buy clothes, special food, sweets and gifts (Eidi) toys, etc. for relatives. Remember that you cannot spend all the money on only one work.

Answer: Practical demonstration (role play) — School Board: divide the five lakh rupees among different works, such as new books 1 lakh, computers 1.5 lakh, sports goods 50 thousand, repair of classrooms 1 lakh, library 1 lakh; spending all the money on one work would leave the other works undone (opportunity cost). Family meeting: divide the five thousand rupees, such as clothes 2000, special food 1000, sweets 500, gifts/Eidi

1500; something has to be spent on each thing because all the money cannot be spent on one thing only.

Question: D. 1. With the help of your mother, for the family: Make a list of things needed during the week. Calculate the costs of the week (food and that). Consider what to save for an unexpected situation? Make a diary for recording and reviewing expenses.

Answer: This is a practical household activity: with mother's help, make a list of the week's needed things (food, vegetables, milk, soap, etc.) and their cost, save some money for unexpected expenses, and make a diary of expenses.

Question: H. 1. Make a design for the cover of your money diary — it shows what is in the diary.

Answer: This is a creative activity: make a design on the cover of the money diary which shows that the diary contains the account of expenses, savings and budget.

Question: W. 1. Use the Insert Function to make any one table from the following — make tables of activities from the exercises given at the end of the chapter.

Answer: This is a computer activity: on a computer, use Insert Function in a spreadsheet to make a table of any one activity (such as the expenses table) from the exercises given at the end of the chapter.

Question: Y. 1. Take a practical step. What is important for you? Complete the table below and explain what you will do in the given situation. (Table: Situation | What will you do? | Why? Write the name of the value)

(Situations: 1. You are watching a person passing through the street. While taking something out of his pocket he drops his mobile phone. 2. You bring a book from the library which is to be returned after two days. It is expected of you that you will protect it. No page will tear and the book will

be returned on time. 3. Your friend is unwell. He has not come to school for the last two weeks. 4. You are riding in a bus. When an old woman entered the bus, all the seats were full at that time. 5. You usually play football but at present you have given it up because you are busy in your studies and eating and drinking activities outside with friends. Now you have started feeling that your weight is increasing and you remain tired. 6. It is the month of Ramadan and you are fasting. While playing in the street outside, a child hit you with a bicycle. Instead of apologising for the mistake, the child started arguing that you should have walked outside carefully.)

Answer: Table — 1. Situation: Dropping a mobile phone — I will: pick up the phone and return it to the person — Why: Honesty. 2. Library book — I will: protect the book and return it on time — Why: Responsibility. 3. Sick friend — I will: visit the friend and help him with his lessons — Why: Sympathy/Friendship. 4. Old woman in the bus — I will: vacate my seat and seat her — Why: Respect and help. 5. Increasing weight — I will: start playing football again and eat healthy food — Why: Health. 6. Collision in Ramadan — I will: be patient and explain gently to the child — Why: Patience and tolerance.

Unit 8, Ch 1: What Goods and Services Are Produced

1. (i) The two characteristics which help us decide whether these goods and services are government or private are _____ and _____.

Answer: sold at, a price.

1. (ii) The goods and services which the government provides free for the betterment of society are called _____ goods.

Answer: government

1. (iii) The things which are used to produce more goods and services are called _____ goods.

Answer: capital

Question: 2. Complete the following table. Column A lists the terms — for each term write its definition in Column B and one example in Column C: Goods, Services, Private goods and services, Government goods and services, Merit goods, Producers, Consumer goods.

Answer: Goods — Definition: the things which we buy to fulfil our needs and wishes, which we can see, feel and touch. — Example: food items, furniture, electronic goods. Services — Definition: the work or process which we buy to fulfil our needs and wishes. — Example: hairdressing service, a doctor's medical service. Private goods and services — Definition: goods and services produced in the private sector which are provided to consumers. — Example: a book bought from a shop, private school education. Government goods and services — Definition: the goods and services which the government provides, available to everyone free or at a very low price. — Example: roads, parks, government schools, hospitals, police. Merit goods — Definition: merit goods are not defined in this chapter's text; question 3 (ii) of the exercise gives vaccination as an

example, whose benefits reach other people too. — Example: vaccination (from the exercise question). Producers — Definition: the people who produce goods and provide services. — Example: craftsman, shopkeeper, factory. Consumer goods — Definition: the things which consumers buy and use. — Example: pencils, books, toys.

Question: 3. (i) Explain the difference between consumer goods and capital goods.

Answer: Consumer goods are the things which consumers buy and use, such as pencils, books and toys. Capital goods are the things which are used to produce other goods and services, such as buildings, machines and a truck (when it is used for transporting goods).

Question: 3. (ii) What are the external benefits of vaccination? What is a merit good for other people?

Answer: The answer to this question is not in this chapter's text — the chapter does not explain the external benefits of vaccination or a merit good. The chapter only says that the government provides services like hospitals free or at a very low price for public welfare. From the question itself it follows that the benefits of vaccination reach not only the person vaccinated but other people too.

Question: 3. (iii) In what way does the government take part in public welfare goods?

Answer: The government provides public welfare goods and services — such as schools, libraries, police, hospitals, the communication network, street lights, national defence — which are available to everyone free or at a very low price, because they are used collectively.

Question: 3. (iv) When we say that a private good is excludable, what does that mean? Explain with an example.

Answer: The term "excludable" is not defined in this chapter's text. The

chapter only says that consumers buy private goods and services and pay their price, whereas government goods are available to everyone free or at a very low price.

Question: B. 1. Walk around your neighbourhood and identify the goods and services provided under the government sector. Talk to your parents and elders and find the merit goods provided by the government.

Answer: (Activity) Find government goods and services in the neighbourhood, such as the government school, park, road, street light, hospital, police station and library. Ask parents and elders which things the government gives free or at a low price, such as government school education, hospital treatment and drinking water.

Question: C. 1. Make pictures related to consumer goods or to the use of some capital good in a service provided to the school and community — put the pictures on the wall board.

Answer: (Activity) Make pictures showing consumer goods (such as books, pencils) and capital goods (such as the school building, the bus which brings pupils), and put them on the wall board.

Unit 8, Ch 2: Producers of Goods and Services

1. (i) A single business is called a firm. .

1. (ii) The group of businesses or producers which provides similar goods and services is called _____.

Answer: an industry.

1. (iii) The businesses which are owned by the government but are run like private-sector businesses to earn profit are called _____.

Answer: state-owned enterprises.

1. (iv) Voluntary organisations are also called _____.

Answer: non-profit organisations.

Question: 2. Complete the following table. Column A lists the types of producers — write their aim in Column B and one example in Column C: Private-sector producers, Government-sector producers, Voluntary / non-profit organisations.

Answer: Private-sector producers — Definition: these businesses are owned by individuals or groups belonging to the private sector. — Aim: to earn maximum profit. — Example: Peek Freans, Bundu Khan. Government-sector producers — Definition: many government-sector businesses are owned by the government. They provide the goods and services which the private sector generally does not provide without profit. — Aim: to meet a public need, not profit. — Example: government school, hospital, police, roads. Voluntary / non-profit organisations — Definition: some private-sector businesses are based on the fact that they feel some need in society and want to fulfil it. They are called voluntary organisations. — Aim: fulfilment of some aim or need, without profit. —

Example: Edhi Foundation.

Question: 3. (i) Define firm and industry, giving two examples of each.

Answer: Firm: a single business or producer. Examples: Peek Freans, Bundu Khan. Industry: the collective name of many firms producing similar goods and services. Examples: the textile industry, the communications industry.

Question: 3. (ii) Explain the difference between a firm and an industry.

Answer: A firm is a single business, whereas an industry is a group of many firms which produce similar goods and services; a firm is only one part of an industry.

Question: 3. (iii) What is a state-owned enterprise? Explain.

Answer: A state-owned enterprise is a business which is owned by the government but is run like a private-sector business to earn profit.

Question: B. 1. Make a table of the private businesses and the government-provided goods and services you found in your neighbourhood while searching for goods and services: Goods and services of private businesses | Goods and services provided by the government | Where they were available.

Answer: (Activity) Fill the table after surveying the neighbourhood. Example: Private — shop goods, barber's service, private school education | Government — government school, hospital, park, road, police | Where — in the neighbourhood shop / school / hospital / park. Fill the remaining cells from real observation of your own neighbourhood.

Question: C. 1. Form a voluntary organisation to meet some particular need in your school.

Answer: (Activity) Identify a real need in the school (such as cleanliness, shortage of books, help for poor pupils) and form a voluntary organisation to meet it without profit; like voluntary organisations, the aim should be fulfilment of a need, not profit.

Unit 8, Ch 3: Productivity and Producers' Goals

1. (i) A tax which is paid on the amount which is the income of a person or a business is called _____.

Answer: income tax.

1. (ii) The tax which is collected along with the price of a good or service is called _____.

Answer: sales tax.

1. (iii) In economics the factors of production are called the factors of _____.

Answer: production.

1. (iv) A person who comes into the field with new ideas, takes decisions and bears their consequences is called _____.

Answer: an entrepreneur (businessman).

Question: 2. Make a table. Interview three people who take part in the production of goods and services — find out how many hours they work in a week, what training they received, what monthly income they get, and what are the good and bad points of their work. Write the information obtained under the following headings in the table: Name of person | Good or service | Duration of work per week | Training received | Income from work | Good points of work | Bad points of work.

Answer: (Activity) Fill the table after interviewing three producers. For example: Name: shopkeeper | Good or service: selling shop goods | Work per week: 60 hours | Training: experience of shopkeeping | Income: some thousand rupees per month | Good points: own boss, contact with customers | Bad points: long hours, little holiday. Fill the cells for the other two people from real interviews.

Question: 3. (i) Define each of the following, giving two examples of each: (a) Interdependence (b) Specialisation (c) Land (d) Labour (e) Capital (f) Enterprise.

Answer: (a) Interdependence: consumers and producers depending on each other. Examples: consumers buy goods from producers; producers depend on consumers' buying. (b) Specialisation: when some people concentrate in their production on some particular goods and services. Examples: one person makes only shoes; one factory makes only soap. (c) Land: nature's gift; all the natural resources which are used to prepare goods and services. Examples: farm land, coal. Income of land: rent. (d) Labour: the human effort which prepares goods and services; the physical and mental abilities of workers. Examples: a farmer's physical labour, a doctor's mental labour. Income of labour: wages. (e) Capital: the financial resources, tools, machines, furniture and buildings which are used to run a business. Examples: factory machines, the shop building. Income of capital: profit. (f) Enterprise: the person who organises labour, capital and land, takes decisions and faces the risks coming in business. Examples: a shopkeeper running a shop, an industrialist setting up a factory. Income of enterprise: profit.

Question: 3. (ii) Make a list of the different commercial aims of private-sector producers. Can the aims of some private-sector producers also be non-commercial? Explain.

Answer: Commercial aims of private-sector producers: making profit, being one's own boss, providing a good or service which can be sold, the social status obtained from one's business. Yes, the aims of some private producers can also be non-commercial: they want to meet some need visible in society, their aim is not to earn profit but only to cover expenses; such businesses are called non-profit or voluntary organisations, like the

Edhi Foundation.

Question: 3. (iii) Why does the government provide some goods and services? If consumers need them, why does the private sector not provide them?

Answer: The aims of government-sector producers are different from the aims of the private sector and are non-commercial: to provide a good service which the private sector cannot give because of profit; to provide a good or service which very many businesses and the government are not providing; providing these goods and services is more expensive for the government; the importance of these goods and services is far greater than the price which the consumer is paying; this promotes social harmony, justice and equality because they are equally available to all; they are also called collective goods or services from which very many people benefit — if the private sector produced them, it would not be possible to provide them to all.

Question: 3. (iv) How does the government pay for the goods and services provided to the people?

Answer: The government pays for the preparation of goods and services from taxes and fees. The government collects taxes from people and businesses — a tax is the amount which people give to the government under income tax and sales tax. The government uses that same money in the preparation of services. Sometimes a fee is also collected for these goods and services, such as the fee for passing through highway toll posts or for recreation in a public park.

Question: B. 1. Meet a shopkeeper and find out about the things present in the shop. Identify the names of any ten things, their prices and their sales tax.

Answer: (Activity) Find out from the shopkeeper the names and prices of

ten things and note the amount of sales tax (the tax which is collected along with the price of a good) on each thing; make the list of things in the shop from your own observation.

Question: C. 1. In pairs make a circular flow diagram. In it explain the harmonious role of businessmen and householders in the economy.

Answer: (Activity) Show interdependence in the circular flow diagram: householders (families) give the factors of production (land, labour, capital) to the producers and in return receive rent, wages and profit; the producers make goods and services from these factors; householders buy those goods and services and the money goes back to the producers. In this way consumers and producers depend on each other.

Unit 8 End Exercises

Question: A. 1. Read the list of private- and government-sector goods and services while organising the information — decide which of them is private and which is government — write it against each one — explain your answers in view of competition and expenses: A bag of potatoes, getting a tyre changed at a tyre shop, street light, road construction, car, issuing a postage stamp, police protection, a book, polio vaccine, a shirt.

Answer: A bag of potatoes — Private (bought at a price from a shop/market). Getting a tyre changed at a tyre shop — Private (service of a private shop, at a price). Street light — Government (installed by the government, free for all). Road construction — Government (built by the government, used by all). Car — Private (bought at a price). Issuing a postage stamp — Government (service of the government's post office). Police protection — Government (provided free by the government). A book — Private (bought at a price from a shop). Polio vaccine — Government (provided free by the government for public health). A shirt — Private (bought at a price from a shop).

Question: B. 1. Find the names of private business enterprises, five non-governmental organisations and five state-owned enterprises in Pakistan, and explain the difference between their aims.

Answer: (Research) Find the names and compare the aims: the aim of private businesses is to earn maximum profit (examples: Peek Freans, Bundu Khan); the aim of non-governmental organisations is to meet some need without profit (example: Edhi Foundation); state-owned enterprises are owned by the government but are run like the private sector for profit. Find the remaining names through research.

Question: C. 1. Role-play in the following situation: A family cannot pay the fee for sending its children to school. A family has no money for its children's treatment.

Answer: (Role-play) In both situations the solution lies in the government's public services: the children can study in a government school free or at a low fee, and treatment can be obtained from a government hospital free or at a low price; if the family does not know, tell them about these services.

Question: D. 1. Role-play a debate between producers of private, government and non-profit businesses, in which each producer tells his role regarding goods and services in the economy.

Answer: (Debate) The private producer says: I earn profit by selling goods. The government producer says: I give services to all free or at a low price, such as schools and hospitals. The non-profit producer says: I meet some need without profit. Together the three provide goods and services in the economy.

Question: H. 1. An imaginary story is one in which animals speak and give a lesson. Write such a story which tells why the goods and services provided by the government are beneficial.

Answer: (Creative work) Write an imaginary story in which animals speak and show that the government's services — such as schools, hospitals, roads and parks — are available to all free or at a low price and benefit everyone.

Question: H. 2. Write a story in which you can include as many examples as possible of government- and private-sector goods and services.

Answer: (Creative work) Write a story containing government examples (school, hospital, park, road, police, street light) and private examples (shop goods, barber's service, private school, bus service).

Question: W. 1. Download three pictures from the internet of people taking part in the work of providing some service.

Answer: (Critical thinking) Choose three pictures from the internet in which people are seen providing a service, such as a doctor treating a patient, a teacher teaching, and a shopkeeper selling goods; under each picture write which service is being provided and whether it is private or government.

Question: W. 2. Write a paragraph with the title "When I grow up, what goods and services will I produce?"

Answer: (Critical thinking) Write a paragraph telling which good or service you want to produce when you grow up (such as the service of education by becoming a teacher, the service of treatment by becoming a doctor, or selling goods by becoming a shopkeeper) and whether it will be in the private, government or non-profit sector.

Question: Y. 1. There will be many old people in your neighbourhood. Think about doing some service for them. For example, play a game with them, help them in shopping, or read a story to them. Keep performing this service for them regularly.

Answer: (Social betterment) Help the old people of the neighbourhood: spend time with them, help them in shopping, or read a story to them; keep performing this service regularly.

Unit 9, Ch 1: Individuals in South Asian Societies

1. (i) In Bhutan the _____ language is spoken.

Answer: Dzongkha (national language)

1. (ii) The special festival of Nepal is Dashain. .

1. (iii) The most followed religions in South Asia are _____ and _____.

Answer: Hinduism, Islam — the table lists both these religions in many countries.

Question: 2. Define the following terms: Community.

Answer: A community is a social unit whose values are the same or which is situated in one geographical area (a village or a town).

Question: 2. Define the following terms: Identity.

Answer: Identity is the set of characteristics which give a person a distinct recognition from others; it is formed by factors such as family, culture, food, festivals, lifestyle, games and media.

Question: 2. Define the following terms: Culture.

Answer: Culture is the collection of the living ways, values, customs, language, food, festivals, fairs and arts of a group or society.

Question: 3. Make a poster explaining how the countries of South Asia differ from one another.

Answer: (Activity) Make a poster from the differences of countries in the chapter's table: languages (such as Urdu, Punjabi, Sindhi in Pakistan; Dzongkha in Bhutan), religions (Islam, Hinduism, Buddhism, Christianity), festivals (Eids, Diwali, Dashain, Nowruz), customs and national characteristics.

Question: 4. Make a collage of the important festivals of South Asia and display it in the class.

Answer: (Activity) Collect pictures of festivals from the table and make a collage: Eid-ul-Fitr, Eid-ul-Azha, Diwali, Dashain, Nowruz, Christmas, Easter, Jashn-e-Afghan; display it in the class.

Question: B. 1. In the form of groups, discuss the common beliefs and values of the people of South Asia and include everyone in it.

Answer: (Activity) In a group discuss the common beliefs and values given in the chapter: belief in God, visiting places of worship, respect for elders and good behaviour, decisions of the head of the family; give every pupil a chance to speak.

Question: B. 2. Introduce the community to which you belong.

Answer: (Activity) Introduce your community: which village/town/city it is from, what its values, language, festivals and customs are; keep the chapter's definition of community in view.

Question: B. 3. Throw light on the role and status of your family in your community.

Answer: (Activity) Tell what the status (position) of your family is in the community and what role it plays — such as care of children, education, guidance and protection; the family is the most important factor in forming identity.

Question: C. 1. Prepare a poster of a tour of South Asia in which information is given about its festivals and culture.

Answer: (Activity) Make a tour poster giving information about the festivals, food, languages and culture of the eight countries of South Asia (Afghanistan, India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Maldives).

Question: C. 2. Highlight the cultures and traditions of the different classes

here regarding the culture of South Asia.

Answer: (Activity) Show the cultures and traditions of different classes: languages, religions, foods, festivals, fairs, customs and national characteristics — take examples from the chapter's table.

Question: C. 3. South Asia is becoming a modern region but a traditional lifestyle still exists here. Prepare a chart in which the modern and traditional lifestyles of the people here are entered.

Answer: (Activity) Make a two-part chart: Traditional lifestyle — traditional foods, festivals, customs, family system; Modern lifestyle — media, technology, new foods and new ways. Both still exist together today.

Unit 9, Ch 2: The Individual's Relation with the Group in South Asian Countries

1. (i) A social group consists of two or more individuals.

1. (ii) Examples of a primary group are the family and close friends.

1. (iii) Examples of a secondary group are the class and the games team.

Question: 2. Define the following terms: (a) Primary group.

Answer: Primary group: groups which are very close to one another. They are traditionally few in number and long-lasting, and their members feel a personal connection with their group. Examples: family, close friends.

Question: 2. Define the following terms: (b) Secondary group.

Answer: Secondary group: another type of social groups. They can be large and small but are mostly separate and of short duration. They are generally found at workplaces or in schools. Examples: class, games team, office workers.

Question: 2. Define the following terms: (c) Social group.

Answer: Social group: a collection of two or more individuals which has some particular characteristics and whose values and standards show similarity. Examples: cricket team, class pupils.

Question: 3. Prepare a collection (album) of the famous groups of South Asia and display it in the class.

Answer: (Activity) Collect pictures of the famous groups of South Asia and

make an album: family, class, cricket team, group of friends, office workers; display it in the class.

Question: B. 1. With the help of the internet and books prepare a chart in which the social roles of the members of South Asian societies are highlighted.

Answer: (Activity) Show social roles in the chart: parents — care of children, education, guidance, protection; children — going to school, respecting everyone, good behaviour, relations with companions; the teacher, pupil, doctor etc. each have their own roles.

Question: B. 2. Consult your friends and talk about the different social groups of South Asia.

Answer: (Activity) Talk with friends about the different social groups of South Asia — family, friends, class, team — and discuss their common characteristics.

Question: B. 3. Bring forward your group of friends and throw light on their roles and responsibilities.

Answer: (Activity) Giving the example of your group of friends, tell what the status (position) of each member is and what role is expected of him — such as helping one another, respect and working together.

Question: C. 1. Joining a group, prepare a list of the groups to which you belong. Include primary and secondary groups along with your social network. Make someone from the class a spokesperson who will speak on this topic.

Answer: (Activity) Make a list of your groups: primary — family, close friends; secondary — class, games team, social network groups; choose one spokesperson from the class who will speak about them.

Unit 9 End Exercises

A. 1. (i) Dashain is the famous festival of the country Nepal. .

A. 1. (ii) The languages _____ and _____ are spoken in Afghanistan.

Answer: Pashto, Dari

A. 1. (iii) The social status of an individual in a group is called status. .

A. 1. (iv) Members have individual and collective rights in a group.

Question: A. 2. (i) Describe the different aspects of the identity of the people of South Asia.

Answer: The factors forming the identity of the people of South Asia are: family, culture, lifestyle, food, media, technology and festivals; besides these, language, religion, customs, fairs and national characteristics are also aspects of identity.

Question: A. 2. (ii) Describe in your own words the role and responsibilities of a member of a social group.

Answer: Every member has a status (position) in the group and a role, which is the action expected of him in that position. Example: parents have a status and their role is care of children, education, guidance and protection; children are expected to go to school, respect everyone, behave well and develop relations with companions.

Question: A. 2. (iii) Why do people join a social group? Write the reasons.

Answer: People join a social group because they value connection and acceptance: belonging to a group increases a person's sense of belonging;

gives a feeling of moral support; can give guidance in life; helps in understanding connection and role; being wanted gives meaning to life.

Question: B. 1. Research and find out about the presence of some social group in your area.

Answer: (Research) Find a social group in your area — such as the family, group of friends, class, games team, neighbourhood community — and note what it is, who its members are and what role it plays.

Question: C. 1. Describe the similarity and difference between the primary and secondary groups of the different provinces of Pakistan.

Answer: (Cooperation) Similarity: in every province primary groups (family, close friends) and secondary groups (class, team, office) are found, and all have common characteristics, values and roles. Difference: primary groups are close, few and long-lasting; secondary groups are separate and of short duration; languages, foods, festivals and customs differ between provinces.

Question: D. 1. Find pictures (images) of the lifestyle of the people of South Asian countries from the internet.

Answer: (Creative work) Find pictures from the internet of the lifestyle of the people of South Asian countries — such as foods, clothes, festivals, houses, games — and collect and show them.

Question: H. 1. Prepare a list of the common problems of your area and their solutions and send them to the concerned authorities so that the problems can end.

Answer: (Social betterment) Write the common problems of your area (for example cleanliness, water, roads) and their possible solutions, and send them to the concerned authorities.

Question: W. 1. Make groups of four in your class in which discussion and debate is held about the similarities, customs and festivals of the people

of South Asian countries.

Answer: (Cooperation) Form groups of four and discuss: similarities among the people of South Asia — common beliefs, values, family system; customs — respect for elders, hospitality; festivals — Eids, Diwali, Dashain, Nowruz.

Question: Y. 1. Prepare a pictorial scenario according to the South Asian countries in which the aims, activities, signs and works of SAARC are reflected.

Answer: (Task to do) SAARC is not explained in the chapter's text. In the scenario use the facts of the chapter: the eight countries of South Asia, their shared cultures, festivals, languages and religions, and the idea of mutual cooperation.

Question: Y. 2. Choose some close friend of a South Asian country and discuss on these topics what the organisation of South Asian countries (SAARC) has done for harmony, lifestyle, festivals, games, education, health and social development.

Answer: (Task to do) The work of SAARC is not explained in the chapter's text. In the discussion use the facts of the chapter: common beliefs and values, festivals (Eids, Diwali, Dashain), games, family system, and services like education and health.

Question: Y. 3. Imagine that you are a part of SAARC. After consulting your friends, prepare such a document for all the rules and regulations of SAARC which can give further development.

Answer: (Task to do) The rules and regulations of SAARC are not in the chapter's text. In the document use the values of the chapter: respect for one another, cooperation, protection of shared culture and festivals, and equality of all countries.

Unit 10, Ch 1: Developing Inquiry Skills

1. (i) In a bar graph the bars (columns) tell the measurement.

1. (ii) A change which changes with _____ can be shown by using a _____.

Answer: time, line graph.

1. (iii) Advertisements tell us about the goodness of some product. They are the best example of _____.

Answer: bias, because they show only one side (the goodness) and ignore the other side.

1. (iv) A statement which can be proved correct is called a fact. .

Question: 2. Complete the table given below: Steps of research (rule of research) | Work | Example. The first row is given: Make some research question | Prepare a list of possible questions | How can we keep our society clean and green?

Answer: 1. Make some research question — Prepare a list of possible questions — How can we keep our society clean and green? 2. Collecting information — Collect information from different sources (books, newspapers, survey, internet) — Collect information about cleanliness from books and a survey. 3. Analysing information — Look at the information obtained and think about the answer to the research question from it — Draw the conclusion from the collected information why cleanliness is necessary. 4. Presenting information — Present the collected information through a paragraph/graph/poster — Write a paragraph on cleanliness or make a bar graph.

Question: 3. (i) What is research (investigation)?

Answer: The process of investigation is like detective work. It includes asking a key question, collecting information or evidence, analysing it and drawing a conclusion from it. It has four steps: asking a question, collecting information, analysing information, presenting information.

Question: 3. (ii) Write the names of any ten sources of information.

Answer: Ten sources of information: 1. Books 2. Newspapers 3. Internet 4. TV 5. Radio 6. Talking to teachers/experts 7. Survey 8. Museum 9. Artefacts/works of art 10. Autobiographies/traditional tales.

Question: 3. (iii) Write any three sources of presenting information according to these patterns: (a) Oral (b) Written (c) Pictorial graph.

Answer: (a) Oral: speech, discussion, telling a story. (b) Written: writing a paragraph, essay, report. (c) Pictorial graph: making a bar graph, line graph, poster.

Question: B. 1. Investigate and share your results in the class.

Answer: (Investigate) Research some question with the four steps of investigation — ask a question, collect information, analyse, present — and tell your results to the class.

Question: C. 1. Working with a companion, tell three ways by which you compared the gallery of different countries.

Answer: (Cooperation) Three ways: 1. Comparing with the title, key, compass and scale of maps. 2. Comparing the culture, festivals and languages of countries. 3. Comparing location, shape and size on maps.

Unit 10, Ch 2: Developing History Skills

1. (i) Historians are like _____.

Answer: detectives — they ask countless questions about the past.

1. (ii) Historians research secondary sources through primary sources.

1. (iii) An effective way of arranging historical events is the time line.

1. (iv) One decade is equal to 10 (ten) years.

1. (v) One millennium is equal to _____ years.

Answer: 1000 (one thousand)

Question: 2. (i) What is a primary source?

Answer: A primary source is that part of information about an event/era which was created by a person connected with that event — that is, he was contemporary with the event. Examples: diaries, letters, photographs, buildings, newspapers, cultural exhibits, audio artefacts.

Question: 2. (ii) What is a secondary source?

Answer: A secondary source is one whose creation was not begun by the person who was present in the event or who was born after the event; it was created by later people and it explains the information obtained from primary sources. Examples: textbook, TV programme, films, games, tales/stories, history books, internet.

Question: 2. (iii) How are CE and BCE counted?

Answer: CE (Common Era) = the years after the birth of Jesus Christ are counted; BCE (Before Common Era) = the years before the birth are counted. Examples: Alexander the Great died in 323 BC — that is, 323

years before the birth; Quaid-e-Azam died in 1948 — that is, 1948 years after the birth.

Question: B. 1. Investigate how the means of transport developed over the centuries. Can you present it in a fast-moving time line (pictorial)?

Answer: (Investigate) Show the development of transport on a time line in order: from old means (for example: bullock cart, horse) to new means (railway, motor car, aeroplane). The chapter does not give the detail of the history of transport; arrange it by the rules of the time line.

Question: C. 1. Discuss in groups of four pupils: what is history, why are we and how do historians study it; the spokesperson of each group will present ideas before the class.

Answer: (Discussion) History: history is the study of events which happened in the past. We study it because it tells us how many things changed, and opens our eyes about other cultures. The historian's method: asking questions about the past (What happened? When? Where? How? Why?), collecting evidence, and studying primary and secondary sources.

Unit 10, Ch 3: Developing Geography Skills - Map Making

1. (i) A map is a _____ and _____ of a small surface of the earth.

Answer: symbolic presentation, a shortened reference (a small sketch)

1. (ii) The four elements of a map are _____, _____, _____ and _____.

Answer: title,, key, (symbol), compass, scale.

1. (iii) The classifications into which maps can be divided are _____ and _____.

Answer: general reference maps, thematic maps.

1. (iv) Physical maps show the _____ of an area.

natural features

1. (v) Topographical maps show the _____ and _____ of the land.

Answer: height, shape

Question: 2. Table: Write the titles, types and characteristics of the maps in your textbook. Columns: Titles of maps | Types of maps | Characteristics.

Answer: (Table) Write from the maps of your textbook — examples: Political map — boundaries and provinces of the country; Physical map — natural features: river, mountain, lake; Topographical map — height and shape of the land, contour lines.

Question: 3. (i) Define the term map.

Answer: Map: the symbolic presentation of the characteristics of some place made or presented on a flat surface is called a map.

Question: 3. (ii) What is meant by the key symbol on a map? How does it help in studying the map?

Answer: The key (symbol) is that which tells the symbols present on the map and why it was made. Example: a point shows a city. To know the symbols it is necessary to understand the key — without it the map cannot be read.

Question: 3. (iii) Explain three thematic maps and the information provided by them.

Answer: 1. Physical map: the natural features of an area — river, lake, mountain, plateau, sea, coastal areas, desert. 2. Political map: the boundaries and provinces of the country. 3. Weather map: the weather of different parts — high pressure = good weather, low pressure = chances of rain.

Question: 3. (iv) What is a topographical map? How does it tell the height and shape of the land in the map?

Answer: A topographical map shows the height and shape of a part of the land. It tells height by contour lines: an imaginary line whose all points are of the same height; each line and the distance between shows a difference of ten metres in height. Close lines = sloping land, far lines = flat land, no line = completely flat. Height is also shown by colours and numbers.

Question: B. 1. In a small group of four find out how big the school ground, building and classroom are; then make a map for your school.

Answer: (Activity) Measure the school ground, building and classroom; choose a scale; make a map with title, key and compass.

Question: C. 1. Give your map to another group; they will use your symbols/key to correctly identify the rooms of the school building.

Answer: (Activity) Give your school map to another group; they will use your key symbols to correctly identify the rooms of the building

(classroom, office, library etc.).

Unit 10 End Exercises

Question: A. 1. Match the following columns: Column A (Primary sources) — Bones and structures, building structure, shapes, vessels (pots), tools (implements), written document. Column B (Characteristics of ancient civilisation) — Buildings, defence, education, food, residence (houses), jewellery, language, professions (work), religion, transport. Note: one primary source can tell about more than one characteristic.

Answer: Bones and structures — Food, professions (work). Building structure — Buildings, residence (houses), defence. Shapes — Religion, jewellery. Vessels (pots) — Food, professions (work). Tools (implements) — Professions (work), defence, transport. Written document — Language, education, religion, transport.

Question: A. 2. (i) What is meant by research (investigation)? Point out ten sources of information.

Answer: The process of investigation is like detective work: asking a key question, collecting information or evidence, analysing it and drawing a conclusion from it. Ten sources of information: books, newspapers, internet, TV, radio, talking to teachers/experts, survey, museum, artefacts/works of art, autobiographies/traditional tales.

Question: A. 2. (ii) What nature of evidence do historians examine and why?

Answer: Historians examine primary and secondary sources. Because for a complete and accurate picture of the past many sources are needed; primary sources are used for researching secondary sources.

Question: A. 2. (iii) Why is it difficult for historians to know the truth about the past?

Answer: It is difficult for historians to know the truth because evidence is incomplete and some evidence is not available; secondary sources are not proof like primary sources; writers have their own viewpoint and bias; and fact and opinion must be distinguished. There is no formula for research — it depends on what we want to know and what is available.

Question: A. 2. (iv) What is meant by "geography"? Why are maps a suitable source for geographers?

Answer: (Note) The chapter's text does not define geography. Maps are a suitable source for geographers because a map is a symbolic presentation of the characteristics of a place; it presents information in a simple and better way; it shows the size/shape of countries, the locations of features, the difference between places and the distribution of things on the land; and it is these maps from which we begin.

Question: A. 2. (v) Write the names of the elements of a map and how they help in understanding/explaining the map?

Answer: Elements of a map: 1. Title — tells which place/topic the map is of. 2. Key (symbol) — explains the symbols on the map. 3. Compass — indicates the north and gives an idea of the correct direction. 4. Scale — tells the relation between the distance on the map and the actual distance on the ground.

Question: A. 3. 1. This is a matter of three thousand rupees... an unusual object has been found... What are the clues in the pattern of the object? Is it some kind of ancient writing? Which expert should be given the responsibility? In your opinion what should become clear from the pattern?

Answer: (Investigation — activity) Examine the object with the steps of investigation: look at its symbols/marks, material and shape; if there is writing on it, it may be an ancient script and it should be given to an expert (historian/archaeologist); the pattern can tell about the language,

art and lifestyle of that era. The actual answer depends on the object found.

Question: A. 3. 2. What could be the three possible uses of the long string — hanging like a weapon / wrapping it in a game object and throwing it / lifting the object — which point do you agree with? What was the use of the string?

Answer: (Investigation — activity) Examine all three possibilities with evidence: if the string is strong and the object is heavy, it may have been for lifting; if there are knots or wrapping marks in it, it may be related to a game or weapon. The answer depends on the evidence.

Question: A. 3. 3. What do the artefacts tell about that culture?

Answer: (Investigation — activity) Artefacts (tools, vessels, jewellery) indicate the goods and technical skill of that culture: they tell what people made, how they lived and how skilled they were.

Question: A. 3. 4. As a historian, examine this object — what is your opinion? Present a report before the class.

Answer: (Investigation — activity) As a historian base your opinion on the steps of investigation: question, evidence, analysis, conclusion; then present the report to the class — keep a distinction between fact and opinion and avoid bias.

Question: B. 1. Make a poster in which the skills in the works of geography are combined.

Answer: (Creative work) Make a poster in which the skills of geography are combined: studying maps (title, key, compass, scale), types of maps (physical, political, weather), and topographical maps (height, shape, contour lines).

Question: C. 1. Prepare a tourist booklet (brochure) of a country of your choice in which the skills of maps, history and geography are included.

Answer: (Tourist booklet) Make a booklet of a country containing its map (title, key, compass, scale), its history (important events, time line) and its geography (physical features, weather).

Question: D. 1. Prepare a hand advertisement to inform others about the importance of history.

Answer: (Advertisement) Make a hand advertisement telling why the study of history is important: it tells how many things changed, keeps us informed about daily changes, and opens our eyes about other cultures.

Question: H. 1. Write three short paragraphs: (1) What did you learn from doing research, (2) What did you learn from growing in the historian's skills, (3) What did you learn from knowing the use of maps.

Answer: (Graph/writing) Write three paragraphs: (1) Research: learned asking a question, collecting information, analysing and presenting. (2) Historian's skills: learned studying primary and secondary sources, measurement of time, sequence and time line. (3) Maps: learned the elements of a map, its types and contour lines.

Question: W. 1. Source "A": Remains of animal bones, weapons. Source "B": Vessels for storing grain. Source "C": Pyramids and mountain engravings. In groups of four, looking at these evidences tell what the civilisation of this society would have been, and answer the following questions: What would these people eat? Where would they cook food? How was it known that these people hunted? Did they worship gods? What is your opinion about this civilisation on the evidence of source "C"?

Answer: (Cooperation) The evidence shows that this was an organised, religious and skilled civilisation. (1) People would eat meat (from animal bones) and grain (from vessels). (2) They would cook food at home/on fire — from the vessels. (3) Animal bones and weapons show that they hunted. (4) Yes, pyramids and mountain engravings show a religious belief. (5)

Opinion from source "C": this was an organised, religious and skilled civilisation.
